Building Web and Mobile ArcGIS Server Applications with JavaScript Eric Pimpler, Mark Lewin, 2017-10-24 Master the ArcGIS API for JavaScript to build web and mobile applications using this practical guide. About This Book Develop ArcGIS Server applications with JavaScript, both for traditional web browsers as well as the mobile platform Make your maps informative with intuitive geographic layers, user interface

widgets, and more Integrate ArcGIS content into your custom applications and perform analytics with the ArcGIS Online Who This Book Is For If you are a web or mobile application developer, who wants to create GIS applications in your respective platform, this book is ideal for you. You will need Java Script programming experience to get the most out of this book. Although designed as an introductory to intermediate level book, it will also be useful for more advanced developers who are new to the topic of developing applications with ArcGIS Server. What You Will Learn To create an application with the ArcGIS API for JavaScript Build and display a broad range of different geometry types to represent features on the map The best way to leverage a feature layer and display related attribute data The functionality of the wide range of widgets and how to use them effectively Query data to gain new insights into the information it contains Work with tasks to discover and locate features on the map Using the geocoder and associated widgets The ability of the API to provide turn by turn directions and routing capabilities How to use the Geometry Engine and Geometry Service tasks for common geoprocessing operations Integrate content on ArcGIS online and add it to your custom web mapping application In Detail The ArcGIS API for JavaScript enables you to quickly build web and mobile mapping applications that include sophisticated GIS capabilities, yet are easy and intuitive for the user. Aimed at both new and experienced web developers, this practical guide gives you everything you need to get started with the API. After a brief introduction to HTML/CSS/JavaScript, you'll embed maps in a web page, add the tiled, dynamic, and streaming data layers that your users will interact with, and mark up the map with graphics. You will learn how to quickly incorporate a broad range of useful user interface

elements and GIS functionality to your application with minimal effort using prebuilt widgets. As the book progresses, you will discover and use the task framework to query layers with spatial and attribute criteria, search for and identify features on the map, geocode addresses, perform network analysis and routing, and add custom geoprocessing operations. Along the way, we cover exciting new features such as the client-side geometry engine, learn how to integrate content from ArcGIS.com, and use your new skills to build mobile web mapping applications. We conclude with a look at version 4 of the ArcGIS API for JavaScript (which is being developed in parallel with version 3.x) and what it means for you as a developer. Style and approach Readers will be taken through a series of exercises that will demonstrate how to efficiently build ArcGIS Server applications for the mobile and web.

Online Maps with APIs and WebServices Michael P Peterson, 2012-03-30 The Internet has become the major form of map delivery. The current presentation of maps is based on

the use of online services. This session examines developments related to online methods of map delivery, particularly Application Programmer Interfaces (APIs) and MapServices in general, including Google Maps API and similar services. Map mashups have had a major impact on how spatial information is presented. The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world. Overlaying features on top of these maps provides a frame of reference for the map user. A particular advantage for thematic mapping is the ability to spatially reference thematic data.

Hands-On Blockchain for Python Developers Arjuna Sky Kok, 2019-02-14
Implement real-world decentralized applications using Python, Vyper, Populus, and Ethereum Key Features Stay up-to-date with everything you need to know about the blockchain ecosystem Implement smart contracts, wallets, and decentralized applications (DApps) using Python libraries Get deeper insights into storing content in a distributed storage platform Book Description Blockchain is seen as the main technological solution that works as a public ledger for all cryptocurrency transactions. This book serves as a practical guide to developing a full-fledged decentralized application with Python to interact with the various building blocks of blockchain applications. Hands-On Blockchain for Python Developers starts by demonstrating how blockchain technology and cryptocurrency hashing works. You will understand the fundamentals and benefits of smart contracts such as censorship resistance and transaction accuracy. As you steadily progress, you'll go on to build smart contracts using Vyper, which has a similar syntax to Python. This experience will further help you unravel the other benefits of smart contracts,

including reliable storage and backup, and efficiency. You'll also use web3.py to interact with smart contracts and leverage the power of both the web3.py and Populus framework to build decentralized applications that offer security and seamless integration with cryptocurrencies. As you explore later chapters, you'll learn how to create your own token on top of Ethereum and build a cryptocurrency wallet graphical user interface (GUI) that can handle Ethereum and Ethereum Request for Comments (ERC-20) tokens using the PySide2 library. This will enable users to seamlessly store, send, and receive digital money. Toward the end, you'll implement InterPlanetary File System (IPFS) technology in your decentralized application to provide a peer-to-peer filesystem that can store and expose media. By the end of this book, you'll be well-versed in blockchain programming and be able to build end-to-end decentralized applications on a range of domains using Python. What you will learn

- Understand blockchain technology and what makes it an immutable database
- Use the features of web3.py API to interact with the smart contract
- Create your own cryptocurrency and token in Ethereum using Vyper
- Use IPFS features to store content on the decentralized storage platform
- Implement a Twitter-like decentralized application with a desktop frontend
- Build decentralized applications in the shape of console, web, and desktop applications

Who this book is for If you are a Python developer who wants to enter the world of blockchain, Hands-On Blockchain for Python Developers is for you. The book will be your go-to guide to becoming well-versed with the blockchain ecosystem and building your own decentralized applications using Python and library support.

UTM Security with Fortinet Kenneth Tam, Martín H. Hoz Salvador, Ken

McAlpine, Rick Basile, Bruce Matsugu, Josh More, 2012-12-31 Traditionally, network security (firewalls to block unauthorized users, Intrusion Prevention Systems (IPS) to keep attackers out, Web filters to avoid misuse of Internet browsing, and antivirus software to block malicious programs) required separate boxes with increased cost and complexity. Unified Threat Management (UTM) makes network security less complex, cheaper, and more effective by consolidating all these components. This book explains the advantages of using UTM and how it works, presents best practices on deployment, and is a hands-on, step-by-step guide to deploying Fortinet's FortiGate in the enterprise. Provides tips, tricks, and proven suggestions and guidelines to set up FortiGate implementations Presents topics that are not covered (or are not covered in detail) by Fortinet's documentation Discusses hands-on troubleshooting techniques at both the project deployment level and technical implementation area

Mastering ArcGIS Server Development with JavaScript Ken Doman, 2015-09-18 Transform maps and raw data into full-fledged web mapping applications using the power of the ArcGIS JavaScript API and JavaScript libraries About This Book Create and share modern map applications for desktops, tablets, and mobile browsers Present and edit geographic and related data through maps, charts, graphs, and more Learn the tools, tips, and tricks made available through the API and related libraries with examples of real-world applications Who This Book Is For This book is intended for intermediate developers who want to design web mapping applications. You should have some experience with geographic information systems, especially with ArcGIS products such as ArcGIS Server. It also helps to have some experience with HTML, CSS, and JavaScript. What You Will

Learn Create single-page mapping applications, lining up data from different sources
Search for and display geographic and tabular information based on locations and
attributes Customize maps and widgets to deliver the best user experience Present
location data intuitively using charts and graphs Integrate mapping applications with your
favorite JavaScript frameworks Test the working of your web map application and take
advantage of cloud services such as ArcGIS Online Create modern-looking web maps
through styling tips and tricks In Detail ESRI and its ArcGIS line of software have been an
industry leader in digital map production and publication for over 30 years. ArcGIS Server
lets you design, configure, and publish maps that can be viewed and edited through the
Internet. After designing basic maps, you may want to find out new and innovative ways to
represent information using these maps. In this book, you'll work through practical
examples, experiencing the pitfalls and successes of creating desktop and mobile map
applications for a web browser using the ArcGIS Server platform. The book begins by
introducing you to ArcGIS Server and ESRI's JavaScript API. You'll work with your first
web map and then move on to learn about ESRI's building blocks. A Dojo AMS style widget
will help you create your own widgets for a map and then see how to collect geographic
data. Furthermore, you will learn different techniques such as using Dojo Charts to create
charts and graphs to represent your data. Then you will see how to use ESRI JavaScript
API with other JavaScript libraries and different styling methods to make your map stand
out. By the end of the book, you will discover how to make your application compatible
with different devices and platforms and test it using testing libraries. Style and approach
An in-depth guide that explores web application development using ArcGIS Server and the

ArcGIS JavaScript API. Topics are explained in the context of developing two applications for fictional clients. Details of application development, including possible pitfalls and best practices, are included in this book.
