Application of Radioisotopes for Aerospace Waste Reclamation and Water Systems Courtney A. Metzger, Albert B. Hearld, Bobby J. Reynolds, Rufus Shivers, Robert W. Murray, 1967 A life support system designed for aerospace application was thermally powered by a radioisotope heat source at a significant saving in electrical energy. This report summarizes the research program and resulting design, development, and evaluation of a vacuum distillation-vapor pyrolysis water reclamation system that was subjected to a 30-day isotope powered unmanned test. In addition to the savings of electrical energy the application of a radioisotope heat source is expected to result in a simple and more reliable water recovery system producing an excellent quality water without the use of pre- or post treatment for extended periods of operation. Discussed are other water recovery processes that show good promise for the utilization of isotopes for the thermal energy that have been subjected to comparison evaluation using electrical energy. The use of several waste management techniques to obtain a complex integrated system are discussed including urine and fecal collection, fecal storage, potable hot and cold water storage and dispensing, and potability measurements that show promise for the use of the waste heat from the isotopes.

**Boron Isotopes** Horst Marschall, Gavin Foster, 2017-11-16 This new volume on boron isotope geochemistry offers review chapters summarizing the cosmochemistry, high-temperature and low-temperature geochemistry, and marine chemistry of boron. It also covers theoretical aspects of B isotope fractionation, experiments and atomic modeling, as well as all aspects of

boron isotope analyses in geologic materials using the full range of solutions and in-situ methods. The book provides guidance for researchers on the analytical and theoretical aspects, as well as introducing the various scientific applications and research fields in which boron isotopes currently play a major role. The last compendium to summarize the geochemistry of boron and address its isotope geochemistry was published over 20 years ago (Grew & Anovitz, 1996, MSA Review, Vol.33), and there have since been significant advances in analytical techniques, applications and scientific insights into the isotope geochemistry of boron. This volume in the “Advances in Isotope Geochemistry” series provides a valuable source for students and professionals alike, both as an introduction to a new field and as a reference in ongoing research. Chapters 5 and 8 of this book are available open access under a CC BY 4.0 license at [link.springer.com](http://link.springer.com)

**Siege 13** Tamas Dobozy, 2013-01-21 Stories exploring a world of ordinary people caught between the pincers of aggressors, leading to actions at once deplorable, perplexing, and heroic. In the fall of 1944, the Red Army encircled Budapest, surrounding tens of thousands of German and Hungarian troops, and nearly a million civilians. The ensuing months witnessed one of the most brutal sieges of World War II, with block-to-block guerilla warfare followed by widespread disease, starvation, and unspeakable atrocities. Richly grounded in this historical trauma and its extended aftermath, the stories in Siege 13 alternate between the siege itself and a contemporary community of Hungarian émigrés who find refuge in the West. Illuminating the horror and absurdity of war with wit and subtlety, Tamas Dobozy explores a

world in which right and wrong are not easily distinguished, and a gruesome past manifests itself in perplexing, often comical ways. Winner of the Rogers Writers' Trust Fiction Prize Praise for Siege 13 "Alice Munro . . . Isaac Babel . . . Those comparisons may sound daunting, but Dobozy has mastered the technical conventions of his craft . . . This vivid rendering of Hungarian history as a nightmare from which no one quite wants to awake is Dobozy's finest achievement." –Garth Risk Hallberg, The New York Times Book Review "The sheer variety of Dobozy's approaches to telling stories, and his commitment not only to provoke thought but to entertain, constitute a virtuoso performance. Siege 13 is without question one of my favorite story collections ever." –Jeff VanderMeer, The Washington Post "A superb collection of short stories that revisits two of the deadliest months in Hungarian history. The book tells the stories of those who hid, those who fought, those who betrayed, those who escaped and those who died, and how the effects of the siege still linger, three-quarters of a century later. . . . Siege 13 is one of the best books of the year." –Mark Medley, National Post (Canada)

**New Universe Theory with the Laws of Physics** Bobby McGehee, 2005 Big-Bang? Do you believe it? I don't. Being a career engineering-physicist, I always look for proof. For 50 years I have tried to prove the BB to myself. I have reviewed Slipher's red shift observation, reinterpreted it, and corrected Hubble's declaration, (the universe is not expanding and exploding to its death, instead, it is growing with vim and vigor). Red shift defines velocity, not acceleration or deceleration. So, I developed the New Universe Theory which is believable because it complies with known facts and the Laws of Physics.

WHAT WILL IT DO TO HUMAN.RELATIONS, TO PARENTS . . . AND CHILDRENExcerptMy name is Jimmy and I am five years old, and my friend Bobby is five years old too but he says he thinks he really must be older than five years old because he's grown up already and I'm just a little boy. We live out in the country because that's where Mommy and Daddy live, and every morning Daddy gets into the car that we have out in the barn and rides into the city to work, and every night he comes back to eat supper and to see Mommy and me and Bobby. Once I asked Daddy why we don't live in the city like some people do and he laughed and said you wouldn't really want to live in the city would you? And I said I thought it would be fun, and he said but you couldn't have Bobby in the city, so I guess it's better that we live out in the country after all, and anyway Daddy says that the city is no place to raise kids these days. I asked Bobby if I am a kid and he said he guessed so but I don't think he really knew what that meant because Bobby isn't so very smart. But Bobby is my friend and I like him.
