*A Riot of Quiet* Virginia Sicotte,1969 A listing in verse of the sounds you won't hear if you twitch your nose or wiggle an ear, such sounds as bubbles bursting in the air, tangles forming in your hair.

*Fibreglass Boats* Hugo du Plessis,2013-07-15 This masterly work will continue to be an invaluable source of reference for anyone wanting practical advice on working with GRP, in order to make repairs and improvements correctly and thus extend the life of their boat. Since it was first published 45 years ago, Hugo du Plessis' Fibreglass Boats has become a classic, relied upon by owners, surveyors and boat builders keen to understand how fibreglass behaves, and obtain practical advice on working with GRP. In a deliberately non-technical manner, he explains the peculiar nature of fibreglass, its durability, its weaknesses, where its likely to fail, the effects of use and the weather, plus the latest research into causes of the biggest worry for owners - blistering and osmosis. 'One of the most respected works on the subject... thorough and its scope is vast' Yachting Monthly 'A long-established classic' Kelvin Hughes

*Boats Go* Steve Light,2015-03-03 All aboard! Sail away with 8 noisy boats, as they toot, chug, clang, and splash their way across the water! The sturdy pages feature a fireboat, tugboat, cruise ship, paddleboat, speedboat, sailboat, submarine, and gondola, and encourage young readers to chime in with all the noises each makes—ssshhhh cling-clang FLAP FLAP FLAP goes the sailboat! Here's a joyful addition to this much-praised series.

Sounds Wild and Broken David George Haskell,2023-03-07 Longlisted for the 2023 PEN/E.O. Wilson Literary Science Writing Award “[A] glorious guide to the miracle of life’s sound.” –The New York Times Book Review A lyrical exploration of the diverse sounds of our planet, the creative processes that produced these marvels, and the perils that sonic diversity now faces We live on a planet alive with song, music, and speech. David Haskell explores how these wonders came to be. In rain forests shimmering with insect sound and swamps pulsing with frog calls we learn about evolution’s creative powers. From birds in the Rocky Mountains and on the streets of Paris, we discover how animals learn their songs and adapt to new environments. Below the waves, we hear our kinship to beings as different as snapping shrimp, toadfish, and whales. In the startlingly divergent sonic vibes of the animals of different continents, we experience the legacies of plate tectonics, the deep history of animal groups and their movements around the world, and the quirks of aesthetic evolution. Starting with the origins of animal song and traversing the whole arc of Earth history, Haskell illuminates and celebrates the emergence of the varied sounds of our world. In mammoth ivory flutes from Paleolithic caves, violins in modern concert halls, and electronic music in earbuds, we learn that human music and language belong within this story of ecology and evolution. Yet we are also destroyers, now silencing or smothering many of the sounds of the living Earth. Haskell takes us to threatened forests, noise-filled oceans, and loud city streets, and shows that sonic crises are not mere losses of sensory ornament. Sound is a

generative force, and so the erasure of sonic diversity makes the world less creative, just, and beautiful. The appreciation of the beauty and brokenness of sound is therefore an important guide in today's convulsions and crises of change and inequity. *Sounds Wild and Broken* is an invitation to listen, wonder, belong, and act.
