Joacim Rocklöv

GPU Gems 2 Matt Pharr,Randima Fernando,2005 More useful techniques, tips, and tricks for harnessing the power of the new generation of powerful GPUs.

The Protest Box Gerry Badger,2010 Martin Parr's The protest box is a box set which brings together five photobooks as facsimile reprints. Parr has selected diverse books which each deal with the subject of protest in quite different ways. From the documentation of various protest movements to the actual book being a form of protest, all these reprints are gems within the history of photographic publishing. The box set is accompanied by a booklet which includes an introduction by Martin Parr, an essay discussing the wider context of these books by Gerry Badger, and English translations of all the texts in the books.

Handbook of Research on Collaborative Learning Using Concept Mapping Lupion Torres, Patricia,de C ssia Veiga Marriott, Rita,2009-07-31 This new encyclopedia discusses the extraordinary importance of internet technologies, with a particular focus on the Web.

Genome Mapping and Genomics in Animal-Associated Microbes Vishvanath Nene,Chittaranjan Kole,2008-11-24 Achievements and progress in genome mapping and the genomics of microbes supersede by far those for higher plants and animals, in part due to their enormous economic implication but also smaller genome size. In the post-genomic era, whole genome sequences of animal-associated microbes are providing clues to depicting the genetic basis of the complex host-pathogen relationships and the evolution of parasitism; and to improving methods of controlling pathogens. This volume focuses on a globally important group of intracellular prokaryotic pathogens which affect livestock animals. These include Brucella, Mycobacterium, Anaplasma and Ehrlichia, as well as the protozoan pathogens Cryptosporidium and Theileria, for which genome sequence data is available. Insights from comparative genomics of the microbes described provide clues to the adaptation involved in host-microbe interactions, as well as resources potentially useful for application in future research and product development.

Productivity of the Ocean W. H. Berger,1989-08-08 Presents the proceedings of a Dahlem workshop held in Berlin, April 1988. Considers ocean mechanisms affecting the amount of atmospheric CO₂ over thousands of years, especially fluctuating ocean productivity. Assesses the state-of-knowledge of the processes that lead to the export of organic matter from the ocean's photic zone, its transit to the sea floor, and its burial within the sediment. Also considers how to model atmospheric fluctuations of CO₂ on medium to long time scales. Reveals how ocean productivity changes through time and how it can be reconstructed from the biogenous signals in the sediments. Illustrated.

GPU Pro 360 Guide to Lighting Wolfgang Engel,2018-12-20 This book gathers all the content from the GPU Pro series (Vols 1-7; 2010-2016) into a convenient single source anthology covering 3D engine design in computer graphics. It covers ready-to-use ideas and procedures that can help solve many computer graphics programming challenges. The articles by leading programmers contained in this volume focus on engine-level optimization techniques useful for modern games.

Publishers, Distributors, & Wholesalers of the United States ,1992

Global Trends 2040 National Intelligence Council,2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. - *Global Trends 2040 (2021)* *Global Trends 2040-A More Contested World (2021)*, released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Learn OpenGL Joey de Vries,2020-06-17 Learn OpenGL will teach you the basics, the intermediate, and tons of advanced knowledge, using modern (core-profile) OpenGL. The aim of this book is to show you all there is to modern OpenGL in an easy-to-understand fashion, with clear examples and step-by-step instructions, while also providing a useful reference for later studies.

Social Science Research Anol Bhattacharjee,2012-04-01 This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

Proceedings of the National Academy of Sciences of the United States of America National Academy of Sciences (U.S.),1990 The Proceedings of the National Academy of Sciences (PNAS) publishes research reports, commentaries, reviews, colloquium papers, and actions of the Academy. PNAS is a multidisciplinary journal that covers the biological, physical, and social sciences.

Computer Graphics Programming in OpenGL with C++ V. Scott Gordon,John L. Clevenger,2020-12-09 This new edition provides step-by-step instruction on modern 3D graphics shader programming in OpenGL with C++, along with its theoretical foundations. It is appropriate both for computer science graphics courses and for professionals interested in mastering 3D graphics skills. It has been designed in a 4-color, "teach-yourself" format with numerous examples that the reader can run just as presented. Every shader stage is explored, from the basics of modeling, textures, lighting, shadows, etc., through advanced techniques such as tessellation, normal mapping, noise maps, as well as new chapters on simulating water, stereoscopy, and ray tracing. FEATURES: Covers modern OpenGL 4.0+ shader programming in C++, with instructions for both PC/Windows and Macintosh Adds new chapters on simulating water, stereoscopy, and ray tracing Includes companion files with code, object models, figures, and more (also available for downloading by writing to the publisher) Illustrates every technique with running code examples. Everything needed to install the libraries, and complete source code for each example Includes step-by-step instruction for using each GLSL programmable pipeline stage (vertex, tessellation, geometry, and fragment) Explores practical examples for modeling, lighting, and shadows (including soft shadows), terrain, water, and 3D materials such as wood and marble Explains how to optimize code for tools such as Nvidia's Nsight debugger. The companion files and instructor resources are available online by emailing the publisher with proof of purchase at info@merclearning.com.

Acronyms Abbreviations & Terms - A Capability Assurance Job Aid ,2005 The FAAT List is not designed to be an authoritative source, merely a handy reference. Inclusion recognizes terminology existence, not legitimacy. Entries known to be obsolete are included because they may still appear in extant publications and correspondence.

Handbook of Macroeconomics John B. Taylor,Harald Uhlig,2016-12-01 Handbook of Macroeconomics surveys all major

advances in macroeconomic scholarship since the publication of Volume 1 (1999), carefully distinguishing between empirical, theoretical, methodological, and policy issues. It courageously examines why existing models failed during the financial crisis, and also addresses well-deserved criticism head on. With contributions from the world's chief macroeconomists, its reevaluation of macroeconomic scholarship and speculation on its future constitute an investment worth making. Serves a double role as a textbook for macroeconomics courses and as a gateway for students to the latest research Acts as a one-of-a-kind resource as no major collections of macroeconomic essays have been published in the last decade

Frank Films Brigitta Burger-Utzer,Stefan Grissemann,2009 Robert Frank turned to filmmaking at the end of the 1950s. Although he has made 27 films, the work is largely a wellkept secret. Frank approaches each film project as a new experience, challenging the medium and its possibilities at every turn. He has amalgamated documentary, fiction, and autobiography, cutting across genres. This book offers a visually unique approach to Frank's films: only new stills taken from videotapes have been used and they add up to a visual essay on Frank's cinema that establishes an engaging dialogue with his photographic work. Each film is introduced with detailed analysis, discussing the history and the aesthetics of Frank's film work. An interview with Allen Ginsberg provides an insider view. Together the texts and images offer an innovative and in-depth approach to the oeuvre of one of the greatest and most restless artists of the 20th century. Robert Frank was born in Zurich, Switzerland in 1924 and went to the United States in 1947. He is best known for his seminal book *The Americans* (1958), which gave rise to a distinct new art form in the photo-book, and his experimental film *Pull My Daisy* (1959) both reproduced by Steidl within *The Robert Frank Project*.
