Marine Ornamental Species Aquaculture Ricardo Calado,Ike Olivotto,Miquel Planas Oliver,G. Joan Holt,2017-02-15 The global trade of aquatic organisms for home and public aquariums, along with associated equipment and accessories, has become a multi-billion dollar industry. Aquaculture of marine ornamental species, still in its infancy, is recognized as a viable alternative to wild collection as it can supplement or replace the supply of wild caught specimens and potentially help recover natural populations through restocking. This book collects into a single work the most up-to-date information currently available on the aquaculture of marine ornamental species. It includes the contributions of more than 50 leading scientists and experts on different topics relevant for the aquaculture of the most emblematic groups of organisms traded for reef aquariums. From clownfish, to angelfish, tangs and seahorses, as well as corals, anemones, shrimps, giant clams and several other reef organisms, all issues related with the husbandry, breeding, and trade are addressed, with explanatory schemes and illustrations being used to help in understanding the most complex topics addressed. Marine Ornamental Species Aquaculture is a key reference for scientists and academics in research institutes and universities, public and private aquaria, as well as for hobbyists. Entrepreneurs will also find this book an important resource, as the culture of marine ornamental species is analyzed from a business oriented perspective, highlighting the risks and opportunities of commercial scale aquaculture of marine ornamentals.

The Cayman Islands M.A. Brunt,J.E. Davies,2012-12-06 In the course of the last century a considerable amount of scientific work has been carried out in the Cayman Islands. The results of this (outlined in Chapter 1) are widely distributed in unpublished reports, university theses, various scientific publications and books, many of these sources being difficult to find and some now unobtainable. The purpose of this book, therefore, is to bring all this scattered information together and to present a coherent account of the biogeography and ecology of the Islands, as an easily available reference source and as a foundation on which future work can be based.

Food and Gender in Fiji Sharyn Jones,2009-08-13 Food and Gender in Fiji is an ethnoarchaeological investigation of the social relations surrounding foodways on the island of Nayau in Fiji. Writing from the perspective of an archaeologist, Jones answers questions raised by her archaeological research using original ethnographic data and material culture associated women and fishing, the intersection that forms the basis of the subsistence economy on Nayau. She focuses on food procurement on the reef, domestic activities surrounding foodways, and household spatial patterns to explore the meaning of

food amongst the Lau Group of Fiji beyond the obvious nutritional and ecological spheres. Jones presents her findings alongside original archaeological data, demonstrating that it is possible to illuminate contemporary food-related social issues through historical homology and comparison with the lifeways of the Lauan people. Offering a comprehensive and rigorous example of ethnoarchaeology at work, this book has major implications for archaeological interpretations of foodways, gender, identity, and social organization in the Pacific Islands and beyond.
