Identity and History in Non-Anglophone Comics Harriet E.H. Earle, Martin Lund, 2023-04-24 This book explores the historical and cultural significance of comics in languages other than English, examining the geographic and linguistic spheres which these comics inhabit and their contributions to comic studies and academia. The volume brings together texts across a wide range of genres, styles, and geographic locations, including the Netherlands, Colombia, Greece, Mexico, Poland, Finland, Portugal, Ireland, and the Czech Republic, among others. These works have remained out of reach for speakers of languages other than the original and do not receive the scholarly attention they deserve due to their lack of English translations. This book highlights the richness and diversity these works add to the corpus of comic art and comic studies that Anglophone comics scholars can access to broaden the collective perspective of the field and forge links across regions, genres, and comic traditions. Part of the Global Perspectives in Comics Studies series, this volume spans continents and languages. It will be of interest to researchers and students of comics studies, literature, cultural studies, popular culture, art and design, illustration, history, film studies, and sociology.

There's a Disco Ball Between Us Jafari S. Allen, 2021-11-15 In *There's a Disco Ball Between Us*, Jafari S. Allen offers a sweeping and lively ethnographic and intellectual history of what he calls “Black gay habits of mind.” In conversational and lyrical language, Allen locates this sensibility as it emerged from radical Black lesbian activism and writing during the long 1980s. He traverses multiple temporalities and locations, drawing on research and fieldwork conducted across the globe, from Nairobi, London, and Paris to Toronto, Miami, and Trinidad and Tobago. In these locations and archives, Allen traces the genealogies of Black gay politics and cultures in the visual art, poetry, film, Black feminist theory, historiography, and activism of

thinkers and artists such as Audre Lorde, Marsha P. Johnson, Essex Hemphill, Colin Robinson, Marlon Riggs, Pat Parker, and Joseph Beam. Throughout, Allen renarrates Black queer history while cultivating a Black gay method of thinking and writing. In so doing, he speaks to the urgent contemporary struggles for social justice while calling on Black studies to pursue scholarship, art, and policy derived from the lived experience and fantasies of Black people throughout the world.

The Body of the Organisation and its Health Richard Morgan-Jones, 2018-05-08 Using the frameworks of psychoanalysis, group relations, systemic organisational observation, consulting and research, this book explores the relationship between the health of the work force and the health of organisations. It seeks to do this through an exploration of experience that has three dimensions linked in a single matrix: The bodily, the emotional and the social. This exploration is inspired by Bion's original idea of the protomental matrix from which the group dynamics of basic assumption mentality are derived, leading to his initial ideas about group diseases and their cures.

I'm Going to Have a Little House Carolina Maria de Jesus, 1997-01-01 Never before published in English, Carolina's second diary, written in 1960-61, describes her life in the first year after the sudden (and, as it turned out, temporary) fame of Quarto de despejo (see HLAS 25:4741). Faces and Masks Eduardo Galeano, 2014-04-29 "A book as fascinating as the history it relates . . . Galeano is a satirist, realist, and historian." –Los Angeles Times For centuries, Europe's imperial powers brutally exploited the peoples and resources of the New World. While soldiers of fortune marched across continents in search of El Dorado, white settlers established plantations and trading posts along the coasts, altering the land and bringing disease and slavery with them. In the midst of a bloody collision of civilizations, the West has birthed new societies out of the old. In the second book of his Memory of Fire trilogy, Eduardo Galeano forges a new understanding of the Americas, history retold from a diverse collection of viewpoints. Spanning the end of empire and the age of revolutions, Faces and Masks brilliantly collects the strands of the past into an iridescent work of literature.

The Memory of Fire Trilogy Eduardo Galeano, 2014-04-29 All three books in the American Book Award-winning Memory of Fire Trilogy available in a single volume for the first time. Eduardo Galeano's Memory of Fire Trilogy defies categorization—or perhaps creates its own. It is a passionate, razor-sharp, lyrical history of North and South America, from the birth of the continent's indigenous peoples through the end of the twentieth century. The three volumes form a haunting and dizzying whole that resurrects the lives of Indians, conquistadors, slaves, revolutionaries, poets, and more. The first book, Genesis, pays homage to the many origin stories of the tribes of the Americas, and paints a verdant portrait of life in the New World through the age of the conquistadors. The second book, Faces and Masks, spans the two centuries between the years 1700 and 1900, in which colonial powers plundered their newfound territories, ultimately giving way to a rising tide of dictators. And in the final installment, Century of the Wind, Galeano brings his story into the twentieth century, in which a fractured continent enters the modern age as popular revolts blaze from North to South. This celebrated

series is a landmark of contemporary Latin American writing, and a brilliant document of culture.

Brazil, Lyric, and the Americas Charles A. Perrone, 2017-03-15 This is Perrone at his most brilliant. Erudite but accessible, thorough but playful: *Brazil, Lyric, and the Americas* is the latest contribution by the most knowledgeable U.S.-based scholar of the Brazilian lyric.--Severino Joao Albuquerque, University of Wisconsin Perrone retraces the dialogue of the Brazilian lyric with the poetry of the Americas in the generous spirit that the poets' utopia of solidarity will serve as a counterpoint to the harsher side of globalization.--Luiza Moreira, Binghamton University In this highly original volume, Charles Perrone explores how recent Brazilian lyric engages with its counterparts throughout the Western Hemisphere in an increasingly globalized world. This pioneering, tour-de-force study focuses on the years from 1985 to the present and examines poetic output--from song and visual poetry to discursive verse--across a range of media. At the core of Perrone's work are in-depth examinations of five phenomena: the use of the English language and the reception of American poetry in Brazil; representations and engagements with U.S. culture, especially with respect to film and popular music; epic poems of hemispheric solidarity; contemporary dialogues between Brazilian and Spanish American poets; and the innovative musical, lyrical, and commercially successful work that evolved from the 1960s movement Tropicalia.

Slaves, Peasants, and Rebels Stuart B. Schwartz, 1996 Once preoccupied with Brazilian slavery as an economic system, historians shifted their attention to examine the nature of life and community among enslaved people. Stuart B. Schwartz looks at this change while explaining why historians must continue to place their ethnographic approach in the context of enslavement as an oppressive social and economic system. Schwartz demonstrates the complexity of the system by reconsidering work, resistance, kinship, and relations between enslaved persons and peasants. As he shows, enslaved people played a role in shaping not only their lives but Brazil's institutionalized system of slavery by using their own actions and attitudes to place limits on slaveholders. A bold analysis of changing ideas in the field, *Slaves, Peasants, and Rebels* provides insights on how the shifting power relationship between enslaved people and slaveholders reshaped the contours of Brazilian society.

Sustainability in Denim Subramanian Senthilkannan Muthu, 2017-06-12 Sustainability in Denim provides the latest information on sustainable fabrics and practices. From cotton farming, to manufacture and end of life disposal, denim has extensive effects on the environment, inclusive of water consumption and contamination, destruction of large-scale ecosystems and transportation pollution. Additionally, recent developments in the manufacture of denim, such as the use of textiles, including elastane and polyester, have led to limitations in the high end recycling of denim. This book includes an introduction covering the history, manufacture and lifecycle of denim. It deals with the sustainability aspects of denim by addressing three important pillars of sustainability, the environmental, social and economic aspects, that when combined, present a unique approach in comparison to other books on the topic. The book primarily uses case studies to examine

sustainability challenges throughout the denim lifecycle, and to evaluate new green initiatives and recycling processes. It will be of great use to industry professionals, sustainability managers, textile industry researchers and denim manufacturers. Reviews and studies denim from a sustainability perspective, addressing its major environmental, social and economic impacts Provides the reader with a fundamental knowledge of the history, manufacture and lifecycle of denim, thus enabling a holistic view of denim sustainability Presents new green initiatives for the processing and recycling of denim products for promotion and use amongst sustainability groups

Domestication of Plants in the Old World Daniel Zohary, Maria Hopf (deceased), Ehud Weiss, 2012-03-01 The origin of agriculture is one of the defining events of human history. Some 11-10,000 years ago bands of hunter-gatherers started to abandon their high-mobility lifestyles in favour of growing crops, and the creation of settled, sedentary communities. This shift into agricultural lifestyle triggered the evolution of complex political and economic structures, and technological developments, and ultimately underpinned the rise of all the great civilisations of recent human history. *Domestication of Plants in the Old World* reviews and synthesises the information on the origins and domestication of cultivated plants in the Old World, and subsequently the spread of cultivation from southwest Asia into Asia, Europe, and North Africa, from the very earliest beginnings. This book is mainly based on detailed consideration of two lines of evidences: the plant remains found at archaeological sites, and the knowledge that has accumulated about the present-day wild relatives of domesticated plants. This new edition revises and updates previous data and incorporates the most recent findings from molecular biology about the genetic relations between domesticated plants and their wild ancestors, and incorporates extensive new archaeological data about the spread of agriculture within the region. The reference list has been completely updated, as have the list of archaeological sites and the site maps. This is an advanced, research level text suitable for graduate level students and researchers in the fields of crop science, agriculture, archaeology, botanical archaeology, and plant biotechnology. It will also be of relevance and use to agricultural historians and anyone with a wider interest in the rise of civilisation in this region.
