The Zombie Proof Fence Tony Thomas,2017-03-17 A Sydney man working late at night watches news stories detailing uncontrolled violence around the globe. He panics and rushes out to buy supplies. Later, his fears seem justified as news of a pandemic causing the violence is broadcast. Can he stay safe and protected within his own home? A group of Australian business people in Singapore return to their hotel to find news of the global pandemic. All flights are cancelled. How can they protect themselves? Can they get back to Australia? A young family decides to make a run for it from Sydney to a small town on the far South Coast. Can they get out of Sydney before its too late? Even if they do, will they be able to travel further? An American businessman on a flight to Sydney learns of the pandemic as the flight lands. His teenage son is home alone in Minnesota. He is caught up in quarantine detention. How can he keep his son safe and protect himself? As the day progresses, stories and rumors abound. What is the truth? Can the politicians and media be trusted, or are they lying to protect themselves? Most horrifying of all, is this really a zombie apocalypse? The *Zombie Proof Fence* tells of the accelerated collapse of the world as we know it. It is told from an Australian perspective, where the idea of fencing off problems has been a reality for dingoes and rabbits and can now be applied to people. It shows the confusion as governments and mass media are willing to ruthlessly hide the truth and the inevitability that all will be revealed with the help of social media.

SAM Jonathan Waldman,2021-01-26 A true story of innovation that “reads like a movie” (Seth Godin), centered on a scrappy team of engineers—far from the Silicon Valley limelight—and their quest to revolutionize the traditional trade of masonry by building a robot that can lay bricks. Humans have landed men on the moon, programmed cars to drive themselves, and put the knowledge of our entire civilization in your back pocket. But no one—from MIT nerds to Army Corps engineers—has ever built a robot that can lay bricks as well as a mason. Unlike the controlled conditions of a factory line, where robots are now ubiquitous, no two construction sites are alike, and a day’s work involves countless variables—bricks that range in size and quality, temperamental mortar mixes, uneven terrain, fickle weather, and moody foremen. Twenty-five years ago, on a challenging construction job in Syracuse, architect Nate Podkaminer had a vision of a future full of efficient, automated machines that freed bricklayers from the repetitive, toilsome burden of lifting, in bricks, the equivalent of a Ford truck every few days. Offhandedly, he mentioned the idea to his daughter’s boyfriend, and after some inspired scheming, the architect and engineer—soon to be in-laws—cofounded a humble start-up called Construction Robotics. Working out of a small trailer, they recruited a boldly unconventional team of engineers to build the Semi-Automated Mason: SAM. In classic American tradition, a small, unlikely, and eccentric family-run start-up sought to reimagine the behemoth \$1 trillion construction industry—the second biggest industry in America—in bootstrap fashion. In the tradition of Tracy Kidder’s *The Soul of a New Machine*, SAM unfolds as an engineering drama, full of trials and setbacks, heated showdowns between meticulous scientists and brash bricklayers (and their even more opinionated union), and hard-earned milestone achievements. Jonathan Waldman, acclaimed author of *Rust*, masterfully “reveals a world that surrounds us but mostly eludes our notice” (The Boston Globe).

Brick City George Stanley,2015-07-10 In the late 1960s, the New Jersey projects stood like tattered, tired sentinels across the Newark skyline. Some saw them as eyesores; others called them home. Despite the comfort of familiarity, it certainly wasn’t easy being poor and black in the projects in 1962. It’s a good thing four young boys had each other. Diesel, Bugs, Loony, and Larry are barely teenagers when they meet and become inseparable, bonded by poverty and race. They come of age in an environment they don’t even realize is hostile. Summers are spent on adventures—sometimes legal, sometimes not, and many times not safe. These wild days and nights keep the boys together. But the projects aren’t all friends and fun. The boys deal with abuse, rough cops, and romantic connections that don’t end well. They grow into men in this place affectionately known as “brick city,” yet they don’t leave unscathed. For better or worse, the projects turn these boys into men, but not everyone gets out alive.
