The Performance Complex David Stark, 2020-07-10
What's valuable? Market competition provides one kind of answer. Competitions offer another. On one side, competition is an ongoing and seemingly endless process of pricings; on the other, competitions are discrete and bounded in time and location, with entry rules, judges, scores, and prizes. This book examines what happens when ever more activities in domains of everyday life are evaluated and experienced in terms of performance metrics. Unlike organized competitions, such systems are ceaseless and without formal entry. Instead of producing resolutions, their scorings create addictions. To understand these developments, this book explores discrete contests (architectural competitions, international music competitions, and world press photo competitions); shows how the continuous updating of rankings is both a device for navigating the social world and an engine of anxiety; and examines the production of such anxiety in settings ranging from the pedagogy of performance in business schools to struggling musicians coping with new performance metrics in online platforms. In the performance society, networks of observation - in which all are performing and keeping score - are entangled with a system of emotionally charged preoccupations with one's positioning within the rankings. From the bedroom to the boardroom, pharmaceutical companies and management consultants promise enhanced performance. This assemblage of metrics, networks, and their attendant emotional pathologies is herein regarded as the performance complex.

Research Advances in Cloud Computing Sanjay

Chaudhary,Gaurav Somani,Rajkumar Buyya,2017-12-28

This book addresses the emerging area of cloud computing, providing a comprehensive overview of the research areas, recent work and open research problems. The move to cloud computing is no longer merely a topic of discussion; it has become a core competency that every modern business needs to embrace and excel at. It has changed the way enterprise and internet computing is viewed, and this success story is the result of the long-term efforts of computing research community around the globe. It is predicted that by 2026 more than two-thirds of all enterprises across the globe will be entirely run in cloud. These predictions have led to huge levels of funding for research and development in cloud computing and related technologies. Accordingly, universities across the globe have incorporated cloud computing and its related technologies in their curriculum, and information technology (IT) organizations are accelerating their skill-set evolution in order to be better prepared to manage emerging technologies and public expectations of the cloud, such as new services.

He pushes me harder against the bed, Would you feel better if it was your British boy doing this to you? He slurs as his hands come to touch my face. I grit my teeth at his tricky question; if I say yes, then he'll want me to want this and if I say no, that would be a lie. Yes, but not like this! I answer in frustration.

The Bankers' Blacklist Julia C. Morse, 2022-01-15 In The Banker's Blacklist, Julia C. Morse demonstrates how the Financial Action Task Force (FATF) has enlisted global banks

in the effort to keep bad money out of the financial system, in the process drastically altering the domestic policy landscape and transforming banking worldwide. Trillions of dollars flow across borders through the banking system every day. While bank-to-bank transfers facilitate trade and investment, they also provide opportunities for criminals and terrorists to move money around the globe. To address this vulnerability, large economies work together through an international standard-setting body, the FATF, to shift laws and regulations on combating illicit financial flows. Morse examines how this international organization has achieved such impact, arguing that it relies on the power of unofficial market enforcement—a process whereby market actors punish countries that fail to meet international standards. The FATF produces a public noncomplier list, which banks around the world use to shift resources and services away from listed countries. As banks restrict cross-border lending, the domestic banking sector in listed countries advocates strongly for new laws and regulations, ultimately leading to deep and significant compliance improvements. The Bankers' Blacklist offers lessons about the peril and power of globalized finance, revealing new insights into how some of today's most pressing international cooperation challenges might be addressed.

I. agrees to check up on an empty mansion. But instead of a mysterious intruder she discovers a dead man in the ornamental pond—a reporter for an African-American publication whom the suburban cops are quick to dismiss as a suicide. When the man’s shattered family hires V. I. to investigate, she is sucked into a Gothic tale of sex, money, and power, leading her back to McCarthy-era blacklists and forward to some of the darker aspects of the Patriot Act. As V. I. finds herself penned in to a smaller and smaller space by an array of people trying to silence her, and before she can untangled the sordid truth, two more people will die—and V.I.’s own life will hang in the balance.

sventurata è la terra che ha

sono le prime che sentiamo
da bambini le sole che
studiamo da ragazzi e le
uniche che ci ispirano da
adulti
