Early Observations on Possible Defenses by the Emerging Threat Agent Project Bruce W. Bennett, Jonathan Kaufman, James Byrnes, 2011 The Defense Department is concerned about emerging chemical and biological (CB) weapon agents and the ability of U.S. defenses to counter them. Due to scientific advances that facilitate the development of new and novel CB agents and the fact that uncovering such work will be a difficult intelligence challenge, the Emerging Threat Agent Project (ETAP) undertook a study to examine the challenges of emerging CB agents and propose measures to reduce their risks. The authors conclude that the problem is comprised of two related components. Given the inherent secrecy with which states and other actors will conduct CB agent development, adversary programs could acquire new CB agents years before U.S. defense planners recognize those agents. And, after the U.S. intelligence community recognizes those CB agents as threats, the United States will probably need many more years to establish a comprehensive defense against them. Such gaps in CB agent defense capabilities pose a potentially serious risk to U.S. military operations. To best mitigate this risk, the Chemical and Biological Defense Program (CBDP) of the U.S. Department of Defense needs to augment current work with enhanced efforts to dissuade adversary CB agent development and to deter adversary use of new CB weapons. Successful initiatives in dissuasion and deterrence will depend on CB defensive programs that appear dynamic, progressive, and integrated with other Defense Department and national-level efforts in counter proliferation. Many of these objectives can be met by adding a second track to the current agent-specific science and technology (S&T) effort, a track that focuses on the mechanisms of CB agent effects and interactions with the environment.

Neither Wolf Nor Dog David Rich Lewis, 1994-10-06 During the nineteenth century, Americans looked to the eventual civilization and assimilation of Native Americans through a process of removal, reservation, and directed culture change. Policies for directed subsistence change and incorporation had far-reaching social and environmental consequences for native peoples and native lands. This study explores the experiences of three groups--Northern Utes, Hupas, and Tohono O'odhams--with settled reservation and allotted agriculture in the nineteenth and twentieth centuries. Each group inhabited a different environment, and their cultural traditions reflected distinct subsistence adaptations to life in the western United States. Each experienced the full weight of federal agrarian policy yet responded differently, in culturally consistent ways, to subsistence change and the resulting social and environmental consequences. Attempts to establish successful agricultural economies ultimately failed as each group reproduced their own cultural values in a diminished and rapidly changing environment. In the end, such policies and agrarian experiences left Indian farmers marginally incorporated and economically dependent.

It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The Central Intelligence Agency Arthur B. Darling,Bruce D. Berkowitz,Allan E. Goodman,2007-06-05 This unique history offers the most detailed and best documented account of the early years of the CIA currently available. It reveals the political and bureaucratic struggles that accompanied the creation of the modern U. S. intelligence community. In addition, it proposes a theory of effective intelligence organization, applied both to the movement to create the CIA and to the form it eventually took. The period covered by this study was crucially important because it was during this time that the main battles over the establishment, responsibilities, and turf of the agency were fought. Many of these disputes framed the forty years, such as the relationship of the CIA to other government agency intelligence operations, the role of covert action, and Congressional oversight of the intelligence community. The sources upon which Darling drew for this study include the files of the National Security Council, the wartime files of the OSS, and interviews and correspondence with many of the principal players.

The End Of Reform Alan Brinkley,2011-09-21 At a time when liberalism is in disarray, this vastly illuminating book locates the origins of its crisis. Those origins, says Alan Brinkley, are paradoxically situated during the second term of Franklin Delano Roosevelt, whose New Deal had made liberalism a fixture of American politics and society. The End of Reform shows how the liberalism of the early New Deal—which set out to repair and, if necessary, restructure America’s economy—gave way to its contemporary counterpart, which is less hostile to

corporate capitalism and more solicitous of individual rights. Clearly and dramatically, Brinkley identifies the personalities and events responsible for this transformation while pointing to the broader trends in American society that made the politics of reform increasingly popular. It is both a major reinterpretation of the New Deal and a crucial map of the road to today's political landscape.
