I have taken 30 credits worth of CLEP exams and I've passed them all by using your study guides. I actually purchased one of your study guides and failed my first test. I didn't fail because of your guide though, I failed because I didn't manage my time effectively and I ran short. I looked at your study guide after failing though, and a lot of the information on your study guide was very relevant to what was on the test. So, I tried again with a different test and a different study guide of yours. I passed. This pattern continues for 30 credits. I graduate on June 9th thanks to you guys, so I wanted to say thank you. The guides were worth every penny. Thanks, -John S. ****I would like to thank you for your study guides. I will be graduating in December with two bachelor degrees and CLEP helped me get there quickly. I gained 36 credits through CLEP and your study guides helped me through almost all of them. I can honestly say that I would not have passed many of the tests without your guides. Great products. Thanks!! -Erin W.****

The third edition of this popular supplement updates, clarifies, and builds upon the coverage of earlier chapters, introduces questions focused on the law of agency, and elaborates on distinctions between the Model Business Corporation Act and the Delaware General Corporation Law. Notably, the revisions of the third edition have been informed by developments announced by the National Conference of Bar Examiners in anticipation of forthcoming revisions to the bar exam. This study guide includes multiple-choice and short-answer questions arranged topically for ease of use during the semester, plus an additional set of questions comprising a comprehensive practice exam. For each multiple-choice question, the authors have provided a thorough, yet concise, explanation that both indicates which of four options is the best answer and explains why that option is better than the other three options. Each short-answer question is designed to be answered in fifteen minutes or less. For these questions, the authors provide a comprehensive, yet brief, model answer.
