Guns, Grenades, and Grunts Gerald A. Voorhees,Joshua Call,Katie Whitlock,2012-11-02 Known for their visibility and tendency to generate controversy, first-person shooter (FPS) games are cultural icons and powder-kegs in American society. Contributors will examine a range of FPS games such as the Doom, Half-Life, System Shock, Deus Ex, Halo, Medal of Honor and Call of Duty franchises. Games and Gamification in Market Research Betty

Adamou,2018-11-03 Games are the most engaging medium of all time: they harness storytelling and heuristics, drive emotion and push the evolution of technology in a way that no other platform has or can. It's no surprise, then, that games and gamification are revolutionizing the market research industry, offering opportunities to reinvigorate the notoriously sluggish engagement levels seen in traditional surveying methods. This not only improves data quality, but offers untapped insights unattainable through traditional methods. Games and Gamification in Market Research shows readers how to design ResearchGames and Gamified Surveys that will intrinsically engage participants and how best to use these methodologies to become, and stay, commercially competitive. In a world where brands and organizations are increasingly interested in the feelings and contexts that drive consumer choices, Games and Gamification in Market Research gives readers the skills to use the components in games to encourage play and observe consumer behaviours via simulations for predictive modelling. Written by Betty Adamou, the UK's leading research game designer and named as one of seven women shaping the future of market research, it explains the ways in which these methodologies will evolve with technologies such as virtual reality and artificial intelligence, and how it will shape research careers. Alongside a companion website, this book provides a fully immersive and fascinating overview of game-based research.

The Interface Envelope James Ash,2016-08-25 In The

Interface Envelope, James Ash develops a series of concepts to understand how digital interfaces work to shape the spatial and temporal perception of players. Drawing upon examples from

videogame design and work from post-phenomenology, speculative realism, new materialism and media theory, Ash argues that interfaces create envelopes, or localised foldings of space time, around which bodily and perceptual capacities are organised for the explicit production of economic profit. Modifying and developing Bernard Stiegler's account of psychopower and Warren Neidich's account of neuropower, Ash argues the aim of interface designers and publishers is the production of envelope power. Envelope power refers to the ways that interfaces in games are designed to increase users perceptual and habitual capacities to sense difference. Examining a range of examples from specific videogames, Ash identifies a series of logics that are key to producing envelope power and shows how these logics have intensified over the last thirty years. In turn, Ash suggests that the logics of interface envelopes in videogames are spreading to other types of interface. In doing so life becomes enveloped as the environments people inhabit becoming increasingly loaded with digital interfaces. Rather than simply negative, Ash develops a series of responses to the potential problematics of interface envelopes and envelope power and emphasizes their pharmacological nature.

Social-Behavioral Modeling for Complex Systems Paul K. Davis, Angela O'Mahony, Jonathan Pfautz, 2019-03-13 This volume describes frontiers in social-behavioral modeling for contexts as diverse as national security, health, and on-line social gaming. Recent scientific and technological advances have created exciting opportunities for such improvements. However, the book also identifies crucial scientific, ethical, and cultural challenges to be met if social-behavioral modeling is to achieve its potential. Doing so will require new methods, data sources, and technology. The volume discusses these, including those needed to achieve and maintain high standards of ethics and privacy. The result should be a new generation of modeling that will advance science and, separately, aid decision-making on major social and security-related subjects despite the myriad uncertainties and complexities of social phenomena. Intended to be relatively comprehensive in scope, the volume balances theory-driven, data-driven, and hybrid approaches. The latter may be rapidly iterative, as when artificial-intelligence methods are coupled with theory-driven insights to build models that are sound, comprehensible and usable in new situations. With the intent of being a milestone document that sketches a research agenda for the next decade, the volume draws on the wisdom, ideas and suggestions of many noted researchers who draw in turn from anthropology, communications, complexity science, computer science, defense planning, economics, engineering, health systems, medicine, neuroscience, physics, political science, psychology, public policy and sociology. In brief, the volume discusses: Cutting-edge challenges and opportunities in modeling for social and behavioral science Special requirements for achieving high standards of privacy and ethics New approaches for developing theory while exploiting both empirical and computational data Issues of reproducibility, communication, explanation, and validation Special requirements

for models intended to inform decision making about complex social systems

The Truth in Hell and Other Essays on Politics and Culture, 1935-1987 Hans Speier, 1989-11-23 Long known as a pioneer in the sociological study of communications and of the middle class, and as a prominent member of the New School's University in Exile, Hans Speier here presents a humanist view of the darker side of contemporary civilization and offers insights into the nature of social order and the role of uncommon people in it: the Hero, the Fool, and the political philosopher. After an autobiographical discussion of the evolution of his works, this collection of seminal essays that span his whole career surveys five areas of thought: social theory, war and militarism, public opinion and propaganda, the history of literature, and the present and the future. Reflecting the range of his intellectual concerns and his experience as a refugee from Nazi Germany, his writings examine honor and social structure, hero worship, militarism in the eighteenth century, psychological warfare, and Shakespeare's *The Tempest*, among other topics.

Historia Ludens Alexander von Lünen, Katherine J. Lewis, Benjamin Litherland, Pat Cullum, 2019-08-30 This book aims to further a debate about aspects of playing and gaming in connection with history. Reaching out to academics, professionals and students alike, it pursues a dedicated interdisciplinary approach. Rather than only focusing on how professionals could learn from academics in history, the book also ponders the question of what academics can learn from gaming and playing for their own practice, such as gamification for teaching, or using play as a paradigm for novel approaches into historical scholarship. Playing and gaming are thus understood as a broad cultural phenomenon that cross-pollinates the theory and practice of history and gaming alike.

What To Consider if You're Considering College — Taking Action Bill Morrison, Ken S. Coates, 2015-05-23 Going to college used to be a passport to future success, but that's no longer the case. For some students, it's still a good choice that

leads to a successful career after graduation, but for many their degrees are worthless pieces of paper. Choose the wrong program and graduation is more likely to lead to disillusionment and debt than a steady paycheck. Yet parents, guidance counselors, and politicians still push higher education as if it's the only option for building a secure future. In this book, Ken S. Coates and Bill Morrison set out to explore the many educational opportunities and career paths open to Canadian high-school students and those in their twenties. This book is designed to help young adults decide whether to pursue a degree, enrol for skills training, or investigate one of the many other options that are available. In this special excerpt, we consider the world outside academia and some real-world options, such as: 1. Volunteering as a Launch Pad, 2. Travel: Discover the World, 3. Entrepreneurship: Why Wait to Be Your Own Boss? 4. Give Work a Chance, and 5. Apprenticeship and the Skilled Trades. This book will help you consider all the options in a clear, rational way.
