Train Your Brain Dana Wilde,2013-08 "Using Train Your Brain, in two years, I've gone from zero to a million dollars a year in my business and paid off \$30,000 in debt!" ~ Sarah Thomas, Basehor, KS When Dana Wilde began her direct-sales business, she realized that education for entrepreneurs typically consisted of endless "how-to" explanations: how to market, how to pick up the phone, how to manage your time, how to increase bookings or sales. There always seemed to be a new system to learn, a new surefire method or cutting-edge technique for entrepreneurs to master. In an effort to teach her team members a better and easier way, Dana Wilde created Train Your Brain, a tested and proven system combining elements of both mindset and action ... or as Dana likes to call it, Intentional Action. What Dana discovered by using Train Your Brain is that mindset can be "taught" and that learning simple mindset strategies not only allows you to understand how the brain works but also shows you how easy it is to change your thinking and, as a result, change your outcomes. In Train Your Brain, Dana breaks down the Cycle of Perpetual Sameness--the number one reason why most people only experience incremental change in their lives. More importantly, she also provides the much-needed blueprint to help you get off this counterproductive cycle quickly. Train Your Brain, with its twenty easy-to-implement "Mindware Experiments," gives you all the necessary tools needed to get off ... and stay off ... the Cycle of Perpetual Sameness, so you can transform your life and grow your business in record time!

Building the Business Brain Eziel Silva Pereira,2018-05-07 Many small business owners and enterprisers got their beginning as an employee. They worked for somebody else. The issue is, if you've been an employee for years, it may be difficult to shake of the bonds of the employee mentality.What does this mean?If you've an employee mentality, you're more likely to look to other people to tell you what to do. You'll find it difficult to take responsibility for the success and failure of your endeavor.

Herrmann-Nehdi uses her extensive research and experience working with her father and expert practitioners across the globe to highlight new research developments, replace outdated information, incorporate new stories and real-world examples while building on the core applications of *The Whole Brain Business Book*.

A Brain for Business – A Brain for Life Shane O'Mara, 2017-10-06 Behaviour change is hard, but O'Mara shows that by adopting strategies that are well-founded in the science of brain and behaviour individuals and organisations can adapt to the demands of the modern world. The brain matters in business. The problem is that our brains have many biases, heuristics and predilections that can distort behaviour and decision making. The good news is that we know more about how these work than ever before. O'Mara's starting point is that, as our behaviour arises from the structure and function of our brains, careful examination of a series of brain-based ('neurocognitive') analyses of common aspects of human behaviour relevant to business and management practice reveals lessons that can be used at work. He begins by looking at neuroplasticity and how it enables a shift from a restrictive 'fixed mindset' to an enabling 'growth mindset'. He shows how this changing mindset approach – where the focus is on task and improvements based on effort – is scalable within organisations. Next, as the brain is a living organ like the heart and lungs, O'Mara shows how to keep it physically in the best possible shape before examining how we exercise control over our behaviour, build resilience and create positive brain states. He also considers the implications for business of our brains wiring for status and illustrates how research shows that it is possible to de-bias assumptions about gender and race – and the impact that this has on performance.

All the Brains in the Business Kate Lanz, Paul Brown, 2019-11-02 The power of gender difference, not gender equality, is a secret source for success. Some smart businesses are starting to wake up to this fact. This book explores why and how. Properly valuing brain gender diversity in the workplace is one of the biggest and largely untapped sources of competitive advantage for modern businesses. Recent advances in neuroscience provide the key to unlocking it. Modern research shows that there are gender-based differences in the brain – it's just not as simple as a binary between a 'male brain' and 'female brain'. In fact, our brains are like a mosaic where many of the tiles are available in thousands of shades on a spectrum between pink and blue. The problem is that our workplaces tend to be governed by structures, processes and cultures that are practically pure blue. All the brains in the business that are elsewhere on the spectrum cannot thrive as they might, so sources of productivity, creativity and agility go untapped. Anyone who manages people needs to understand how the brain works and the impact it has on how people work together as teams. Anyone who wants to unlock the talent and productivity of all of their people needs to understand how recent findings around male- and female-type brains should shape the way they manage. Leading applied neuroscientists and international corporate coaches Kate Lanz and Paul Brown show you why and how to access all the brains in your business.
