Drunk-ish Stefanie Wilder-Taylor, 2024-01-16 From the author of *Sippy Cups Are Not for Chardonnay*, a hilariously candid and refreshingly honest account of Stefanie Wilder-Taylor's journey to breaking up with alcohol for good. When Stefanie Wilder-Taylor became a mother, being able to connect with other moms over drinks or enjoy a glass of wine at the end of a stressful day felt life-affirming. From liquor cabinet concoctions in high school to tequila shots in her early stand-up comedy days to grocery store wine in young motherhood, alcohol was the seasoning that could give almost any activity more flavor. A drink instantly took the edge off and made even the most difficult adversary (be it a tough crowd in a comedy club or a judgmental PTA mom) not just bearable but fun. As the years go by, Stefanie wonders if her relationship with alcohol is different from other people's. Is everyone else struggling this hard to moderate? Is it even legal to watch *The Bachelor* without a glass of white wine? Having spent a lifetime grappling with the question of whether or not she is a "real" alcoholic, one evening brings Stefanie close to the edge of losing it all. Miraculously unscathed, she decides that she doesn't need to dive all the way down to a stereotypical rock bottom before deciding to stop drinking; if sobriety will improve her life, that's a good enough reason to quit. Stefanie's memoir is a tender and funny farewell letter to a beloved but toxic friend.

Next he travels to Arica Chile where there have been fourteen consecutive years without a drop of rain and so fog is people's only source of water. Going from the driest to the wettest, he visits Mawsynram in India which annually competes for the title with its neighbour Cherrapunji. However, Nick discovers even here, that during the dry season, there is water shortage and one entrepreneur has started selling it bottled. Finally his journey takes him to Dalol in Ethiopia known as the 'hell hole of creation' where the temperature remains at 94 degrees year round. Here Nick will join miners who work all day with no shade, limited water and no protective clothing. The book and series consider how and why people lives in these harsh environments. How does Nick's body react to these contrasting extremes? He looks at the geographical and meteorological conditions. He meets local characters and discovers the history of these settlements to find out how they ever became populated. He looks at the way both the population, and the flora and fauna, have adapted physically to the climate, and also considers the psychological impact of living under such conditions.
