Retail Change Rosemary D.F. Bromley, Colin J Thomas, 2002-11-01 The economic, social and environmental implications of recent changes in retailing constitute significant contemporary issues, which are the focus of this timely book. Retail change deals with the internationalization of retailing, the development of shopping centres in the city and at suburban sites, and the growth of leisure shopping. It provides an up-to-date review of the central questions faced by undergraduate students in planning, business studies and geography. The retail environment of developed economies has undergone revolutionary change since the 1970s, and the process is far from over. In the book the major elements central to contemporary retail change are developed across the whole spectrum of spatial scales relevant to present-day society. The first part adopts an economic perspective and focuses on the process of business concentration and its increasingly international orientation. This is followed by analyses of change in the urban region, concentrating on the emergence of the great variety of new retail forms associated with retail decentralization. The planning implications of retail change are developed in the third part. The future of the city-centre and other traditional shopping centres is examined in the light of challenges presented by new facilities. Alternative future scenarios contingent upon laissez-faire or interventionist government policy controls are also discussed. The social implications of retail change are developed in the final section. All students and researchers concerned with the evolution and development of the retail sector of advanced economies will welcome this book as an authoritative source of contemporary findings and commentary. Rosemary D. Bromley and Colin J. Thomas are Lecturers in Geography at the University College of Swansea, Wales.. This book is intended for undergraduate students taking courses in economic geography and retailing in departments of geography, business studies, planning, etc.

Tourism and Retail Charles McIntyre, 2012-02-29 Tourists are drawn to explore new environments and peoples. What better way to interact with a locality than to seek out and roam its marketplaces? The nature of tourist shopping activity thus goes beyond mere functional purchasing into multi-sensory explorations of place and space. Awareness of the shifting nature of these attractions is crucial to retailers and place marketers, in this age of the internet, in order that the physical space of the market is also social and cultural space. This book offers new perspectives on the intersection between tourism and retail research that is liminal to both fields yet central to the tourist experience, standing as an important and illuminating realm of consumer behaviour. It features a selection of multidisciplinary researchers' perspectives on tourist retail format and formation attractiveness for consumers, from the economist to the fashion retailer. By reviewing selected developments in space, place and behaviours within leisure, entertainment and recreational shopping, encompassing travel points, retail centres, sensory/festival marketplaces, leisure/cityscapes, department stores and fashion, the book offers thought-provoking insights into the past, present and future of tourist retail across a variety of global locations. Given the emphasis upon consumer experience in place and space study and the apparent importance of retail activities within the tourism sphere, this book will be valuable reading for all those interested in retail, tourism and wider socio-cultural leisure environments and behaviours.

Sustainable Retail Development Jerry Yudelson, 2009-10-27 Sustainable Retail Development, addresses the emerging issue of green retail buildings and retail development that will grow significantly in importance over the next

half-decade, a trend seen throughout the developed world. This volume is a practical and comprehensive guide to greening retail real estate, including green building and marketing strategies, corporate sustainability programs and features a 10-point "action program" for greening any retail real estate portfolio. Sustainable Retail Development, should be essential reading for professionals in design, construction and operations of shopping centers and retail stores. Well illustrated, this volume features over 30 green retail developments from North America, Europe, South America, Asia and Australia, as well as interviews with 25 leading industry experts.

The Shops of Britain Hermann Levy, 2013-10-15 First Published in 1998. This is Volume XV of the eighteen in the Sociology of Work and Organization series and this book on The Shops of Britain follows the author's publication on Retail Trade Associations, a new form of monopolist organization in Britain. After the book had been completed, the Report of the Census of Distribution Committee, published in March 1946, urged the necessity of providing more statistical information about the distributive trades. One of the purposes of this book is to display how complex the structure of retailing is and to show that it is dependent on a great variety of economic, social, occupational and sociological factors which cannot be adequately assessed without a comparative analysis of all the various trades concerned with retailing.

Advances in National Brand and Private Label Marketing Francisco J. Martínez-López, Juan Carlos Gázquez-Abad, Anne Roggeveen, 2019-04-30 The 2019 International Conference on National Brand & Private Label Marketing is a unique academic forum for presenting and discussing original, rigorous and significant contributions from researchers around the world on marketing issues that retailers, store brand managers and national brand managers are facing. The three-day event covered a wide range of topics from varied fields including retailing, marketing, general business, psychology, economics and statistics. Further, it addressed diverse areas of application such as innovation, retail market structure, social media, consumer decision-making, store loyalty, assortment size, digital transformation, ethical aspects, cultural dimensions, and private label pricing. This volume gathers the proceedings of the 2019 NB&PL marketing conference in a collection of outstanding contributions that employ a wide variety of theoretical and methodological approaches.

New Perspectives on 20th Century European Retailing Peter Scott, Patrick Fridenson, 2021-05-13 Despite the publication of several studies examining European retailing in relation to the USA, there is still a dearth of recent research, in English, that explores the development of retailing in specific European countries (with the obvious exception of Britain), over the twentieth century. Even for the UK, more research is needed to challenge claims such as the alleged backwardness of British retailing relative to North America, or the presence of formidable environmental barriers to the industrialisation of retailing in Britain. New Perspectives on 20th Century European Retailing showcases new research on various aspects of twentieth century European retailing, that challenges the traditional view that Europe was a follower of America in retail innovation. It brings together work by several - mainly early career - scholars, who are doing innovative, archival-based, research on various aspects of European retail history. Following a general review of European retailing by the editors (discussing key debates and new approaches) seven thematic chapters present work that either sheds new light on old debates and/or explores hitherto neglected topics. Collectively, they show that whereas retailers are often regarded as 'intermediaries', in fact they are actors in their own right and they challenge the traditional view that Europe was a follower of America in retail innovation. The chapters in this book were originally published as a special issue of the *Business History* journal.

The Retail Directory ,2006

High Street David Rudlin, Vicky Payne, Lucy Montague, 2023-07-07 The high street is in crisis. How did we get here and what happens next? The global pandemic has made the crisis immeasurably worse but it wasn't the cause. The crisis was already raging in 2019 with thousands of store closures. Large retailers became complacent and failed to respond to changing consumer behaviour. Town centres are the victims of these changes rather than the cause of them. To understand the current crisis and how it might be addressed, this book takes a long view of retailing based on a hundred case studies. It looks at the way town centres responded to previous crises and explores current trends affecting town centres and how places are responding. The message is optimistic: adaptable town centres can once more become the diverse, characterful, independent places that existed before they were homogenised by big retail. Explore the past - understand the present - find a better future.
