**Altar Call in Europe** Uta A. Balbier, 2021-12-17 This book provides a transnational history of Billy Graham's revival work in the 1950s, zooming in on his revival meetings in London (1954), Berlin (1954/1960), and New York (1957). It shows how Graham's international ministry took shape in the context of trans-Atlantic debates about the place and future of religion in public life after the experiences of war and at the onset of the Cold War, and through a constant exchange of people, ideas, and practices. It explores the transnational nature of debates about the religious underpinnings of the Free World and sheds new light on the contested relationship between business, consumerism, and religion. In the context of Graham's revival meetings, ordinary Christians, theologians, ministers and Church leaders in the United States, Germany, and the UK discussed, experienced, and came to terms with religious modernization and secular anxieties, Cold War culture and the rise of consumerism. The transnational connectedness of their political, economic, and spiritual hopes and fears brings a narrative to life that complicates our understanding of the different secularization paths the United States, the UK, and Germany embarked on in the 1950s. During Graham's altar call in Europe, the contours of a trans-Atlantic revival become visible, even if in the long run it was unable to develop a dynamism that could have sustained this moment in these different national and religious contexts--

**About Europe** Denis Guénoun, 2013-02-20 The concept of the universal was born in the lands we now call Europe, yet it is precisely the universal that is Europe's undoing. All European politics is caught in a tension: to assert a European identity is to be open to multiplicity, but this very openness could dissolve Europe as such. This book reflects on Europe and its changing boundaries over the span of twenty centuries. A work of philosophy, it consistently draws on concrete events. From ancient Greece and Rome, to Christianity, to the Reformation, to the national revolutions of the twentieth century, what we today call Europe has been a succession of projects in the name of ecclesia or community. Empire, Church, and EU: all have been constructed in contrast to an Oriental other. The stakes of Europe, then, are as much metaphysical as political. Redefining a series of key concepts such as world, place, transportation, and the common, this book sheds light on Europe as process by engaging with the most significant philosophical debates on the subject, including the work of Marx, Husserl, Heidegger, Patočka, and Nancy.

**Europe's Last Chance** Guy Verhofstadt, 2017-01-03 In the heart of Europe's current crisis, one of the continent's foremost statesmen issues a clarion call to radically remake the European Union in the mold of the United States' own federal government Europe is caught in its greatest crisis since the Second World War. The catalog of ills seems endless: an economic crisis spread through most of Europe's Mediterranean tier that has crippled Greece and driven a wedge between northern and southern Europe; terrorist attacks in Paris, Cologne, Brussels, and Nice; growing aggression from Russia in Ukraine and the Baltic states; and refugees escaping war-torn neighbors. The European Union's inability to

handle any of these disasters was a driving factor in Great Britain voting to leave, and others may soon follow. The result won't just be a continent in turmoil, but also a serious threat to American and British security-the Atlantic, let alone the Channel, simply isn't big enough to keep European troubles in Europe. For everyone's sake, Europe must survive. The question is how. In *Europe's Last Chance*, Guy Verhofstadt-former prime minister of Belgium and current leader of the liberal faction in the European Parliament-provides the essential framework for understanding Europe today, laying bare the absurdity of a system in which each member state can veto legislation, opt in or out of the Euro, or close borders on a whim. But Verhofstadt does not just indict the European Union, he also offers a powerful vision for how the continent can change for the better. The key, argues Verhofstadt, is to reform the European Union along the lines of America's federal government: a United States of Europe strong enough to stand with the United States of America in making a better, safer world. A visionary book from one of today's luminaries of European leadership, *Europe's Last Chance* is a clarion call to save the European Union, one of the world's greatest chances for peace and prosperity.

**Europe and the End of the Age of Innocence** Francesco M. Bongiovanni, 2018-04-02 "Bongiovanni's message should be heeded, especially in Brussels, Berlin and Paris" – John Peet, Political Editor, The Economist Francesco Bongiovanni returns with a sequel to *The Decline and the Fall of Europe*, a book Guardian journalist Nils Pratley labelled 'a wake-up call for the twenty-first century'. Since 2012 Europe has been confronted with new, unexpected game-changing challenges such as the refugee crisis and its human tsunami, the surprise of Brexit and the explosion of 'alternative' politics. Europeans have finally come to realize that the open-societies that they have been comfortably living in are under threat and fragmenting, leaving their survival uncertain. Minorities are falling prey to an Islamist ideology that conveys values and customs diametrically opposed to European ones. Terrorist acts have become the 'new normal', part of daily life. The North-South cleavage brought about by the eurozone crisis is now completed by a deep East-West cleavage born from the refugee crisis. Against this backdrop, a Germany that is not all that it seems has become Europe's de-facto ruler, but is unfit to lead, while Trump's America cannot be counted on as it once used to be, forcing Europe to fend for itself. A beacon of stability and prosperity in the past, a naive and unprepared Europe, facing new and terrifying challenges is today more than ever torn apart, increasingly unstable and adrift.

**The Search for a Common European Foreign and Security Policy A.** Malici, 2008-03-31 When Kissinger lamented, 'When I want to call Europe, I cannot find a phone number', the implication was clear. Since then, the momentum of the EU towards a common foreign and security policy has increased. Yet, the viability of this institutionalization effort is questionable. This book advances a new perspective on this

paradox.

**The Strange Death of Europe** Douglas Murray, 2018-06-14 The Strange Death of Europe is the internationally bestselling account of a continent and a culture caught in the act of suicide, now updated with new material taking in developments since it was first published to huge acclaim. These include rapid changes in the dynamics of global politics, world leadership and terror attacks across Europe. Douglas Murray travels across Europe to examine first-hand how mass immigration, cultivated self-distrust and delusion have contributed to a continent in the grips of its own demise. From the shores of Lampedusa to migrant camps in Greece, from Cologne to London, he looks critically at the factors that have come together to make Europeans unable to argue for themselves and incapable of resisting their alteration as a society. Murray's tremendous and shattering book (The Times) addresses the disappointing failures of multiculturalism, Angela Merkel's U-turn on migration, the lack of repatriation and the Western fixation on guilt, uncovering the malaise at the very heart of the European culture. His conclusion is bleak, but the predictions not irrevocable. As Murray argues, this may be our last chance to change the outcome, before it's too late.

*The Silicon Valley Challenge* Christoph Keese, 2016-10-17 An Insider Report from the Centre of the Digital Universe Silicon Valley shook the European economy to its core. American technology companies are the big winners of digitization. With the capacity to reach billions of people, they are aggressively making inroads into traditional industries. Digital Disruption poses a major threat to European industries such as: automotive, retail, logistics, healthcare, pharmaceuticals, banks, insurance companies and chemicals. No sector is spared from the onslaught of Silicon Valley - with dramatic consequences for workers in Europe. Who is behind Silicon Valley's enormous success? How do the founders and investors think? Where does all the money come from? Why are their universities so successful? In short: How does Silicon Valley function? Christoph Keese, a Berlin-based author and top executive of Axel Springer, the highly digitalized publishing house, lived and worked in Silicon Valley for half a year on behalf of his company. He wrote an account of his experiences in this book. It is a gripping narrative written from the epicenter of the 21st Century: vivid, memorable and well-informed. His book has become a bestseller in Germany. It is now available in English for the first time.

*Democracy in Europe* Daniel Innerarity, 2018-03-01 This book calls for a philosophical consideration of the development, challenges and successes of the European Union. The author argues that conceptual innovation is essential if progress on the European project is to be made; new meanings, rather than financial or institutional engineering solutions, will help solve the crisis. By applying a philosophical approach to diagnosing the EU crisis, the book reconsiders the basic concepts of democracy in the context of the complex reality of the EU and the globalised world where profound social and political changes are taking place. It will be of interest to students and scholars interested in EU politics, political theory and philosophy.

**A History of England** Hilaire Belloc, 1925

**Sites of Exchange** Maurizio Ascari, Adriana Corrado, 2006 Crossing borders - both physically and imaginatively - is part of our 'nomadic' postmodern identity, but transcultural and transnational exchanges have also played a major role in the centuries-long processes of hybridisation that helped to fashion the vast geographic, political and imaginative container of diversity we call Europe. This volume gathers together the work of scholars from several European countries in an attempt to encourage a collective reflection upon historical - and often 'mythical' - locations and landscapes, as well as upon the thresholds and faultlines that unite or separate them. The issues the volume tackles are delicate and complex, for the encounter of differences engenders both curiosity and suspicion and there is no easy way to create a new synthesis while respecting and

promoting diversity. However, since Europe is inevitably a cultural and political entity 'in the making', Europeans should embrace the 'great narrative' of a 'utopian project', uniting their efforts to work towards a civilisation that is grounded on plurality and openness.

**The value of power, the power of values: a call for an EU grand strategy (Egmont Paper 33) ,2009**

*Our European Future: Charting a Progressive Course in the World* Maria João Rodrigues, François Balate, 2021-07 The world is facing many great challenges: from pandemics to climate change, and from increasing inequality to the issues surrounding digitalization. In a new and rapidly changing global landscape, Europe must look for solutions to these difficulties to follow up on its impressive decades-long process of integration. Europe has the capacity to chart a progressive course in the world. Our European Future offers solutions to rethink our socioeconomic model in the glare of the environmental and digital transformations; to redefine Europe's role in the world to contribute to renewed multilateralism; to strengthen investment in public goods; and finally, to re-invent our democratic contract. The book brings together the insights of renowned experts from across Europe, and it should prove a handy guide for any progressive thinker, policymaker or activist, and for any citizen who would like to take part in the necessary democratic debate about our future. This book, edited by Maria João Rodrigues with the collaboration of François Balate, is a first contribution from the Foundation for European Progressives Studies to the Conference on the Future of Europe and beyond.

*The End of the West* David Marquand, 2012-08-26 Why Europe is on the decline—and what can be done about it Has Europe's extraordinary postwar recovery limped to an end? It would seem so. The United Kingdom, Belgium, France, Italy, and former Soviet Bloc countries have experienced ethnic or religious disturbances, sometimes violent. Greece, Ireland, and Spain are menaced by financial crises. And the euro is in trouble. In *The End of the West*, David Marquand, a former member of the British Parliament, argues that Europe's problems stem from outdated perceptions of global power, and calls for a drastic change in European governance to halt the continent's slide into irrelevance. Taking a searching look at the continent's governing institutions, history, and current challenges, Marquand offers a disturbing diagnosis of Europe's ills to point the way toward a better future. Exploring the baffling contrast between postwar success and current failures, Marquand examines the rebirth of ethnic communities from Catalonia to Flanders, the rise of xenophobic populism, the democratic deficit that stymies EU governance, and the thorny questions of where Europe's borders end and what it means to be European. Marquand contends that as China, India, and other nations rise, Europe must abandon ancient notions of an enlightened West and a backward East. He calls for Europe's leaders and citizens to confront the painful issues of ethnicity, integration, and economic cohesion, and to build a democratic and federal structure. A wake-up call to those who cling to ideas of a triumphalist Europe, *The End of the West* shows that the continent must draw on all its reserves of intellectual and political creativity to thrive in an increasingly turbulent world, where the very language of East and West has been emptied of meaning. In a new preface, Marquand analyzes the current Eurozone crisis—arguing that it was inevitable due to the absurdity of combining monetary union with fiscal disunion—and raises some of the questions Europe will have to face in its recovery.

*Europe* Wendy Vierow, 2003-09-01 Europe, the second smallest continent on Earth, has 43 countries. Some geographers consider Europe part of a landmass that includes Asia, called Eurasia. Actually, it is a large peninsula, or mass of land that is surrounded on three sides by water. Europe's climate ranges from frozen tundra to warm Mediterranean. The first great civilization in Europe reached its height in Greece about 2,500 years ago. Since then, empires have risen and fallen in Europe. Today, many different ethnic groups call

Europe home.
