📖 **Unlocking Credit** Inter-American Development Bank,2004 Annotation Bank loans are the main source of credit for businesses across Latin America, so understanding what determines the depth, cost, and volatility of bank credit is crucial to designing strategies that ensure financial stability and promote growth. This new edition of Economic and Social Progress in Latin America provides a comprehensive analysis of the region’s all-important banking industry. The book examines two-way interactions between macroeconomic policies and financial intermediation -- not only how these policies affect banking but how banks weather intermediate shocks, and how industry incentives can prompt bank portfolio choices that influence economic policy. The report also discusses how elements of a financial safety net -- including deposit insurance, prudential regulation, protection of creditor rights, and legal and judicial enforcement -- can mitigate factors that make credit more volatile and constrain its expansion. Finally, the report studies how the banking industry’s market structure affects its performance. Particular attention is given to the role of government- versus foreign-owned banks, access to credit by small and medium-sized enterprises, and the development of mortgage credit markets.

📖 **Unlocking the Customer Value Chain** Thales S. Teixeira,Greg Piechota,2019-02-19 Based on eight years of research visiting dozens of startups, tech companies and incumbents, Harvard Business School professor Thales Teixeira shows how and why consumer industries are disrupted, and what established companies can do about it—while highlighting the specific strategies potential startups use to gain a competitive edge. There is a pattern to digital disruption in an industry, whether the disruptor is Uber, Airbnb, Dollar Shave Club, Pillpack or one of countless other startups that have stolen large portions of market share from industry leaders, often in a matter of a few years. As Teixeira makes clear, the nature of competition has fundamentally changed. Using innovative new business models, startups are stealing customers by breaking the links in how consumers discover, buy and use products and services. By decoupling the
