**Soar!** T. D. Jakes, 2017-10-10 Take your career to the next level, realize your greatest dreams, and embrace your God-given talents with this practical game plan for your professional and personal life. Too often we remain in jobs that stifle our souls and leave us on the runway of opportunity with the engine of our deepest passion stalled, watching others make their personal vision a reality and build a legacy for their children. But it's never too late to get your dreams off the ground -- God sees great things in your future! If you long to amplify your unique abilities, if you strive to balance personal fulfillment and professional satisfaction, if you dream of fulfilling God's destiny for you, then you are ready to Soar! In *Soar!* T.D. Jakes reveals how to transform your own unique vision into a powerful contribution to the world. Blending a CEO's practical business acumen with a life coach's dynamic inspiration, *Soar!* will stir your imagination into action, challenge you to embrace your God-given purpose, and align your character and creativity with your career. Bridging both the corporate and nonprofit worlds, *Soar!* is a practical and easy-to-follow flight plan for launching the entrepreneurial drive inside of you. You'll learn how to adopt the mindset of people who don't wait to see what will happen but strategically build the wings that will take them to new heights. So buckle your seat belt and prepare for liftoff -- you have been cleared to fly beyond your fears, to absolutely soar!

Also included are three fun nature-inspired projects to make! Instilling the important message of conservation and deep respect for the natural world, this book lets kids see nature through the eyes of a magical fairy world!

**It's Your Ship** Captain D. Michael Abrashoff, 2007-10-15 The legendary New York Times bestselling tale of top-down change for anyone trying to navigate today's uncertain business seas. When Captain Abrashoff took over as commander of USS Benfold, it was like a business that had all the latest technology but only some of the productivity. Knowing that responsibility for improving performance rested with him, he realized he had to improve his own leadership skills before he could improve his ship. Within months, he created a crew of confident and inspired problem-solvers eager to take the initiative and responsibility for their actions. The slogan on board became *It's your ship*, and Benfold was soon recognized far and wide as a model of naval efficiency. How did Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including: See the ship through the eyes of the crew: By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value. Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the crew's performance. His crew eventually started calling him Megaphone Mike, since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test official aboard the ship and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought.

Building Material Estimates and Rates Build Up Moremi Mareka, 2009-05-29 The script is entitled *Building Estimates and Rates Build Up* .and aims at empowering Technical educators, Technical, Brigades and Community colleges students, Apprentices and individuals in the building profession with the necessary skill and knowledge. As an experienced professional in the building industry, quantity surveyor( building material estimator) and a former lecturer for technical colleges, I have realized that there is need to come up with a book that will help students, apprentices and individual

builders to easily understand the subject of estimating and rates build up to enable them to apply the skill whenever they have projects. Currently, individual builders, apprentices, and students find it difficult to correctly and accurately estimate the quantities of materials required for proposed projects. Pricing is also a difficult task for most of them as they do not have an idea of how to build up rates. Presently our brigades and technical colleges do not have a relevant book to deal with Estimates. Building Estimates and Rates build up provides a solution to such a problem. The book provides a solution in that it brings together pure mathematics and practical estimation, to avoid a situation whereby students end up failing to realize that the same formulas that are used in Mathematics (math) are applicable in the estimates. I strongly believe that the book will be able to even penetrate the international market.

Metal Transfer and Build-up in Friction and Cutting V. D. Kuznetsov, 2013-10-22 Metal Transfer and Build-up in Friction and Cutting aims to systematize our knowledge of the metal build-up, to describe some of the investigations past and present carried out in SFTI (Tomsk), and to make an effort to explain a number of the phenomena in cutting, scratching, and sliding from the point of view of metal transfer theory. The book opens with a chapter on the temperature of the rubbing interface of two solids. This temperature is needed in order to elucidate the nature of the formation of a build-up in scratching, cutting, and sliding. Separate chapters follow on the seizure phenomena, the role played by a built-up edge in scratching, the built-up edge in metal cutting, metal transfer in friction; the occurrence and nature of the build-up at various speeds, temperatures, and pressures; and the problem of friction between cast iron and steel.

*Build Up to Blast Off* Dr Prahlada Ramarao, 2016-06-22 The Indian journey to become a missile power was enabled by a team of dare devils at the Defence Research and Development Laboratory (DRDL). The book traces the origin and development of India's missile related infrastructure and missiles till 1982 until Dr. Abdul Kalam arrived at the scene. The fascinating story has been narrated by the pioneers themselves and edited by Dr. Prahalada. The chapters contain descriptions of key infrastructure, key people, key programs like India's first Anti-Tank Missile, the Devil program, the Valiant Program and genesis of the Integrated Guided Missile Development Programme - IGMDP. The pioneers also describe the management practices developed and implemented to manage the complex programmes at shoe string budgets. Dr Prahlada is popularly known for his role as the Project Director for Akash SAM missile system. He has also been Program Director for India's SLBM K15, supersonic cruise missile Brahmos and has led the Integrated Guided Missile Development Program (IGMDP) as the Chairman of the Program Board. As the Director of DRDL he has initiated many new projects like Astra air to air missile system, Long Range Surface to air missile system for naval application, JV Project Brahmos Supersonic cruise missile system and hypersonic technology demonstrator. Since 1971 he has served in various ISRO and DRDO Establishments covering VSSC Trivandrum, ADE Bangalore and DRDL Hyderabad. His areas of interest cover aerodynamics, flight controls, guidance, propulsion, system design and system engineering, Project Management, Research Management and Technology Management. He has been the President and Chairman of many organisations, Fellow of many professional bodies and has won a number of awards including Padma Shri.

**Build Up Your Chess 1** Artur Yusupov, 2008-09-01 Artur Yusupov's complete course of chess training stretches to nine volumes, guiding the reader towards a higher chess understanding using carefully selected positions and advice. To make sure that this new knowledge sticks, it is then tested by a selection of puzzles. The course is structured in three series with three levels. The Fundamentals level is the easiest one, Beyond the Basics is more challenging, and Mastery is quite difficult, even for stronger players. The various topics - Tactics, Strategy, Positional Play, Endgames, Calculating Variations, and Openings - are spread evenly across the nine volumes, giving readers the chance to improve every area as they work through the books. This book is the first volume at the Fundamentals level. The Build Up Your Chess series won the prestigious Boleslavsky Medal from FIDE

(the World Chess Federation) as the best instructional chess books in the world.

**Dangerous Flashpoints in East Asia: The Military Build-up** Saghir Iqbal, 2018-01-16 Major changes in East Asia have placed the region near the top of the World's strategic agenda. East Asia has until recently experienced the fastest regional economic growth rate in the world for many years. Economic co-operation has been flourishing and economic interests have become the major reason in reshaping East Asian international relations. However, there have also been changes in the security environment, due to many factors, such as the reduction of US forces in East Asia, the disintegration of the Soviet Union (the decline of the Soviet Union's presence in the region had led to renewed attention to traditional and potential rivalries among the major East Asian powers), and the concern of China's hegemonistic ambitions.

**The Build-up** William Carlos Williams, 1968 The Build-up, Volume 3 of the Stecher Trilogy, picks up the thread of White Mule and In the Money. Although all of the novels deal with the triumphant rise of an immigrant family in the early 1900s, The Build-up is more concerned with the overwhelming drive and ambition of Joe Stecher's wife, Gurlie. After years of hard work, careful planning (and his wife's badgering) Joe's printing business is providing his family with a comfortable income. As soon as her financial goal is realized, Gurlie focuses her attention on another area. Her phenomenal energy is soon earning her all unassailable position as a social leader in a small New Jersey suburb. Her achievement is not without its heartache, however. This story is told with all the gentle humor and exacting detail that mark Williams's prose works.

**Debt Build-up in Frontier Low-Income Developing Countries (LIDCs) since 2012: Global or Country-specific Factors and Way Forward?** Constance de Soyres, Anna Rogantini Picco, Miss Randa Sab, 2019-02-22 This paper focuses on the debt build-up that frontier low-income developing countries (LIDCs) have faced since 2012. First, it documents a 20-percentage point increase in the external and government debt-to-GDP ratios, a composition shift toward higher non-concessional debt, and a rise in interest rate payments. Second, using panel regressions, it shows that while both global and country-specific factors are correlated with debt-to-GDP ratios over 1998-2016, global factors dominate for the period 2012-16. Third, through a small open-economy model, it shows that the projected tightening in global financial conditions would reduce debt-to-GDP ratios by less than the increase associated with the expected rise in investment.

**Build an A-Team** Whitney Johnson, 2018-05-01 Lead each person on your team up the learning curve. What's the secret to having an engaged and productive team? It's having a plan for developing all employees--no matter where they are on their personal learning curves. Better morale and higher performance happen through learning, argues Whitney Johnson. In over twenty years of coaching, investing, and consulting, Johnson has seen that employees need continuous learning and fresh challenges to stay motivated. The best bosses know this, and they know how to make it happen by thoughtfully designing people's jobs around the skills they have today as well as the skills they'll need to be even more valuable tomorrow. That's how entire organizations stay competitive in an unpredictable, rapidly changing business environment. In this book, Johnson explains how to become one of those bosses and how to build your A-team by: Identifying what your employees already know and what they need to learn Designing their jobs to maximize engagement and learning Applying a seven-step process for leading each person up their learning curve We all want opportunities to learn, experiment, and grow in our jobs. When our bosses work with us to help us leap to new challenges, the result is a team that knows how to thrive, no matter what the future holds.

**Step Up** Michelle Gibbings, 2022-01-01 In today's fast-paced world, organisations and the people who work for them are going through rapid change. Most successful leaders are able to make the most of these dynamic environments. They understand themselves, understand others and understand how to manage and motivate behavioural change. It is through these core skills that they are able to prosper through change and gather the influence they need to be successful. These skills are relevant for everyone &– regardless of their role or hierarchical position. Michelle Gibbings wrote Step Up specifically for people who are more technically focused, but who are at a stage in their career where they know they need to change if they want to advance. They could be accountants, financial planners, risk management experts, financial controllers, engineers, scientists or even doctors. They are people who associate with their technical craft first, even though they may now be in a leadership role and are required to step up.
