Teaching on a Shoestring Helen Lewis, Russell Grigg, 2018-09-14 In Teaching on a Shoestring: An A to Z of everyday objects to enthuse and engage children and extend learning in the early years, Russell Grigg and Helen Lewis explore the educational value of familiar objects and suggest practical activities to help develop young learners' cross-curricular skills. We take many everyday objects for granted. But in a time of ever-tightening school budgets these objects can be invaluable in affording low-cost, high-impact opportunities for learning. With these value-for-money principles in mind, Russell and Helen have packed this practical A to Z handbook to the brim with fun facts, inspiring ideas and exciting activities to help teachers make the best use of

familiar objects as launch pads for effective learning. Underpinned by solid theory, *Teaching on a Shoestring* investigates the learning potential of twenty-six inexpensive, readily available resources from apples to ice cubes to zebra-patterned fabric and shows how they can be exploited to develop in young learners the four skills widely regarded as essential in the twenty-first century: communication, collaboration, critical thinking and creativity. The book is organised into two parts: covering theory, then practice. In Part 1 the authors examine the nature of an object-rich learning environment and discuss the benefits of enquiry-based learning, in which the emphasis is upon promoting collaboration, dialogue and higher-order thinking in real-world contexts. In Part 2 the learning opportunities around the twenty-six objects are laid out in detail to illustrate how they can be put into practice. While the book focuses on object-based pedagogy employed with the under-sevens age category, many of the principles can also be applied with older children. There is a common format for the enquiry into each object, arranged into the following sections: In a nutshell key background information about the object in its broader context; Did you know? interesting facts about the object; Ready key vocabulary, resources and health and safety factors to consider; Steady learning goals and intentions; Go activities which show how teachers can develop the four skills of communication, collaboration, critical thinking and creativity around the object; Other ideas follow-up cross-curricular ideas; and Find out more websites and other references for further information. Suitable for early years educators and anyone who works with young children.

*A User's Guide to Democracy* Nick Capodice, Hannah McCarthy, 2020-09-08 From Nick Capodice & Hannah McCarthy, the hosts of New Hampshire Public Radio's Civics 101, and New Yorker cartoonist Tom Toro, *A User's Guide to Democracy* is a lively crash course in everything you should know about how the US government works. Do you know what the Secretary of Defense does all day? Are you sure you know the difference between the House and the Senate? Have you been pretending you know what Federalism is for the last 20 years? Don't worry--you're not alone. The American government and its processes can be dizzyingly complex and obscure. Until now. Within this book are the keys to knowing what you're talking about when you argue politics with the uncle you only see at Thanksgiving. It's the book that sits on your desk for quick reference when the nightly news boggles your mind. This approachable and informative guide gives you the lowdown on everything from the three branches of government, to what you can actually do to make your vote count, to how our founding documents affect our daily lives. Now is the time to finally understand who does what, how they do it, and the best way to get them to listen to you.

*Wild Mushrooms* Kristen Blizzard, Trent Blizzard, 2020-10-20 Whether you get your mushrooms from the supermarket or the forest floor, a worthy addition to your library. -Star Tribune Get ready to fall in love with wild mushrooms! *The Blue Machine: How the Ocean Works* Helen Czerski, 2023-10-03 A scientist's exploration of the ocean engine—the physics behind the ocean's systems—and why it matters. All of Earth's oceans, from the equator to the poles, are a single engine powered by sunlight, driving huge flows of energy,

water, life, and raw materials. In *The Blue Machine*, physicist and oceanographer Helen Czerski illustrates the mechanisms behind this defining feature of our planet, voyaging from the depths of the ocean floor to tropical coral reefs, estuaries that feed into shallow coastal seas, and Arctic ice floes. Through stories of history, culture, and animals, she explains how water temperature, salinity, gravity, and the movement of Earth's tectonic plates all interact in a complex dance, supporting life at the smallest scale—plankton—and the largest—giant sea turtles, whales, humankind. From the ancient Polynesians who navigated the Pacific by reading the waves, to permanent residents of the deep such as the Greenland shark that can live for hundreds of years, she introduces the messengers, passengers, and voyagers that rely on interlinked systems of vast currents, invisible ocean walls, and underwater waterfalls. Most important, however, Czerski reveals that while the ocean engine has sustained us for thousands of years, today it is faced with urgent threats. By understanding how the ocean works, and its essential role in our global system, we can learn how to protect our blue machine. Timely, elegant, and passionately argued, *The Blue Machine* presents a fresh perspective on what it means to be a citizen of an ocean planet.

*We Love Bubbles! (Bobo and Pup-Pup)* Vikram Madan, 2021-11-09 A hilarious book about best friends Bobo and Pup-Pup--a monkey and a dog with very different personalities. Perfect for fans of *Elephant & Piggie*! Did you ever have a friend who likes doing something that you find completely annoying? Well, Bobo and Pup-Pup both LOVE bubbles. Bubbles are the absolute best--on that they can agree! While Pup-Pup loves blowing them, Bobo LOVES popping them...way too much for Pup-Pup's taste. It's getting frustrating! Pup-Pup

has a clever idea to stop Bobo from popping them. But, then Bobo gets carried away...literally! This hilarious and relatable book will have kids as young as 2 years old on up to age 7 laughing out loud. New readers will gain confidence and want all the books in the series: Let's Make Cake!; The Funny Book!; and Hatch an Egg! Graphic chapter books serve as a great bridge to graphic novels and longer chapter books.

The Real Crash Peter D. Schiff, 2012-05-22 Bestselling financial author and economist Schiff warns of the inevitable bankruptcy facing America and lays out not only how the U.S. got here, but what our government can do about it.
