*Novel Approaches to the Diagnosis and Treatment of Posttraumatic Stress Disorder* M.J.

Roy,2006-03-09 Posttraumatic stress disorder (PTSD) is a common and disabling condition that often goes undiagnosed for years, and even when the diagnosis is made, treatment is frequently ineffective, especially for combat veterans. Cognitive behavioural therapy with imaginal exposure is considered first-line treatment, but many cannot or will not engage in imaginal exposure, which is not surprising, since avoidance of reminders of the trauma is a defining feature of PTSD. Novel technologies offer an alternative to facilitate exposure therapy, through virtual reality (VR). This book outlines state-of-the-art approaches to improving the diagnosis and treatment of PTSD, with a particular emphasis on the promise and pitfalls associated with VR exposure therapy. The world's leading experts in this cutting edge field describe their VR work in phobias and other mental disorders, and chart a course for future studies to improve the diagnosis and treatment of PTSD.

*Virtual Reality for Psychological and Neurocognitive Interventions* Albert "Skip" Rizzo,Stéphane

Bouchard,2019-08-24 This exciting collection tours virtual reality in both its current therapeutic forms and its potential to transform a wide range of medical and mental health-related fields. Extensive findings track the contributions of VR devices, systems, and methods to accurate assessment, evidence-based and client-centered treatment methods, and—as described in a stimulating discussion of virtual patient technologies—innovative clinical training. Immersive digital technologies are shown enhancing opportunities for patients to react to situations, therapists to process patients’ physiological responses, and scientists to have greater control over test conditions and access to results. Expert coverage details leading-edge applications of VR across a broad spectrum of psychological and neurocognitive conditions, including: Treating anxiety disorders and PTSD. Treating developmental and learning disorders, including Autism Spectrum Disorder, Assessment of and rehabilitation from stroke and traumatic brain injuries. Assessment and treatment of substance abuse. Assessment of deviant sexual interests. Treating obsessive-compulsive and related disorders. Augmenting learning skills for

blind persons. Readable and relevant, Virtual Reality for Psychological and Neurocognitive Interventions is an essential idea book for neuropsychologists, rehabilitation specialists (including physical, speech, vocational, and occupational therapists), and neurologists. Researchers across the behavioral and social sciences will find it a roadmap toward new and emerging areas of study.

**Hounds of the Road** Carlton Jackson,1984 The bus system that came to be known as the

Greyhound Bus Company was founded by Carl Eric Wickman, an enterprising Swede of Hibbing, Minnesota. The first bus was a seven-passenger Hupmobile touring car that was used to transport miners across the Mesaba Iron Range to and from work. Wickman was soon joined by another Swede, Andrew Anderson, and they began operating in earnest the route from a saloon in Hibbing to the fire-hall in Alice. From this lowly beginning grew the Greyhound Corporation, a multi-million dollar company which, through the years, has owned everything from a chain of hamburger restaurants to a soap company.

Hybrid Electric Vehicles Teresa Donateo,2017-06-21 This book on hybrid electric vehicles brings out six chapters on some of the research activities through the wide range of current issues on hybrid electric vehicles. The first section deals with two interesting applications of HEVs, namely, urban buses

and heavy duty working machines. The second one groups papers related to the optimization of the electricity flows in a hybrid electric vehicle, starting from the optimization of recharge in PHEVs through advance storage systems, new motor technologies, and integrated starter-alternator technologies. A comprehensive analysis of the technologies used in HEVs is beyond the aim of the book. However, the content of this volume can be useful to scientists and students to broaden their knowledge of technologies and application of hybrid electric vehicles.

**Interim Measures in International Commercial Arbitration** Ajar Rab, 2022-08-09 Interim measures by courts as well as tribunals are often critical to succeed in arbitration proceedings and to effectively safeguard the rights of parties pending the final adjudication of their dispute. This important book comprises a comprehensive review of interim measures in international commercial arbitration granted by courts and tribunals across jurisdictions that have adopted the UNCITRAL Model Law to critically assess the practical fault lines in the Indian arbitration regime. The book provides an in-depth analysis of the following: all reported judgments of the Indian Supreme Court and the High Courts from 1993 to

2022 on issues concerning interim measures; practical application of the UNCITRAL Model Law (and the revisions in 2006) by national arbitration statutes of over 80 jurisdictions with respect to interim measures; comparative practice and jurisprudence on interim measures in international commercial arbitration; rules of major arbitral institutions on the power and scope of interim measures granted by tribunals; detailed analysis of different types of interim measures, including anti-suit, anti-arbitration injunctions, security for costs, and interim measures in aid of foreign-seated arbitrations, the standards to be applied, and the burden of proof to be demonstrated for each type of measure; and issues of enforcement of interim measures in domestic, international, and foreign seated arbitrations. The current position of law in India and the problems plaguing the country's Arbitration and Conciliation Act 1996 (IAA), as amended in 2015 with respect to interim measures, are brought into direct comparison with other Model Law jurisdictions, offering an analysis of case laws, practical insights and cogent suggestions based on best practices that can be adopted by parties and tribunals. The Appendices provide a detailed list of statutory provisions of countries that have adopted the Model Law along with

rules of major arbitral institutions on interim measures. The author not only describes the current position of law in India and other Model Law jurisdictions on interim measures but also reveals a comprehensive understanding of the requests for interim measures, and their enforcement in domestic, international, and foreign seated arbitrations. This book engages in a comprehensive and clear discussion on the fine line between court assistance and court intervention, especially in the case of interim measures and suggests draft provisions that India and other jurisdictions can adopt in order to align with the 2006 revisions to the Model Law to foster certainty, predictability, and efficiency in case of interim measures in international commercial arbitration.

**Using Technology to Support Evidence-Based Behavioral Health Practices** Michael A.

Cucciare,Kenneth R. Weingardt,2009-10-30 The use of technology to provide cost-effective behavioral healthcare is emerging as a crucial aspect of treating a wide variety of behavioral health problems. However, many behavioral health providers lack the knowledge and skills necessary to effectively integrate technology-based behavioral tools into their practice. In Using Technology to Support

Evidence-Based Behavioral Health Practices, the authors help providers implement technology-based behavioral health practices in various healthcare settings and with various mental health disorders. Divided into two parts, the text first addresses specific disorders or problem areas, then presents issues concerning implementation and evaluating such tools in clinical practice and important ethical issues to consider when doing so.
