Strategic analysis of Mobike's business model in China and its applicability in Germany

Marko Francesevic, Marco Schuster, 2019-06-11 Seminar paper from the year 2017 in the subject Business economics - Company formation, Business Plans, grade: 1,0, Copenhagen Business School, language: English, abstract: Innovative and resource saving mobility offers are needed in times of urbanization, climate change and an increasing scarcity of resources. Car2Go and BlaBlaCar are some of those companies that disrupted the traditional mobility market over the last years. Another example is the Chinese bike rental company "Mobike", which provides users with flexible, on-demand and nearby access to mobility through a large fleet of bicycles that are distributed across the largest cities in China. The company's usage of the newest IoT (Internet of Things) technologies and a large amount of funding have resulted in a massive expansion across China, Singapore and just very recently UK in just 1,5 years. It also resulted in a replacement of traditional transport modes, such as the car, as the primary mode of transportation. Thus, one can say that Mobike and its many competitors help to transform Chinese megacities in a less polluted and more liveable area. All of those mobility disruptors, named before are based on the principle of "sharing economy". Its most important characteristics are access over ownership and collaborative consumption. Recent social, demographic and political changes in Germany have made mobility schemes based on the "sharing economy" a potential option to traditional transport modes. As climate change and the resulting need to lower emissions is not only a Chinese issue but a global one, it is only fair to ask whether the business model of Mobike can be applied in the German market. Hence, this paper aims to answer the following question: Is the business model of Mobike applicable in the German market?

One Year on a Bike Martijn Doolaard, 2017 Martijn Doolaard traded in the convenience of a car and the distractions of daily life for a cross-continental cycling journey: a biped adventure from Amsterdam to Singapore. Leaving behind repetitive routines, One Year on a Bike indulges in slow travel, the subtlety of a gradually changing landscape, and the lessons learned through travelling. Venturing through Eastern European fields of yellow rapeseed to the intimate hosting culture in Iran, One Year on a Bike is a vivid chronicle of what can happen when the norm is pointedly replaced by exceptional self-discoveries and beautiful sceneries. Doolaard shares the gear and knowledge that made his trip possible. -- Provided by publisher.

Advances in Integrated Design and Manufacturing in Mechanical Engineering II Serge Tichkiewitch, M. Tollenaere, Pascal Ray, 2010-04-02 The 33 papers presented in this book were selected from amongst the 97 papers presented during the sixth edition of the International Conference on Integrated Design and Manufacturing in Mechanical Engineering during 28 sessions. This conference represents the state-of-the-art research in the field. Two keynote papers introduce the subject of the Conference and are followed by the different themes highlighted during the conference.

Modelling Public Transport Passenger Flows in the Era of Intelligent Transport Systems Guido Gentile, Klaus Nökel, 2016-02-03 This book shows how transit assignment models can be used to describe and predict the patterns of network patronage in public transport systems. It provides a fundamental technical tool that can be employed in the process of designing, implementing and evaluating measures and/or policies to improve the current state of transport systems within given financial, technical and social constraints. The book offers a unique methodological contribution to the field of transit assignment because, moving beyond "traditional" models, it describes more evolved variants that can reproduce: • intermodal networks with high- and low-frequency services; • realistic behavioural hypotheses underpinning route choice; • time dependency in frequency-based models; and • assumptions about the knowledge that users have of network conditions that are consistent with the present and future level of information that intelligent transport systems (ITS) can provide. The book also considers the practical perspective of practitioners and public transport operators who need to model and manage transit systems; for example, the role of ITS is explained with regard to their potential in data collection for modelling purposes and validation techniques, as well as with regard to the additional data on network patronage and passengers' preferences that

influences the network-management and control strategies implemented. In addition, it explains how the different aspects of network operations can be incorporated in traditional models and identifies the advantages and disadvantages of doing so. Lastly, the book provides practical information on state-of-the-art implementations of the different models and the commercial packages that are currently available for transit modelling. Showcasing original work done under the aegis of the COST Action TU1004 (TransITS), the book provides a broad readership, ranging from Master and PhD students to researchers and from policy makers to practitioners, with a comprehensive tool for understanding transit assignment models.

Green Cities Nevin Cohen, 2011-06-28 Colorful bracelets, funky brooches, and beautiful handmade beads: young crafters learn to make all these and much more with this fantastic step-by-step guide. In 12 exciting projects with simple steps and detailed instructions, budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble. Following the successful Art Smart series, Craft Smart presents a fresh, fun approach to four creative skills: knitting, jewelry-making, papercrafting, and crafting with recycled objects. Each book contains 12 original projects to make, using a range of readily available materials. There are projects for boys and girls, carefully chosen to appeal to readers of all abilities. A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills.

City Cycling John Pucher, Ralph Buehler, 2012-10-19 A guide to today's urban cycling renaissance, with information on cycling's health benefits, safety, bikes and bike equipment, bike lanes, bike sharing, and other topics. Bicycling in cities is booming, for many reasons: health and environmental benefits, time and cost savings, more and better bike lanes and paths, innovative bike sharing programs, and the sheer fun of riding. City Cycling offers a guide to this urban cycling renaissance, with the goal of promoting cycling as sustainable urban transportation available to everyone. It reports on cycling trends and policies in cities in North America, Europe, and Australia, and offers information on such topics as cycling safety, cycling infrastructure provisions including bikeways and bike parking, the wide range of bike designs and bike equipment, integration of cycling with public transportation, and promoting cycling for women and children. City Cycling emphasizes that bicycling should not be limited to those who are highly trained, extremely fit, and daring enough to battle traffic on busy roads. The chapters describe ways to make city cycling feasible, convenient, and safe for commutes to work and school, shopping trips, visits, and other daily transportation needs. The book also offers detailed examinations and illustrations of cycling conditions in different urban environments: small cities (including Davis, California, and Delft, the Netherlands), large cities (including Sydney, Chicago, Toronto and Berlin), and "megacities" (London, New York, Paris, and Tokyo). These chapters offer a closer look at how cities both with and without historical cycling cultures have developed cycling programs over time. The book makes clear that successful promotion of city cycling depends on coordinating infrastructure, programs, and government policies.

A Potato on a Bike Read-Along Elise Gravel, 2019-11-26 This delightful board book will make the little ones in your life giggle at the absurdity of a fly on the phone and a carrot in the tub. The text's repeated asking Have you ever seen...? preceding the refrain No way! will have toddlers yelling No way! themselves as you read through these silly situations. Celebrated artist Elise Gravel brings the silly to a new level in *A Potato on a Bike*, because really, has anyone ever seen a broccoli counting to ten or a sausage reading a book? But wait, how about a...baby being tickled?! Uh-oh, I think the answer for that is—yes way!

Sustainable Urban Transport Maria Attard, Yoram Shiftan, 2015-05-14 This publication brings together an international group of researchers and presents work from different countries dealing with issues related to transport policy, attitudes and mode choice, car sharing and alternative modes

of transport, and discusses the future of non-motorized modes of transport.

If You Call A Moose A Mouse Caitlin Marine,2012-05-10 Starting in Oslo, the adventures of a Minnesota girl on a year long scholarship to Norway increase in hilarity and insightfulness as the year goes on. From tracking wolverines to walking miles in wet ski boots and learning how to cook campfire coffee, the adventures, conversations, and funny misunderstandings provide a tale that embraces the dynamic nature of an immersion experience. Starting simply as a chronicle of experiences, this story developed into a blend of travel essay, memoir, and diary recounting light-hearted, intriguing stories that provide cultural insights as well as suggestions for those who wish to travel to the country of fjords and mountains.

A Bike Ride Through My Life Frank Clements,2011-06-06 A Bike Ride through My Life chronicles the life of author Frank Clements with bicycles following the twists and turns that his life has taken in pursuit of his passion for riding. Clements is the younger brother of Ernie Clements, winner of several British Cycling Championships and a Silver Medal in the 1948 Olympic Games Bicycle Race. Despite his love of cycling, he first chose to join National Service in the RAF to establish a unique place for himself and spent virtually all of his final twelve months of service riding a bike. After his tour of duty ended, he began training to become the best cyclist in the world, his life's ambition since his success as a potential world class cyclist as a teen. Clements has had many ups and downs in his cycling life. At a young age, he came in second in the British under-eighteen championships and just missed being a member of the British Olympic Cycling team for the 1956 Olympics in Melbourne, Australia. He also designed, built, and loaned five special Cross country bikes to Roger Hammond and he won the Worlds Cyclo Cross Championship with them. This memoir follows Clements from youth to retirement, offering a fascinating trip through an amazing life.

Mapping the Travel Behavior Genome Konstadinos G. Goulias,Adam W. Davis,2019-10-29 Mapping the Travel Behavior Genome covers the latest research on the biological, motivational, cognitive, situational, and dispositional factors that drive activity-travel behavior. Organized into three sections, Retrospective and Prospective Survey of Travel Behavior Research, New Research Methods and Findings, and Future Research, the chapters of this book provide evidence of progress made in the most recent years in four dimensions of the travel behavior genome. These dimensions are Substantive Problems, Theoretical and Conceptual Frameworks, Behavioral Measurement, and Behavioral Analysis. Including the movement of goods as well as the movement of people, the book

shows how traveler values, norms, attitudes, perceptions, emotions, feelings, and constraints lead to observed behavior; how to design efficient infrastructure and services to meet tomorrow's needs for accessibility and mobility; how to assess equity and distributional justice; and how to assess and implement policies for improving sustainability and quality of life. Mapping the Travel Behavior Genome examines the paradigm shift toward more dynamic, user-centric, demand-responsive transport services, including the sharing economy, mobility as a service, automation, and robotics. This volume provides research directions to answer behavioral questions emerging from these upheavals. Offers a wide variety of approaches from leading travel behavior researchers from around the world Provides a complete map of the methods, skills, and knowledge needed to work in travel behavior Describes the state of the art in travel behavior research, providing key directions for future research

The Bicycle Book Jim Joyce, 2007 *The Bicycle Book: Wit, Wisdom & Wanderings* is a celebration of the bicycle by people who ride - a tribute to one of the finest, most efficient, useful machines ever invented. The 25 contributors are talented writers and cartoonists, each with a unique take on bicycling. Whether critical observation, concern, memorial, fact or jest, each story and cartoon is worth a look. You don't have to be a cycling expert; there is something for everyone. Pulitzer Prize-winner Thomas Hylton opens with *Bicycling and Walking*, a prescriptive essay on cycling-friendly communities. Next, Scott Roberts' exclusive interview with Chris Carmichael, a coach of Lance Armstrong. Two prominent names in cycling journalism, Bike Culture editor Richard Fries and Dirt Rag publisher Maurice Tierney, comment on the future of bicycling. Throughout the book are cartoons from artists whose work has appeared in *The New Yorker*, *Esquire*, *Reader's Digest*, *Forbes*, *Barron's*, *Boys' Life*, etc. The *Bicycle Book* was edited by Jim Joyce, founder of The Bicycle Exchange. 15% of royalties are donated to SoldierRide, League of American Bicyclists, and the US Association of Blind Athletes' tandem cycling program.

IoT and Cloud Computing for Societal Good Jitendra Kumar Verma, Deepak Saxena, Vicente González-Prida, 2021-12-26 This book gathers the state-of-the-art for industrial application of scientific and practical research in the Cloud and IoT paradigms to benefit society. The book first aims to discuss and outline various aspects of tackling climate change. The authors then discuss how Cloud and IoT can help for digital health and learning from industrial aspects. The next part of book discusses technical improvements in the fields of security and privacy. The book also covers Smart Homes and IoT in agriculture. The book is targeted towards advancing undergraduate, graduate, and post graduate students, researchers, academicians, policymakers, various government officials, NGOs, and industry research professionals who are currently working in the field of science and technology either directly or indirectly to benefit common masses.

Digital Infrastructures Thomas Horan, Rae Zimmerman, 2004-09-09 An invisible network of digital technology systems underlies the highly visible networks of roads, waterways, satellites, and power-lines. Increasingly, these systems are becoming the infrastructure's infrastructure, providing a crucial array of data on network demand, performance, reliability, and security. *Digital Infrastructures* presents an interdisciplinary analysis of the technological systems that envelop these networks. The book balances analyses of specific civil and environmental infrastructures with broader policy and management issues, including the challenges of using IT to manage these critical systems under crises conditions.
