Identifying Business Opportunities Anthony Ekanem, 2016-07-12 No one is born successful. When we were born, we even did not know how to spell successful, knowing its meaning was something quite far-off. As we grew up, we began chipping in efforts to turn our lives into successful lives. Some of us do achieve the success that we have thought about, but that doesn't come without a great deal of effort. One of the most important ingredients in becoming successful is to have a vision, a dream. If you don't know how to dream, you will most probably not achieve anything in life. Some people are afraid to dream, thinking they would be terribly frustrated if they don't achieve their goals. But the fact is that if you don't dream, you probably won't get it. Great people dreamed of flying, going to the moon and so on... you see now that we can fly, we can go to the moon. In this age when people are thinking how to build gadgets that can turn objects and even people invisible, it is quite unwise to restrict one's thoughts. What do you dream about? Probably you dream about having a great business or buying a home or a car of your own. In the light of all the achievements that people have made, do you think all this is as difficult as you think? This shows there is nothing impossible in this world if you do it the right way, if you take initiatives and plan it properly. Practically the whole world today uses his Microsoft products, not realizing that these products belong to a person who is a computer dropout. Take a look at Facebook. It started as a college project and has today made a revolution in the field of social networking. How can we not talk about Google, which started in a dingy office and today it dominates our online world. All these successes have been achieved in just a few short years! So, don't lose hope, hold on to your big dreams and try to achieve them. The simple steps that you need to take are hard work, and to be there at the right time and the right place.

Entrepreneurship in India Deependra Sharma,2022-10-06 This book introduces readers and students to the entrepreneurial process. It is important as evidence has suggested that the probability of entrepreneurs' success enhances when they thoroughly appreciate the components of the entrepreneurial process as well as how to effectively use them. The fact that nearly 33 percent of new firms fail within the first two years while twenty percent fail within four to five years of their existence makes it evident that while many people are highly motivated to start new firms, motivation alone is not sufficient, rather it should be coupled with relevant information, a strong business idea, a well-crafted business plan, and sound execution to maximize chances for success. This work offers an insightful and a practical guide to the process of launching and growing an entrepreneurial organisation with success. It will therefore serve as an important resource to students of Entrepreneurship and to anyone interested in the field, academically or practically.
