Pervasive and Mobile Sensing and Computing for Healthcare Subhas Mukhopadhyay, Octavian A. Postolache, 2012-09-14 The pervasive healthcare system focus towards achieving two specific goals: the availability of eHealth applications and medical information anywhere and anytime and the invisibility of computing. This book aims at promoting the discussion on current trends in technologies and concepts that help integrate health monitoring and healthcare more seamlessly to our everyday lives, regardless of space and time, but also present cutting edge perspectives and visions to highlight future development. The book presents not only the state of the art technologies and solutions to tackle the critical challenges faced by the building and development of the pervasive health system but also potential impact on society at social, medical and technological level.

Mega Brain Michael Hutchinson, 1996-09 Scientists have learned more about the brain in the last decade than in all of previous history, and the implications of the latest research are clear: The human brain is far more powerful, and has the potential for immensely greater growth and transformation, than was ever before imagined. These discoveries may constitute the most significant development in learning since the invention of writing. Michael Hutchison captures all the drama, excitement, and adventure as we finally begin to comprehend the most mysterious and complex structure in the universe, the source of human culture, a still untapped reservoir of power and skills. He looks at the recently developed machines and devices that may soon allow us to increase brain size and intelligence; regenerate brain cells; trigger specific brain states such as euphoria, long- and short-term memory, sexual excitement, and creativity; and control the brain's electrical activity in order to alter such involuntary mechanisms as blood pressure, heart rate, and the secretion of hormones. Megabrain is a lucid and lively account of where the pioneers in brain research are headed -- and where they are taking us.

Rave Culture and Religion Graham St John, 2004-06-01 The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and Nevada's Burning Man festival. Contributors examine raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. Rave Culture and Religion will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies.

What if you could forget about ever needing sick leave? Wouldn't you like to be the Energizer Bunny in your own life, every day? Bulletproof Health and Fitness is a book for average people who can't suddenly switch to an extreme diet - or don't want to - and can't sweat in the gym for 20 hours per week. Michal Stawicki can do 150+ pushups and 40+ pullups; he hasn't been off work sick since July 2013. And, like any ordinary man, he also has a life to live: a day job, wife and kids, church obligations, a daily 3-4 hour commute and random disasters (a broken furnace, flat tire, delayed trains, children's illnesses...) In Bulletproof Health and Fitness, he shares his down-to-earth approach for losing weight, getting and staying fit, and keeping his health optimal. And he shares how you too can unlock a force of incredible energy; the energy you need so badly to face life's everyday challenges. In this book you will learn: Why getting your body into prime condition is your first step to success The single rule which determines whether any workout or diet will be a success The biggest mistake people make when trying to get back in shape Why targeted habitual actions are the perfect way average people can regain and keep their health The only four elements you must look after to maintain your stamina Why you can eat whatever you want and stay fit The three things necessary for getting good sleep How even fasting for 120 hours won't kill you. How can you exercise less than 15 minutes a day and be able to do 100 consecutive pushups Why cardio is usually a waste of time (and how it can become time well invested) Buy this book NOW and regardless of life's challenges, you'll soon enjoy new-found health and fitness.

Vaster Than Sky. Greater Than Space Mooji, 2018-07-05 In ever-growing gatherings worldwide, the revered teacher Mooji has

opened the eyes of thousands through his rare ability to shine light on the ineffable with uncommon clarity, humour and warmth. Now, in Vaster Than Sky, Greater Than Space, Mooji invites and inspires readers everywhere to discover the true essence from which we all arise. Throughout the book he addresses various questions that come up for seekers, such as: How do I find peace, joy, love and happiness? Is it really possible for an ordinary person with a job and family to attain enlightenment? Are intimate relationships a help or a hindrance to awakening? I don't believe in God, and I don't consider myself a devotional type of person, but the word Truth resonates with me - are your teachings relevant to me? You use the phrase 'timeless presence'. What does it mean? How can anything be timeless? How does one transcend personal conditioning and suppressed emotions, and so come to lasting freedom? If we are essentially free, why does it seem so difficult and distant, so remote or rare to realise the Truth? Through our own earnest search for truth, Mooji helps us arrive at the answers, not by offering concepts but by leading us back to our hidden yet inherent knowing.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Being No One Thomas Metzinger,2004-08-20 According to Thomas Metzinger, no such things as selves exist in the world: nobody ever had or was a self. All that exists are phenomenal selves, as they appear in conscious experience. The phenomenal self, however, is not a thing but an ongoing process; it is the content of a transparent self-model. In Being No One, Metzinger, a German philosopher, draws strongly on neuroscientific research to present a representationalist and functional analysis of what a consciously experienced first-person perspective actually is. Building a bridge between the humanities and the empirical sciences of the mind, he develops new conceptual toolkits and metaphors; uses case studies of unusual states of mind such as agnosia, neglect, blindsight, and hallucinations; and offers new sets of multilevel constraints for the concept of consciousness. Metzinger's central question is: How exactly does strong, consciously experienced subjectivity emerge out of objective events in the natural world? His epistemic goal is to determine whether conscious experience, in particular the experience of being someone that results from the emergence of a phenomenal self, can be analyzed on subpersonal levels of description. He also asks if and how our Cartesian intuitions that subjective experiences as such can never be reductively explained are themselves ultimately rooted in the deeper representational structure of our conscious minds.
