Olympic Education Roland Naul, Deanna Binder, Antonin

Rychtecky, Ian Culpan, 2017-02-17 A fundamental component of the Olympic ideal is the concept of Olympic education. This is the notion that sport can help children and young people develop essential life skills. Olympic Education: An international review is the first book to offer a comprehensive survey of the diffusion and implementation of Olympic education programmes around the world. The book includes 28 chapters with 21 national case studies of countries on every major continent, including Australia, Brasil, Canada, China, France, Germany, Japan, Russia, Spain, the UK, the US and Zambia. Each chapter examines the cultural, pedagogical, political and societal challenges of teaching Olympic education, as well as the national, individual and institutional programmes that have emerged. It explores key practical and conceptual issues, such as the incorporation of Olympic values in PE curricula, sport coaching and coach education programmes, while also taking into account the collaborative efforts of the governmental bodies, sport federations and Olympic institutions responsible for policy and implementation. This is important reading for all students, researchers and professionals with an interest in the Olympics, sport education, sports coaching, sport policy or physical education.

Public Security in Federal Polities Christian Leuprecht, Mario

Kölling, Todd Hataley, 2019-02-07 Public Security in Federal Polities is the first systematic and methodical study to bring together the fields of security studies and comparative federalism. The volume explores the symbiotic relationship between public security concerns and institutional design, public administration, and public policy across nine federal country case studies: Brazil, Canada, Germany, India, Mexico, South Africa, Spain, Switzerland, and the United States. In

addressing specific national security concerns and aspects of globalization that are challenging conventional approaches to global, international, regional, and domestic security, this volume examines how the constitutional and institutional framework of a society affects the effectiveness and efficiency of public security arrangements. *Public Security in Federal Polities* identifies differences and similarities, highlights best practices, and draws out lessons for both particular federations, and for federal systems in general. This book is essential reading for scholars, students, practitioners as well as policy- and decision-makers of security and federalism.

Can Green Sustain Growth? John Zysman, Mark Huberty, 2013-11-27 Green growth has proven to be politically popular, but economically elusive. *Can Green Sustain Growth?* asks how we can move from theoretical support to implementation, and argues that this leap will require radical experimentation. But systemic change is costly, and a sweeping shift cannot be accomplished without political support, not to mention large-scale cooperation between business and government. Insightful and timely, this book brings together eight original, international case studies to consider what we can learn from the implementation of green growth strategies to date. This analysis reveals that coalitions for green experimentation emerge and survive when they link climate solutions to specific problems with near-term benefits that appeal to both environmental and industrial interests. Based on these findings, the volume delivers concrete policy recommendations for the next steps in the necessary shift toward sustainable prosperity.

Herbicides Andrew Price, Jessica Kelton, 2013-06-12 Herbicide use is a common component of many weed management strategies in both agricultural and non-crop settings. However, herbicide use practices

and recommendations are continuously updated and revised to provide control of ever-changing weed compositions and to preserve efficacy of current weed control options. *Herbicides - Current Research and Case Studies in Use* provides information about current trends in herbicide use and weed control in different land and aquatic settings as well as case studies in particular weed control situations.

Research Anthology on Medical Informatics in Breast and Cervical Cancer Management Association, Information Resources, 2022-07-01
Cancer research is currently a vital field of study as it affects a wide range of the population either directly or indirectly. Breast and cervical cancer are two prevalent types that pose a threat to women's health and wellness. Due to this, further research on the importance of medical informatics within this field is necessary to ensure patients receive the best possible attention and care. The *Research Anthology on Medical Informatics in Breast and Cervical Cancer* provides current research and information on how medical informatics are utilized within the field of breast and cervical cancer and considers the best practices and challenges of its implementation. Covering key topics such as women's health, wellness, oncology, and patient care, this major reference work is ideal for medical professionals, nurses, oncologists, policymakers, researchers, academicians, scholars, practitioners, instructors, and students.

Brazil's Ethanol Industry: Looking Forward ,

Brazil's Economy Werner Baer, Jerry Dávila, André de Melo Modenesi, Maria da Graça Derengowski Fonseca, Jaques Kerstenetzky, 2017-08-09 The past century has witnessed profound

transitions in Brazil's economy: from a surge of industrialization connected to export economy, to state projects of importsubstitution industrialization, followed by a process of neoliberal global market integration. How have Brazilian entrepreneurs and businesses navigated these contexts? This comprehensive text explores the institutional and sectoral structure of the Brazilian economy through a collection of new case studies, examining how key institutions work within Brazil's specific economic, political and cultural context. Offering a long-term evolutionary perspective, the book explores Brazil's economic past in order to offer insights on its present and future trajectory. The contributions gathered here offer fresh insights into representative sectors of Brazil's economy, from aerospace to software, television, music and banking, paying particular attention to sectors that are likely to drive future growth. Chapters include questions about the roles of foreign and state capital, changes in market regulation, the emergence of new technologies, the opening of markets, institutional and organizational frameworks, and changing management paradigms. When examined together, the contributions shed light not only on Brazilian business history, but also on the country as a whole. *Brazil's Economy: An Institutional and Sectoral Approach* offers fascinating reading for anyone with an interest in: Latin American Economics; the business history of the region; and in doing business in present-day Latin America.

The Brazilian Economy Today Anthony Pereira,Lauro Mattei,Amanda LeCouteur,2016-01-26 Pereira and Mattei bring contributors together in this exciting volume to further understanding about the recent Brazilian Economic Development Model and discuss the related social conditions. The authors analyze both the political economy and social public policies to highlight new

opportunities to create a sustainable development model.

Emerging Economies and Challenges to Sustainability Arve Hansen, Ulrikke Wethal, 2014-10-10 The rise of emerging economies represents a challenge to traditional global power balances and raises the question of how we can combine sustainability with continued economic growth. Understanding this global shift and its impact on the environment is the paramount contemporary challenge for development-oriented researchers and policy makers alike. This book breaks new ground by combining scholarship on the role of emerging economies with research on sustainable development. The book investigates how the development strategies of emerging economies challenge traditional development theory and sustainability discourses. With regional introductions and original case studies from South Asia, East Asia, Latin America and Sub-Saharan Africa, it discusses how to conceptualise sustainable development in the global race for economic prosperity. What characterises the development strategies of emerging economies, and what challenges are these posing for global sustainable development? How can emerging economies shed light on the global challenges, dilemmas and paradoxes of the relationship between socio-economic improvements and environmental degradation? This book will be a valuable resource for researchers and postgraduates in development studies, geography, economics and environmental studies.

Armed Conflict and Human Rights Law Daniel Ivo Odon, 2021-07-29 This book explores developments in international law regarding the relationship between human rights law and international humanitarian law and their coapplicability in armed conflict situations. The work examines the jurisprudence of the international human rights courts and looks at the Inter-American and

European Courts of Human Rights case law in dealing with new emergencies in armed conflicts. It argues that a new interpretation and application of the law is required to deal with current needs while remaining faithful to moral commitments made in the international arena. In this way, the book deals with recent cases and their rationale to build a new understanding of law and international policy that complies with the globalization process and progress towards an enhancement of the international community's legal framework. Combining the emergencies in armed conflicts with the mutual enforcement of human rights law and humanitarian law, this book holistically develops concepts and theories to present a pragmatic solution to moral quandaries over the targeting of civilians during armed conflict situations. The book will be a valuable resource for academics, researchers and policy-makers in the areas of international human rights and international humanitarian law.

Urban Environment Sébastien Rauch, Gregory Morrison, Stefan Norra, Nina Schleicher, 2013-12-09 Over half of the global population now lives in cities. This ongoing urbanisation is making it increasingly important to adequately manage urban systems and preserve urban environments. This book is the outcome of the 11th Urban Environment Symposium (UES) held on 16-19 September 2012 in Karlsruhe, Germany. The UES aims at providing a forum on the sciences and practices needed to promote a sustainable future in urban environments. Papers by leading experts are presented in sections on Urban Management and Spatial Planning, Green Cities and Urban Ecosystems, Urban Planning and Development, Air Quality and Noise, Urban Climate Change and Adaptation, and Contamination of Urban Waters and its Effects.

Climate Change and Cities Cynthia Rosenzweig, William D.

Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

Mining in Ecologically Sensitive Landscapes Mark

Tibbett, 2015-08-05 Mining in Ecologically Sensitive Landscapes explores the interface between geology and botany, and mining and conservation. Many areas of unusual geology that contain ore-bearing bodies also support unique ecological communities of plants and animals. Increasing demand to exploit rich mineral deposits can lead to a conflict between mining and conservation interests in such landscapes. This book brings together experts in the field of mining and conservation to grapple with this pressing issue and to work toward a positive outcome for all. Chapters are grouped into four themes: Introduction, Concepts and Challenges; Endemism in Ironstone Geosystems; Progress in Bauxite Mining; and Ways

Forward. The book focuses on natural and semi-natural ecosystems, where landscape beauty, biodiversity and conservation value are at their highest measure and the mineral wealth they contain can bring affluence of regional or even national importance. Examples of conflicts ranging from threatened floristic endemics to human ecology are included, from Africa, the Americas and Australasia. Mining in Ecologically Sensitive Landscapes is an important reference for environmental managers, NGOs, restoration ecologists, academics, undergraduate and postgraduate students of ecology and environmental studies, conservation biologists, as well as mine managers, mining environmental specialists, consultants, regulators and relevant government departments.

The Brazilian Arbitration Act André Abbud, Daniel Levy, Rafael Francisco Alves, 2019-11-13 Brazil has risen to extraordinary prominence as an arbitration seat, and Brazilian law in matters of domestic and international arbitration has been watched all over the world due to its arbitration-friendly legislation and cutting-edge case law. This is the first book to fully recognize and elucidate this phenomenon with a detailed article-by-article examination, in English, of decisions of the Brazilian Supreme Court (STF) and the Brazilian Superior Court of Justice (STJ) on each of the Brazilian Arbitration Act's (BAA) provisions. More than two hundred judicial decisions are directly quoted. In-depth annotation of the text of each article includes the following: a short descriptive summary of how the article is interpreted by case law and doctrine; a thorough report of decisions of the Brazilian superior courts since the 1996 enactment of the BAA referring to that article, presenting not only the majority view but also dissenting opinions; and a list of authorities interpreting each article and its relevant case law. All decisions that could

represent current case law on arbitration are considered. Nearly half of the quoted decisions have direct impact on international arbitration, and many deal with enforcement of arbitral awards. Therefore, the book will attract not only Brazilian practitioners but will be particularly useful to international counsel and arbitrators dealing with Brazilian parties or cases with a Brazilian element. The only book of its kind, it will prove indispensable for arbitration scholars and law libraries. "By providing a careful and comprehensive compilation of Brazilian case law on arbitration, with a particular focus on the Superior Court of Justice's leading precedents, this volume makes a valuable contribution to the continued development of arbitration in Brazil and elsewhere. While it will no doubt be of great use to the Brazilian bar, it is a particularly useful reference for the non-Brazilian practitioner and scholar, who do not have ready access to Brazilian court decisions or, in many cases, even knowledge of the Portuguese language". From the foreword by Donald Francis Donovan
