The Internationalization of the Renminbi International Monetary

Institute, 2013-11-07 The recent financial crisis, rooted in the United States, has changed the world's economic and financial structures. The Chinese government has made some arrangements in the post-crisis to ensure stable economic growth in volatile international economic environments and to protect its own interests from unfair international monetary treatments. The internationalization of Renminbi (RMB) is one of China's most important national strategies in the 21st century and is symbolic in the rise of China. This book aims to document the process and the development of the internationalization of Renminbi and to identify the challenges. The book introduces an index of internationalization of Renminbi. It also uses a comprehensive multi-variable index to determine the degree of internationalization of Renminbi. This book helps readers to understand the current status of the reformation on China's currency system, the process of internationalization of the RMB and the current, intricate political and economic relations.

The Lion Wakes David Kynaston, Richard Roberts, 2015-03-05 The Lion Wakes tells the modern story of HSBC, starting in the late 1970s, when the bank first broke out of the Asia-Pacific region with its purchase of Marine Midland Bank in the US. It follows HSBC's

battle to purchase Midland Bank in 1992, the subsequent move of head office from Hong Kong to London, and the string of acquisitions that brought the bank to its pre-eminent place in global finance today. Acclaimed historians Richard Roberts and David Kynaston chronicle the bank's struggles as well as its successes: the last part of the book deals with the ill-fated move into consumer finance in the US, as well as the financial crisis of 2008 and its effect on HSBC. Impeccably researched and generously illustrated from the HSBC archives, this is a valuable addition to global financial history.

Mutual market connectivity and Hong Kong market innovations for new-economy financing 何志平 BA Shusong, 2019-10-30 Amid the global financial turbulence, the Mutual Market Access (MMA) programme, comprising the Shanghai Connect, the Shenzhen Connect and the Bond Connect, has solidified Hong Kong's status as a unique financial hub connecting the East and the West and, in this process, has explored a new path for the opening-up of China's capital market. In the face of economic structural changes across the globe, Hong Kong seeks to look into innovations in financing the new economy, and has built up experiences for reference in the Asian time zone. Hong Kong is gradually establishing a new ecosystem around new-economy enterprises and has made them new targets of investment for both Mainland and overseas investors trading under MMA. This book is the first bilingual title in the market that explains in detail the MMA model between Hong Kong and Mainland China and innovations in new-economy financing, in which experts and research teams who are experienced in these areas discuss in-depth on the key functional drivers of innovations in Hong Kong and the

Mainland, including the “MMA”, “new-economy financing” and “global asset allocation”. Elaborating the unique concepts of the MMA model and summarising what HKEX has learned in its reforms in new-economy financing, this book shall come in handy for market participants to make better use of the MMA model and benefit from the latest reforms of Hong Kong’s listing regime.

Cornerstone Investors Philippe Espinasse, 2018-01-04 In this groundbreaking guide, former investment banker Philippe Espinasse explains the process of gathering cornerstone investors in connection with IPOs and other equity offerings. Using his trademark simple and jargon-free language, he details the targeting strategies, documentation, marketing, and allocation of shares and other securities to these reference shareholders, and analyses why and how they make or break today's new listings across Asia's key markets. This essential guide—and the first of its kind—contains key information on the legal framework for cornerstone investors in Hong Kong, Malaysia, and Singapore, and offers practical advice on how best to structure and conduct a cornerstone investor offering. It also discusses some of the more controversial issues associated with the practice of cornerstone investment and includes many real-life examples of cornerstone deals, sample documents, cornerstone investor profiles, an investor target list, and a comprehensive glossary. 'There is no better person to shed light on the opaque world of cornerstone investing in Asian IPOs. Philippe Espinasse writes clearly, substantively, and expertly.' —Jasper Moiseiwitsch, Asia companies and markets news editor, Financial Times 'As engaging as it is informative. Espinasse has cut through legalese and jargon to create a pragmatic overview of this widely misunderstood, and distinctly Asian, investment banking concept. Packed with recent examples, this book doesn't just teach you about cornerstones; it also provides an insider's take of the region's capital markets hubs.' —Danielle Myles, capital markets editor, The Banker 'Cornerstone investors have taken centre stage in Hong Kong's IPO market. This book is needed now more than ever.' —Matthew Thomas, Asia bureau chief, Euromoney Institutional Investor

The Era of Chinese Multinationals Lourdes Casanova, Anne Miroux, 2019-11-12 Chinese multinationals have grown in size and increased their global presence dramatically over the last decade. They have emerged as formidable competitors for western incumbents. These firms have instigated profound changes, such as displaced trade and investment flows, new business models, and the emergence of a new geography of global innovation. In a single volume, The Era of Chinese Multinationals captures the forces driving the disruptive growth of Chinese multinational corporations. Following a presentation of the surge of Chinese companies, the book turns to corporate characteristics of those firms and how they compare with western multinationals in terms of revenues, profits, branding, and business strategy. The book uses data and case studies to depict the relevant issues with the goal of providing insights to global executives on

collaborating and competing with Chinese companies. Covers the Chinese government's expansionist policies and Chinese firms' new role as a global acquirer of companies
Examines common characteristics of Chinese companies and their efforts to make China an innovation hub Illustrates its analysis with case studies and interviews with corporate executives and experts in multilateral institutions

The big reset revised edition Willem Middelkoop, 2015-12-11 A system reset seems imminent. The world's financial system will need to find a new anchor before the year 2020. Since the beginning of the credit crisis, the US realized the dollar will lose its role as the world's reserve currency, and has been planning for a monetary reset. According to Willem Middelkoop, this reset will be designed to keep the US in the driver's seat, allowing the new monetary system to include significant roles for other currencies such as the euro and China's renminbi. Prepare for the coming Reset In all likelihood gold will be re-introduced as one of the pillars of this next phase in the global financial system. The prediction is that gold could be revalued at \$ 7,000 per troy ounce. By looking past the American 'smokescreen' surrounding gold and the dollar long ago, China and Russia have been accumulating massive amounts of gold reserves, positioning themselves for a more prominent role in the future to come. The reset will come as a shock to many. 'The Big Reset' will help everyone who wants to be fully prepared. This fully revised edition of Middelkoop's book takes into account developments since its original publication, which have only strengthened the case for the coming return of gold.

Innovation In China: A Strategic Management Casebook Hugh Thomas, 2022-04-08 Innovation has shaped society since civilization began. Imperial China was the most innovative society on earth, but it failed to join the 19th century industrial revolution. In the 20th century, the Communist Party of China addressed that failure. Today China boasts an internationally compliant, rapidly developing IP system. State planning continues to be critical as the case of the largest, single, technology acquisition and infrastructure project in world history, high speed rail, demonstrates. But most of the innovation in China comes from the private sector: government incubators are among the government stimuli of private initiative, both local and global. And as the case on Cisco shows, foreign MNCs management of innovation in China is attractive but must involve co-ordination with government policy. This book presents cases where managers determine policy in China's increasingly innovative society. Readers take the roles of decision-makers to make strategy decisions. The cases in this volume showcase China's traditional three teachings, socialist market institutions, and modern management using studies on current Chinese companies and their leaders, among them big names such as Haier and Huawei. Each case stands alone as teaching material for instructors. Taken together, the book presents evolving models of innovation. Their subtle differences from western constructs critically impact the development of our global society.
