International Perspectives on Psychotherapy Stefan G. Hofmann,2017-06-13 This clear-sighted resource critically examines the status of clinical psychology practice across the diverse regions of the world. Dispatches from North and Latin America, Eastern and Central Europe, China, South Korea, Australia, Africa, the Middle East, and elsewhere illustrate in depth the universality of mental distress and disorders, and the intersection of local knowledge and established standards in providing effective care. Pathology and its treatment are viewed in light of cultural values, belief systems, ethics, and norms, reflecting the evolution of clinical practice toward personalized care and culturally sensitive intervention. This important information serves a number of immediate and long-term goals, including developing culture-specific diagnoses and treatments, improving professional competencies, and the ongoing exchange of ideas within a global field to benefit all patients worldwide. Coverage compares key areas such as: · Concepts of mental pathology and health. · The sociopolitical aspects of psychology, rooted in the history of the country/region. · Popularly used approaches to intervention. · Types of services and providers. · The state of training and credentialing. · Relationships between clinical psychology and indigenous healing traditions. The audience for Clinical Psychology across the World includes advanced undergraduate and graduate students and trainees/interns in clinical psychology, as well as developers of training programs. It can also serve as a valuable supplementary text for seminars or lectures on clinical psychology.

Rationalizing Korea Kyung Moon Hwang,2015-12-29 The first book to explore the institutional, ideological, and conceptual development of the modern state on the peninsula, *Rationalizing Korea* analyzes the state's relationship to five social sectors, each through a distinctive interpretive theme: economy (developmentalism), religion (secularization), education (public schooling), population (registration), and public health (disease control). Kyung Moon Hwang argues that while this formative process resulted in a more commanding and systematic state, it was also highly fragmented, socially embedded, and driven by competing, often conflicting rationalizations, including those of Confucian statecraft and legitimation. Such outcomes reflected the acute experience of imperialism, nationalism, colonialism, and other sweeping forces of the era.
