### **Configuring the General Ledger Within Dynamics 365 for Operations** Murray

Fife,2017-07-15 Another benefit of having the Organizational Units configured is that we can now take advantage of them within the Account Structures and add them as financial dimensions. This allows us to include them when we are posting to the ledger so that we can further refine our postings and assignment by department, business unit and cost center. We can also have different versions of the Account Structures for the different types of accounts - i.e. the Balance Sheet and Profit & Loss structures do not have to include dimensions that don't apply to them. In this guide we will show how you can extend out your Chart of Accounts to include Financial Dimensions and also how they work when you start using them within Journals. Topics Covered Defining Financial Dimensions Configuring Account Structures with Dimensions Using the Account Dimensions within Journals Configuring Account Structure Rules Posting Journals using the Account Rules

**Management and Business Education in the Time of Artificial Intelligence** Agata Stachowicz-Stanusch, Wolfgang Amann, 2020-05-01 Artificial intelligence (AI) technologies are one of top investment priorities in these days. They are aimed at finding applications in fields of special value for humans, including education. The fourth industrial revolution will replace not only human hands but also human brains, the time of machines requires new forms of work and new ways of business education, however we must be aware that if there is no control of human-AI interaction, there is a risk of losing sight of this interaction's goal. First, it is important to get people to truly understand AI systems, to intentionally participate in their use, as well as to build their trust, because "the measure of success for AI applications is the value they create for human lives" (Stanford University 2016, 33). Consequently, society needs to adapt to AI applications if it is to extend its benefits and mitigate the inevitable errors and failures. This is why it is highly recommended to create new AI-powered tools for education that are the result of cooperation between AI researchers and humanities' and social sciences' researchers, who can identify cognitive processes and human behaviors. This book is authored by a range of international experts with a diversity of backgrounds and perspectives hopefully bringing us closer to the responses for the questions what we should teach

(what the 'right' set of future skills is), how we should teach (the way in which schools should teach and assess them) and where we should teach (what implications does AI have for today's education infrastructure). We must remember as we have already noticed before "...education institutions would need to ensure that that they have an appropriate infrastructure, as well as the safety and credibility of AI-based systems. Ultimately, the law and policies need to adjust to the rapid pace of AI development, because the formal responsibility for appropriate learning outcomes will in future be divided between a teacher and a machine. Above all, we should ensure that AI respect human and civil rights (Stachowicz-Stanusch, Amann, 2018)".
