different aircraft from the early Blenheims and Stirlings to the later Lancasters and Mosquitoes. Each volume is full of accounts that tell of the camaraderie amongst the crews, moments of sheer terror and the stoic humor that provided the critical bond. The five volumes of this work provide the most vivid and comprehensive work on the outstanding part played by RAF Bomber Command in their vital role in the destruction of the Third Reich.

Dive Bomber Down Bryan J. Dickerson,2024-03-08 James A. Nist lived an extraordinary life in his 24 years. Raised on a New Jersey farm, he graduated high school at 16 and earned both a bachelor's degree from Rutgers University and a private pilot's license. In 1942, he joined the Navy as an aviation cadet, earning his wings and an officer's commission in the Naval Reserve. He became proficient in three of the Navy's high-performance combat aircraft: the SBD Dauntless dive-bomber, the F6F Hellcat fighter and the F4U Corsair fighter. In 1945, he deployed to the Pacific aboard the carrier USS Bunker Hill and flew combat missions over Japan, Iwo Jima and Okinawa. Drawing on Nist's letters and personal papers and official Navy documents, historian Bryan J. Dickerson tells the story of his great uncle's life and service during World War II.

Command and Control Eric Schlosser,2013-09-17 The Oscar-shortlisted documentary Command and Control, directed by Robert Kenner, finds its origins in Eric Schlosser's book and continues to explore the little-known history of the management and safety concerns of America's nuclear arsenal. “Deeply reported, deeply frightening . . . a techno-thriller of the first order.” —Los Angeles Times “A devastatingly lucid and detailed new history of nuclear weapons in the U.S. . . . fascinating.” —Lev Grossman, TIME Magazine A myth-shattering exposé of America’s nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America’s nuclear arsenal. A groundbreaking account of accidents, near misses, extraordinary heroism, and technological breakthroughs, Command and Control explores the dilemma that has existed since the dawn of the nuclear age: How do you deploy weapons of mass destruction without being destroyed by them? That question has never been resolved—and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind. While the harms of global warming increasingly dominate the news, the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten. Written with the vibrancy of a first-rate thriller, Command and Control interweaves the minute-by-minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years. It depicts the urgent effort by American scientists, policy makers, and military officers to ensure that nuclear weapons can’t be stolen, sabotaged, used without permission, or detonated inadvertently. Schlosser also looks at the Cold War from a new perspective, offering history from the ground up, telling the stories of bomber pilots, missile commanders, maintenance crews, and other ordinary servicemen who risked their lives to avert a nuclear holocaust. At the heart of the book lies the struggle, amid the rolling hills and small farms of Damascus, Arkansas, to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States. Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons, Command and Control takes readers into a terrifying but fascinating world that, until now, has been largely hidden from view. Through the details of a single accident, Schlosser illustrates how an unlikely event can become unavoidable, how small risks can have terrible consequences, and how the most brilliant minds in the nation can only provide us with an illusion of control. Audacious, gripping, and unforgettable, Command and Control is a tour de force of investigative journalism, an eye-opening look at the dangers of America’s nuclear age.

American Graffiti Margo Thompson,2012-05-08 The first appearances of graffiti “tags” (signatures) on New York City subway trains in the early 1970s were discarded as incidents of vandalism or the rough, violent cries of the ignorant and impoverished. However, as the graffiti movement progressed and tags became more elaborate and ubiquitous, genuine artists emerged whose unique creativity and unconventional media captured the attention of the world. Featuring gallery and street works by several contributors to the graffiti scene, this book offers insight into the lives of urban artists, describes their relationship with the bourgeois art world, and discusses their artistic motivation with unprecedented sensitivity.

The Last Mission Harry Mazer,2008-12-30 In 1944, as World War II is raging across Europe, fifteen-year-old Jack Raab dreams of being a hero. Leaving New York City, his family, and his boyhood behind, Jack uses a false I.D. and lies his way into the U.S. Air Force. From their base in England, he and his crew fly twenty-four treacherous bombing missions over occupied Europe. The war is almost over and Hitler near defeat when they

fly their last mission -- a mission destined for disaster. Shot down far behind enemy lines, Jack is taken prisoner and sent to a German POW camp, where his experiences are more terrifying than anything he'd ever imagined.

Australian History Live! Ian Warden, 2013 This book is a collection of virtual time-travellings back to Australia's past. AustralianHistory Live! is a compelling look at Australian history using first person accounts as reported in the press and in journals and diaries. Included in the collection are gripping accounts of occasions both great and minor. Here you can find the heart wrenching account of a bewildered little terrier dog refusing to leave the bayoneted dead body of its master just killed at the Eureka Stockade. Read an amazing description of Bert Hinkler landing his absurdly tiny little aeroplane (he'd just flown it across the world in a world-record time) on the straight at Flemington Racecourse. Share scientist Francis Ratcliffe's experience of being caught and shaken by a very wild willy-willy.

Bulletin of the Atomic Scientists, 1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world.

The Fighting Tigers William David Downs, 2004-01-01 After the attack on Pearl Harbor in late 1941, the call of a nation went out and thirty-five young men of the Ouachita Baptist University answered. This is their story--one of dedication, commitment, and sacrifice.

No Time and Nowhere Fergus Hinds, 2016-08-26 Why do so many people believe in an Invisible World behind this one? Scientists a parallel universe? Religions an afterlife? Others 'just something'? Perhaps for observations we cannot explain? Some are psychological, e.g. the nature, storage, and conveyance of the information implicit in 'ghosts', hunches, premonitions and hypnosis; and some are material – the behaviour of particles on a very small scale in physics laboratories. Each hints at spatial or temporal derangement. Space and Time are the indivisible foundations of physics. Everything that exists has a location and duration; physics concerns nothing without both. We can suppose the universe bound not by a physical framework of space-time but as containing within itself all Space and all Time - with a little more besides. Another world is not a baseless idea.

Sir, They're Taking the Kids Indoors Ken Wharton, 2012-09-19 The British Army veteran and oral historian presents vivid firsthand accounts of soldiers on the frontlines of the Troubles in the early 1970s. This volume in Ken Wharton's series of oral histories chronicling the conflict in Northern Ireland looks at the bloody period of 1973/4. As with all of Wharton's books, it combines painstaking research with numerous contributions from British soldiers who were. The title refers to an IRA tactic of warning fellow Republicans when one of their gunmen was about to cause havoc. When British soldiers hear the words "Sir, they're taking the kids indoors", they understood that violence was imminent. On the streets of Belfast or Londonberry, British soldiers had to be ready to face a deadly threat at any moment. By focusing exclusively on the 1973–74 period, This volume provides greater detail than hitherto possible about the British Army and their experience during this bloody and important period of the Troubles.
