*British Airways Annual Report and Accounts* British Airways,1972

Airline Arthur Reed,1990 While touching on the company's role in the early days of aviation, Airline is largely concerned with recent history - with the merger between BEA and BOAC, the move in 1987 from the public to the private sector and the coming together of BA and British Caledonia.

**The History of British European Airways** Charles Woodley,2006-01-01 BEA was formed in 1946 and took over most UK domestic and European routes under the British government's nationalisation policy. It began operations with a fleet of outdated and hopelessly uneconomic passenger aircraft that were derivatives of wartime types such as the DC-3, Avro Viking and Rapide. By the end of 1955 the airline had re-equipped with more modern types such as the jet-prop Viscount and moved into a profit for the first time. From 1960 onwards the airline introduced larger jets such as the Comet, Trident and BAC 1-11. BEA merged with the British Overseas Airways Corporation in 1974 to form British Airways. This book looks at BEA's predecessors, its formation and early operation from Croydon and Northolt and the move to the newly-opened London Heathrow. The evolving structure is explained with chapters covering engineering bases, terminals, European and domestic services, cargo services and helicopter operations. The aircraft flown are all

described in detail and the book includes anecdotes from former crew and ground-staff, a full fleet list and is highly illustrated throughout.

In the course of an onward globalisation and with an increasing stress of competition, it becomes more and more difficult for entrepreneurs to keep or to improve their market position. For this account, strategic planning comes into the main focus to choose the best strategy for a business. However, every business man knows that there are always chances and risks in economic life. For this reason, risks cannot be eliminated, but they can be managed. Especially in the airline industry, the competition is on a very high level. Since 2001 more and more low cost carriers have been competing with the big well known national airline companies like Lufthansa or British Airways. That's why a well thought out strategic management, strategic planning and of course risk management are essential to overcome the stress of competition. This report will analyse why risk management is so important in strategic planning. By evaluating different models and techniques, the best method to analyse the internal and external environment will be elaborated. **Gone but Not Forgotten** Alan Phillips, 2017-09-16 The British airliners we see today in our airports are the result of numerous takeovers and mergers, involving large and small companies. This book covers some of these airlines that have ceased operating since 1946: some collapsed because of financial difficulties, some were taken over by larger airlines, and some ceased operating

altogether. In post-war Britain, several small airlines were founded and equipped with surplus military aircraft, the most popular being the Douglas Dakota. The book is a guide to each airline, accompanied by a brief historical account, and interesting images of the aircraft in their distinctive colour schemes. The airlines covered are a selection of large and small aircraft, who flew international and regional routes, as well as airlines involved in inclusive tours business.

AIR CRASH INVESTIGATIONS EYE OF THE NEEDLE The Crash of British Airways Flight 38  
Hans Griffioen, editor, 2012-11-01 On 28 November 2008, a Boeing 777-200ER, operated by British Airways as flight BA38, on its way from Beijing, China to London (Heathrow), suffered on approach to Heathrow Airport an in-flight engine rollback. At 720 feet agl, the right engine ceased responding to autothrottle commands for increased power and instead the power reduced to 1.03 Engine Pressure Ratio (EPR). Seven seconds later the left engine power reduced to 1.02 EPR. This reduction led to a loss of airspeed and the aircraft touching down some 330 m short of the paved surface of Runway 27L at London Heathrow. The investigation identified that the reduction in thrust was due to restricted fuel flow to both engines. It was determined that the restriction occurred most probably in the Fuel Oil Heat Exchangers. The investigation identified the forming of ice in the fuel system as probable cause. The aircraft was destroyed, but there were no casualties.

**Imperial Airways and the First British Airlines, 1919-40** A. S. Jackson, 1995 Only the adventurous and the wealthy patronized the first companies to inaugurate air services to the continent in 1919. They flew in primitive converted military machines and could expect their flight or be interrupted by an unscheduled landing in a field when bad weather or an engine problem was encountered. The fledgeling airlines operated on the edge of bankruptcy because the government refused to offer finance. The French and German governments subsidised their own airlines to provide themselves with a military reserve.
