Create Your Own Website The Easy Way Alannah Moore, 2016-06-02 Every small business or organisation needs a website, whether it is a simple online portfolio or a complex online shop. Expert web design teacher Alannah Moore makes this subject accessible for everyone, even those with no technical or design experience. Avoiding technical language, Alannah provides a summary of the web platforms available, covering, among others, WordPress, Squarespace, Weebly and Shopify. From these the reader can choose the right platform for them, and very quickly get up and running. Drawing on her vast experience of what a novice website builder really needs to know, Alannah covers all the topics they will come across in their online experience: how to choose a good domain name; what content you need for your site; how to work with images and even create your own logo. The reader will also learn how to integrate social media and a blog, so they are set up and in control of their virtual presence from every aspect. This is the perfect book for anyone who doesn't want to pay for an expensive web designer. In Alannah's safe and capable hands, they will find the

process of building their site easy and enjoyable, and they'll soon have a successful online presence.

The Small Business Website Checklist Nick Loper,2014-01-19 Why Your Business Needs a Website If you're doing business today - online OR offline - you need a website. It's that simple. Every day, Google completes more than 5 billion searches. Think some of those people, even just a tiny fraction, might be searching for what you sell? If you don't have a website, how will they ever find you? This book is about setting up your web presence the right way, or optimizing your existing website to reach more visitors. Ultimately it's about generating more traffic, more leads, and more sales and profit for your small business. Who is This Book For? This book is for small business owners who: -Have a website, but feel like it's not delivering the results it could. -Need a website, but aren't sure where to start or who to trust for advice. -Are confused and intimidated when dealing with technical problems or contracting with programmers. Have you been overpromised or oversold by web developers in the past? You're not alone. In fact, it happened to me. It seems like there's an entire industry out there trying to milk small business owners out of their hard-earned cash. But you don't need to be another victim. Armed with this checklist, you'll have a working knowledge of all the important elements of a truly awesome website; one that presents your brand to the world and helps achieve your goals online. After all, isn't that what it's all about? Why This List? There is no shortage of resources when it comes to getting started online. Some of these are genuinely helpful, and many of those will be mentioned in the pages ahead. But others just want to sell you some service you don't really need, or get you to sign up for a hosting package through their affiliate link so they can earn a commission. Do they really have your best interest in mind? Many only give you part of the story, or leave you with more questions than answers. What's missing is a comprehensive checklist for small businesses to use when evaluating their current website or when planning out their new site. That's where this book comes in. I'm a small business owner myself, and have been working online for nearly 10 years. In that time, I've come across too many amazing businesses with amazingly bad websites. Or worse, local businesses I wanted to find information on and patronize but that had no website at all. This checklist is my effort to help give small business owners the information they need to succeed online. From one entrepreneur to another, let's get started! What are you waiting for? My Website Branding Guide Ryan Hale Dillars,2021-07-08 THE VALUE YOU WILL GET IN READING THIS BOOK At the end of this book you will understand the important and usefulness of website. You will know it is good for your business to have website. You will know the step to build a great personal brand. You will know how to improve your online business. You will know the important of online business. Reason why you need to create website There are many websites out there today and for almost everything - from business websites to fan pages for domestic pigs. But for some reason more than 30 percent of companies in Germany still do not have their own website. Why is that? In surveys, the self-employed and small business owners in particular often state that they are too little familiar with building websites or that they lack the time or money to do so. But many also say that they simply don't need their own website - either because they don't think it's necessary

or because they are already on social media. However, due to the corona crisis, these ideas have changed in recent months. Because those who do not have their own internet presence and only earn money in their own shop were left behind during the lockdown. Because anyone who has their own website or an online shop could continue to generate sales online. But apart from Corona, there are still numerous reasons why a website is worthwhile for your business

Building a Business Website with HubSpot CMS: How to Create a Website, Landing Page, or Blog for Marketing & Sales Growth Jacob Lett,2022-12-12 Want to Create a Blog or Website for Your Business Marketing and Sales Strategy? I have been a part of many website redesign projects, which often take much time and can be expensive. If your company doesn't have the skills in-house, you must spend time vetting service providers and setting up the contract with legal and accounting. Then you must spend time with discovery meetings, design meetings, strategy meetings, etc. Sometimes, this lengthy web development process is necessary, but what if you know what you want but don't have the technical web development skills or time to create it? This is a Book on How to Create Your Own Website in Less Time and Complexity. And with No Code. I have seen business owners, marketers, and web designers build websites and landing pages in days or weeks using no-code page builders. There is a growing trend in website page builders like Webflow, Wix, Squarespace, WordPress, and HubSpot CMS. These platforms provide visual page editors and themes to dramatically increase the speed and simplicity of building a website. Instead of fussing about the web design before any content is written, you can use a theme close to what you need. After you add the content, you can hire a developer to make customizations to fine-tune your website, saving you considerable time and money. Questions I will help you answer in this book: What is a CMS content management system? How do I choose one? WordPress vs. Wix vs. HubSpot CMS - Which is the best free website builder? What about free web hosting? Why does my business need a website? How do you create templates and themes on HubSpot CMS? How to create a blog for your business? In this building a business website book, I will walk you through making a free website for your business. This will become a central component of your marketing plan and strategy. Book Chapters Introduction to How to Make a Business Website Choosing a Content Management System for Your Business HubSpot CMS vs. WordPress for building a website How to Create a Free Business Website with Hosting & SSL Security The Building Blocks of the Drag and Drop Website Page Builder Frequently Asked Questions Are You a Web Developer? Who This Website Design Book Is For Entrepreneurs who just created an LLC and need a website to start generating leads A freelancer or consultant who wants a website that is easy to build and maintain An existing business that wants to upgrade and modernize its website and make it mobile responsive Digital marketers or web developers testing out different CMS platforms for their inbound marketing strategy Just read the book Building a StoryBrand or Marketing Made Simple by Donald Miller and want to redesign your business website. Web designers, photographers, and artists looking for a website builder to host their online portfolio websites About the Author, Jake Lett I started building WordPress websites as a freelancer and saw how powerful a content management system could be for a non-technical user. Then about seven years ago, I worked at a company that used HubSpot. At first, it wasn't obvious because it was a whole new workflow and a new coding language HubL. But over time, I saw HubSpot CMS continually improve and how marketers loved using it. I could build smart templates and could adapt to the needs and challenges of a marketing team without having to leverage third-party plugins or custom PHP scripts.
