William Gurstelle

State Building in Boom Times Ryan Saylor, 2014-06-11 Governments that preside over a capable state apparatus can better uphold the rule of law, ensure democratic accountability, stimulate economic development, and provide good governance. In the developing world, countries differ substantially in their levels of state capacity and ability to achieve these ends, leaving scholars and concerned citizens alike wondering about the origins of such inequalities. In *State Building in Boom Times*, Ryan Saylor argues that commodity booms and coalitional politics are central to understanding variations in state building within and across Latin America and Africa. He shows how resource booms can trigger the provision of new public goods and institution building, thus helping countries expand their state capacity. But these possibilities hinge on coalitional politics, as he demonstrates through six cases. Countries ruled by export-oriented coalitions (Argentina, Chile, and Mauritius) expanded their state capacity as a direct result of commodity booms. Countries in which exporters were politically marginalized (Colombia, Ghana, and Nigeria) missed analogous state building opportunities because ruling coalitions preyed upon export wealth, rather than promoting export interests—which in turn undercut state building. The coalitional basis of these divergent outcomes suggests that, contrary to the prevailing belief in a resource curse, natural resource wealth does not doom countries to low state capacity. Instead, export-oriented coalitions can harness boom times for developmental gains, even in the context of weak institutions. Saylor's work encourages us to reexamine widespread assumptions about the relationship between resource wealth and state building, particularly the resource curse. *State Building in Boom Times* elucidates which public policies best serve developing countries trying to manage their natural resource wealth.

Clewer, 2022-06-06 Clewer explores the various ways the sublime is manifest in contemporary memorial architecture as well as its philosophical and political implications. She shows how the national monument is being transformed at a time when the nation-state and national identity are under extreme scrutiny.

Boom-boom: Adventures of a Boy Who Builds Big Things Matt McCaw, 2019-06-27 There are little boys who dream of big machines, and then there are little boys who build big machines. Boom-boom is one of those. Out of necessity, Boom-boom cobbles together a bicycle from odd parts he finds in the creepy yet wonderful old tool shed in his back yard. Friends then accompany him on a hectic, milk-out-your-nose funny ride on a homemade bobsled. Tension builds as Boom-boom's impressive and capable machines are put to the test helping to build houses for people who need them. With grit and creativity, Boom-boom solves one seemingly impossible mechanical problem after another and meets a host of entertaining friends in the process, finally learning that the best machines aren't mechanical at all. Full of humor, touching moments, crashes, and explosions, Boom-boom is sure to entertain young readers as well as not-so-young folks doing the reading.

Whoosh Boom Splat William Gurstelle, 2010-04-14 These are the homemade machines that you've dreamed of building, from the high-voltage Night Lighter 36 spud gun to the Jam Jar Jet, the Marshmallow Shooter, and the Yagua Blowgun. Including detailed diagrams and supply lists, Gurstelle's

simple, step-by-step instructions help workshop warriors at any skill level achieve impressively powerful results. With **Whoosh Boom Splat**, you can build: - The Jam Jar Jet—the simple pulse jet engine that roars - The Elastic Zip Cannon—a membrane-powered shooter that packs a wallop - The Mechanical Toe—a bungee-powered kicking machine - The Vortex Launcher—a projectile shooter that uses air bullets for ammunition - The Clothespin Snap Shooter—the PG-17 version of a clothespin gun that fires fiery projectiles - The Architrone—the steam-powered cannon conceived by Leonardo da Vinci And many more! In addition to learning how to make these cool gadgets, you'll find sections packed with information on what makes each machine unique. Gurstelle describes the machine's historical origins as only he can: with verve, fun, and the sort of quirky details his legions of fans love. **Whoosh Boom Splat** is a must-have for every extreme tinkerer.

Building from the Ground Up Kevin Erdmann, 2022-01-11 Remember when mania led to a massive housing bubble? When Americans found themselves saddled with too many houses and were hit with the reality that our economy had been built on unsustainable borrowing? Everyone knows about that, right? What if that was wrong? What if, when we get down to brass tacks, Americans have been struggling to build enough new housing—especially in places where housing is in high demand—and this was true, even in 2005? Viewing the economic calamities of the twenty-first century with this central insight turns the conventional wisdom about our economic challenges upside down. The need for more homes has been the core cause of American economic instability and stagnation. *Building from the Ground Up* will guide you to a sweeping new perspective about the Great Recession and the financial crisis, which points to a brighter path for America's economic potential.

From Boom to Bubble Rachel Weber, 2023-06-05 An unprecedented historical, sociological, and geographic look at how property markets change and fail—and how that affects cities. In *From Boom to Bubble*, Rachel Weber debunks the idea that booms occur only when cities are growing and innovating. Instead, she argues, even in cities experiencing employment and population decline, developers rush to erect new office towers and apartment buildings when they have financial incentives to do so. Focusing on the main causes of overbuilding during the early 2000s, Weber documents the case of Chicago's "Millennial Boom," showing that the Loop's expansion was a response to global and local pressures to produce new assets. An influx of cheap cash, made available through the use of complex financial instruments, helped transform what started as a boom grounded in modest occupant demand into a speculative bubble, where pricing and supply had only tenuous connections to the market. *From Boom to Bubble* is an innovative look at how property markets change and fail—and how that affects cities.

From Boom to Bubble Rachel Weber, 2015-11-20 How does a building boom happen? Who inflates a

real-estate bubble and why? What causes companies to move from seemingly usable office space into new quarters only blocks away? Rachel Weber digs into these questions and more in her detailed analysis of Chicago's downtown development during the Millennial Boom (1998-2008). Weber shows what happens when the real estate industry, financial markets, and public planning all operate at warp speed to build new structures and destroy older ones. She draws on years of interviews with real estate actors across the country, participant observation in a secretive sector, analyses of financial and development data, as well as the history of the appraisal, brokerage, and real estate finance professions. As a result, Weber's book is an unprecedented historical, sociological, and geographic look at how markets and urban change actually happen.
