Be Your Own Business Coach Sanjay

Behuria, 2017-11-08 This book is written for all small business owners - the successful, the strugglers and the starters and everyone in between. Why is this book titled book as both consulting and coaching? While there are distinctions between the two as described above, when it comes to small business owners they need a combination of both. Consulting will provide you with the tools to work your business and coaching will hold you accountable to work those tools. Look around your garage, kitchen, office or even the car - how many tools do you have around you? When you bought them - they were the problem solvers you could not do without and then you bought another tool to solve the same problems and then another and another. All these tools are around your place - how many do you use? Just because you do not use them, doesn't mean that they have lost their problem-solving capacity. Each still has the same capacity as they had when they were bought. It is just that they are not used anymore. Similarly, your business has many tools - vision, mission, strategic plan, action plan, business plan, budget, marketing tools and many more. How many do you use as a living document, like a report card? If you do not use them, why did you spend time to create them? It is the same reason you do not use all the tools that you bought.
