Pilgrim at Tinker Creek Annie Dillard, 2009-10-13
Winner of the Pulitzer Prize "The book is a form of meditation, written with headlong urgency, about seeing. . . . There is an ambition about her book that I like. . . . It is the ambition to feel." – Eudora Welty, New York Times Book Review
Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of beauty tangled in a rapture with violence. Dillard's personal narrative highlights one year's

exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.

Red Ocean Traps (Harvard Business Review Classics) W. Chan Kim, Renée A.

Mauborgne, 2017-05-30 As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? World-renowned professors W. Chan Kim and Renee Mauborgne, the authors of the best-selling book Blue Ocean Strategy have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models--ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). In this bound version of their bestselling Harvard Business Review classic article, they describe how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (3) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable

volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

Marathon Woman Kathrine Switzer,2017-04-04 In 1967, Kathrine Switzer was the first woman to officially run what was then the all male Boston Marathon, infuriating one of the event's directors who attempted to violently eject her. In what would become an iconic sports image, Switzer escaped and finished the race. This was a watershed moment for the sport, as well as a significant event in women's history. Including updates from the 2008 Summer Olympics, the paperback edition of *Marathon Woman* details the life of an incredible, pioneering athlete, and the lasting effect she's had on women's sports. Switzer's energy and drive permeate the pages of this warm, witty memoir as she describes everything from the childhood events that inspired her to succeed to her big win in the 1974 New York City Marathon, and beyond.

Determination of Land Elevation Changes Using

Tidal Data Francisco António Torres Vidal

Abreu,1980 The purpose of this thesis is to study the temporal pattern of vertical land movements at selected Pacific Coast tide stations. The relative motion of the land at these stations is indicated by the relationship between monthly mean sea levels measured at pairs of stations. Examination of historical monthly mean sea level data by means of graphical and spectral analysis led to the use of an anomaly filter which adjusts for mean monthly differences. A cumulative analysis procedure of Wyss (1977) was adopted to the study of the relative movement of seven tide stations. Determination of the type of vertical movement between pairs of stations, the date of sudden movement, and the station responsible can be determined from analysis of the cumulative curve of monthly sea level difference. Results of the cumulative analysis show that tide stations, whether separated by short or long distances, experience frequent changes in relative elevation. Whether these are caused by land movements or changes in station datum, or both, is not known. (Author).
