Development and Welfare Policy in South Asia Gabriele Koehler, Deepta Chopra, 2014-03-05 This book sheds light on social policies in six South Asian countries introduced between 2003 and 2013, examining the ways in which these policies have come about, and what this reflects about the nature of the state in each of these countries. It offers a detailed analysis of the nature of these policies introduced in recent years in Bangladesh, India, Maldives, Nepal, Pakistan and Sri Lanka, and illustrates the similarities and differences in policy approaches amongst the six countries. Through this analysis, the book explores the thesis of whether there is a particular type of 'developmental welfare state' that can be observed across South Asia. The focus is on social policies or policies designed to address poverty and deliver welfare at the level of programming and design, i.e. the stated intent of these policies. The book also presents an analysis of the fiscal space available in each of the six countries, thereby drawing conclusions about the financial feasibility of a

‘developmental welfare state’ model in the region. This comprehensive book uniquely explores critical aspects of policy debates on a possible move from welfare to ‘rights’. It introduces students and researchers in development studies, social policy and South Asian studies to innovative welfare programmes in South Asia and gives a new perspective on the nature and patterns of welfare in South Asia with the view of tackling inequality and promoting well-being.

Business and Management in Asia: Digital Innovation and Sustainability Tobias Endress,Yuosre F. Badir,2022-11-17
This book focuses on digital innovation and sustainability in the Asian region in the context of business and management. Managers and policy makers rely on digital technologies to face the region’s sustainability challenges and solve sustainability problems. From business perspective, sustainability is defined as the adoption of business strategies, activities, and operations that meet the needs of the firm and its stakeholder today while protecting, sustaining, and enhancing the human and natural

resources that will be needed in the future. Digital innovation refers to the application of digital technologies to existing business problems as well as the development of the firm's strategy, culture, and human resources talent to deal and use digital technologies to solve sustainability issues. There is a consensus among scholars and practitioners that organizations need digital innovation to stay competitive. Businesses that are digital innovators consider new ways to solve old and new sustainability problems facing the Asian region. This book, with its practical examples, gives the reader impulses for new Asian's approaches and encourages the readers to dare to think and act in new ways. This book is the first annual compilation of innovative ideas and valuable managerial solutions produced by the region's managers and decision-makers who think and act creatively, helmed by Tobias Endress and Yuosre F. Badir from the School of Management at the Asian Institute of Technology.
