Creating Powerful Radio Valerie Geller, 2009-10-15 First Published in 2007. Routledge is an imprint of Taylor & Francis, an informa company.

Rushed to Judgment David Christopher Barker, 2002 This book systematically examines the manner and extent to which listening to talk radio results in persuasion. The focus is on the medium's ringleader--Rush Limbaugh--the talk show host with the largest audience by far.

Terror by Invasion Richard D. Ondo, 2006-07 Suddenly, without warning the life preservers on everyone on the party boats started to erupt in a great explosion. The party boats exploded from underneath the waterline. The scene was quickly littered with debris, human remains, and a cloud of smoke. So quick was the explosion and fire that the lake seemed to blink an eye and erase much of the carnage. The wind blew the smoke from the scene. What was once a heavenly voyage turned into a watery grave site. Missing was the tombstones. Only the seagulls seemed to be ready to pick apart the minuscule pieces of a boat ride gone mad. Who is monitoring the ships and boats that pass across

Lake Erie? The United States is extremely vulnerable on the south shore of the lake. Therefore, it only makes sense to have protection in place along the northern shoreline to prevent a major terrorist act against our nuclear power plants and fresh water supply. Terror by Invasion is a warning of the potential for this type of attack. It's up to all Americans to be on guard for terrorist cells already operating in the United States, and to become part of the plan for defending our country.

The Bohemian Grove Mark Dice, 2015-07-01 The secretive and strange Bohemian Grove is an elite men's club hidden deep within a 2700-acre redwood forest in Northern California, where each July the most powerful men in the world gather for what's called their annual Summer Encampment. Is this mysterious meeting "just a vacation spot" for the wealthy and well-connected, or is it something more? Does it operate as an off the record consensus building organization for the elite establishment? What major plans or political policies were given birth by the club? Do they really kickoff their gathering each year with a human sacrifice ritual? Is this the infamous Illuminati? After getting his hands on some rare copies of the club's yearbooks; obtaining an actual official membership list smuggled out by an employee; and having personally been blocked from entering the club by police—secret society expert Mark Dice uncovers *The Bohemian Grove: Facts & Fiction*. Us Against Them Randy Bobbitt,2010-05-25 Us against Them examines the phenomenon of talk radio and the role that it plays in the American political process as well as popular culture. Utilizing historical accounts of the industry's growth, biographies of well-known hosts, and interviews with individuals working in the industry, Randy Bobbitt explores why people choose to listen to political talk instead of music when they turn on their radio.

Algorithms for the People Josh Simons,2023-01-10 How to put democracy at the heart of AI governance Artificial intelligence and machine learning are reshaping our world. Police forces use them to decide where to send police officers, judges to decide whom to release on bail, welfare agencies to decide which children are at risk of abuse, and Facebook and Google to rank content and distribute ads. In these spheres, and many others, powerful prediction tools are changing how decisions are

made, narrowing opportunities for the exercise of judgment, empathy, and creativity. In *Algorithms for the People*, Josh Simons flips the narrative about how we govern these technologies. Instead of examining the impact of technology on democracy, he explores how to put democracy at the heart of AI governance. Drawing on his experience as a research fellow at Harvard University, a visiting research scientist on Facebook's Responsible AI team, and a policy advisor to the UK's Labour Party, Simons gets under the hood of predictive technologies, offering an accessible account of how they work, why they matter, and how to regulate the institutions that build and use them. He argues that prediction is political: human choices about how to design and use predictive tools shape their effects. Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics. Showing the connection between technology regulation and democratic reform, Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy.

There's no competing national media source analyzing what is presented by him three hours a day on over 600 radio stations. It covers every key issue, among them: politics, the environment, health care, national defense, human rights, racism, conservatism, liberalism, the media. Selling in the Real World Larry Sternlieb,2023-08-08 Sales is an art form. Sales strategies are

required everywhere, for everyone. They're used all the time: to get a raise, to get a date, or even to get a high-level executive to agree to a twenty-million dollar order. The better someone is at selling themselves, their ideas, and/or their product, the better their results. Rather than a list of tricks, *Selling in the Real World* is strategic guide of plans, behaviors, and attitudes that will improve an individual's ability to sell. Larry Sternlieb's approach features stress-tested principles for anyone to create an easy-to-understand track to run on. And a better track always produces results—results that are easier, faster, and unbeatable. *Selling in the Real World* is not a feel-good book. It was designed to be hard-hitting, to provide a solid track for both the experienced sales professional looking to refocus and polish their skills, as well as for those about to create their livelihood from the art of sales for the first time.

Shrinkage: Manhood, Marriage, and the Tumor That Tried to Kill Me Bryan Bishop, 2014-04-29 The popular sidekick from *The Adam Carolla Show* traces his battle against an inoperable brain tumor, describing how his promising future was upended by challenging treatments, confrontations with his

mortality and his new life outlook. 50,000 first printing.

Making It Home Teresa Strasser, 2023-06-06 An aching heartfelt and surprisingly funny memoir about family, grief, and moving forward by an award-winning writer and TV personality. When her brother dies from cancer, and then her mother just four months later, Teresa Strasser has no one to mourn with but her irresponsible, cantankerous, trailerpark-dwelling father. He claims not to remember her chaotic childhood, but he's a devoted grandpa, so as her son embarks on his first season pitching in Little League, Teresa and Nelson form a grief group of two in beach chairs lined up behind the first base line. There are no therapeutically trained facilitators and no rules other than those dictated by the Little League of America, and the human heart. For Teresa and her father, the stages of grief are the draft, the regular season, and the playoffs. One season of baseball becomes the framework for a memoir about family, loss, and the fundamentals of baseball and life. They cheer, talk smack about other teams, scream at each other in the parking lot, and care way too much about Little League. Making It Home is a bracingly honest journey through grief, self-doubt, and anxiety armed with humor and optimism. After all, America's pastime may be just a game, but it always leaves room for

redemption, even at the bottom of the lineup.
