**Policing the 2012 London Olympics** Gary Armstrong, Richard Giulianotti, Dick Hobbs, 2016-06-17 The summer Olympic Games are renowned for producing the world's biggest single-city cultural event. While the Olympics and other sport mega-events have received growing levels of academic investigation from a variety of disciplinary approaches, relatively little is known about how such occasions are experienced directly by local host communities and publics. This ethnography examines the everyday policing of the London Borough of Newham in relation to the London 2012 Olympics. It explains how police defined, monitored, prioritized, contained and investigated 'Olympic-related' crime, and how 'Olympic-related' policing connected to the policing of Newham. The authors examine how the threat of terrorism impacted on the everyday policing of the 2012 Olympics, as well as the exaggeration of other threats to the Games – such as youth gangs – for political reasons. The book also explores local resistance to Olympic policing, and the legacy of the Games with regard to policing, local housing, demographics and social exclusion. Discussing the lessons that can be learned for the future staging of sporting mega-events, this book will appeal to scholars and students with interests in sport, policing, crime and criminology, mega-events, event management, urban studies, global studies and sociology.

**E-commerce Platform Acceptance** Ewelina Lacka, Hing Kai Chan, Nick Yip, 2014-06-02 This book aims to offer a comprehensive overview of the issues facing organizations when deciding whether to accept e-commerce as a platform for business. It provides a detailed evaluation of how the implementation of e-commerce may affect all parties within the supply chain: suppliers, retailers and consumers. It also compares various opportunities and threats of accepting e-commerce in order to conclude whether it might offer access to a new digital era, or whether it is an uncertain option yielding potential pitfalls. This book helps to reveal existing and future consequences of e-commerce acceptance, which are crucial for business decisions and operations in the present and going forward. It therefore provides a unique insight into emerging e-commerce platform acceptance and is one of the first to provide a holistic perspective of how each party in the supply chain is affected by e-commerce acceptance. E-commerce is bringing into view more flexible, effective and efficient ways of conducting business activities among suppliers, retailers and consumers. It is not limited to time and space and therefore this digital platform has already established for itself a major role in today's world economy. Despite promised benefits however, threats emerge which need to be faced when turning to the virtual marketplace - all of which have to be acknowledged before businesses will shift and adapt to the e-commerce platform. This book is intended for postgraduate students, executive MBA students and researchers interested in information management, marketing and operations management.

**Traveling with Sugar** Amy Moran-Thomas, 2019-11-26 Traveling with Sugar reframes the rising diabetes epidemic as part of a five-hundred-year-old global history of sweetness and power. Amid eerie injuries, changing bodies, amputated limbs, and untimely deaths, many people across the Caribbean and Central America simply call the affliction “sugar”—or, as some say in Belize, “traveling with sugar.” A decade in the making, this book unfolds as a series of crónicas—a word meaning both slow-moving story and slow-moving disease. It profiles the careful work of those “still fighting it” as they grapple with unequal material infrastructures and unsettling dilemmas. Facing a new incarnation of blood sugar, these individuals speak back to science and policy misrecognitions that have prematurely cast their lost limbs and deaths as normal. Their families’ arts of maintenance and repair illuminate ongoing struggles to survive and remake larger systems of food, land, technology, and medicine.

*Luc Tuymans* Eva Meyer-Hermann, 2018-01-09 This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works from the vital early years of his career Credited with a key role in the revival of painting in the 1990s, Belgian artist Luc Tuymans (b. 1958) continues to produce subtle, and at times unsettling, works that engage with history, technology, and everyday life. This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works that were vital to his artistic development. The years 1972 to 1994 witnessed the maturation of his signature method of painting from preexisting imagery--such as magazine images, Polaroids, and television footage--as well as his first solo exhibition. Also dating from this period are many of his seminal canvases, along with ten poignant portraits of the ailing human body and the enigmatic series *Superstition* that comprised his first works exhibited in the United States. The catalogue features brilliant new photography of each of the paintings and an illustrated chronology with archival images and installation shots of the works in this volume. This publication is a testament to Tuymans's persistent assertion of the relevance and importance of painting--a conviction that he maintains even in today's digital world, when his work continues to be a touchstone for artists and scholars.

Clemens, Clifford Rosen, 2019-08-22 Preface from the first edition (1996): The world of modern science is undergoing a number of spectacular events that are redefining our understanding of ourselves. As with any revolution, we should take stock of where we have been, where we are, and where we are going. Our special world of bone biology is participating in and taking advantage of the larger global revolution in modern science... we assembled experts from all over the world and asked them to focus on the current state of knowledge and the prospects for new knowledge in their area of expertise. To this end, *Principles of Bone Biology* was conceived. - John P. Bilezikian, Lawrence G. Raisz, Gideon A. Rodan Praise for the previous edition: Students, teachers, and practitioners will benefit from reading it, and investigators will use it as a reference work; it will certainly be consulted frequently. --The New England Journal of Medicine For over two decades, *Big Gray* has been the go-to repository of knowledge in the disciplines related to bone and mineral metabolism. The fourth edition is a must-have for students new to the field; young investigators at the graduate or postgraduate level beginning their research careers; established scientists who need to keep up with the changing nature of the field, looking to enrich their own research programs, or who are changing their career direction; clinicians who want ready access to up-to-date relevant basic science. This new edition builds on the successful formula from previous editions, taking the reader from the basic elements of fundamental research to the most sophisticated concepts in therapeutics. *Principles of Bone Biology, Fourth Edition* provides the most comprehensive, authoritative reference on the study of bone biology and related diseases. Bone research continues to generate enormous attention, due to the broad public health implications of osteoporosis and related bone disorders. **Historic Cities in the Face of Disasters** Fatemeh Farnaz Arefian,Judith Ryser,Andrew Hopkins,Jamie Mackee,2021-09-13 This book examines reconstruction and resilience of historic cities and societies from multiple disciplinary and complementary perspectives and, by doing so, it helps researchers and practitioners alike, among them reconstruction managers, urban governance and professionals. The book builds on carefully selected and updated papers accepted for the 2019 Silk Cities international conference on ‘reconstruction, recovery and resilience of historic cities and societies’, the third Silk Cities conference held in L’Aquila, Italy, 10-12 July 2019, working with University of L’Aquila and UCL. This multi-scale, and multidisciplinary book offers cross-sectoral and complimentary voices from multiple stakeholders, including academia, urban governance, NGOs and local populations. It examines post-disaster reconstruction strategies and case studies from Europe, Asia and Latin America that provide a valuable collection for anyone who would like to get a global overview on the subject matter. It thereby enables a deeper understanding of challenges, opportunities and approaches in dealing with historic cities facing disasters at various geographical scales. Additionally, it brings together historical approaches to the reconstruction of historical cities and those of more recent times. Thus, it can be used as a reference book for global understanding of the subject matter.

**Multi-hazard Approaches to Civil Infrastructure Engineering** Paolo Gardoni,James M. LaFave,2016-06-22 This collection focuses on the development of novel approaches to address one of the most pressing challenges of civil engineering, namely the mitigation of natural hazards. Numerous engineering books to date have focused on, and illustrate considerable progress toward, mitigation of individual hazards (earthquakes, wind, and so forth.). The current volume addresses concerns related to overall safety, sustainability and resilience of the built environment when subject to multiple hazards: natural disaster events that are concurrent and either correlated (e.g., wind and surge); uncorrelated (e.g., earthquake and flood); cascading (e.g., fire following earthquake); or uncorrelated and occurring at different times (e.g., wind and earthquake). The authors examine a range of specific topics including methodologies for vulnerability assessment of structures, new techniques to reduce the system demands through control

systems; instrumentation, monitoring and condition assessment of structures and foundations; new techniques for repairing structures that have suffered damage during past events, or for structures that have been found in need of strengthening; development of new design provisions that consider multiple hazards, as well as questions from law and the humanities relevant to the management of natural and human-made hazards.

Sport and Society in Global France Cathal Kilcline,2019-01-23 This book provides new insights into the evolution of the global sporting spectacle over the last thirty years through an analysis of star athletes, emblematic organisations and key locations in French sport, highlighting how sport has influenced (and been implicated in) debates over nationhood, immigration, commemorative practice, and de-industrialisation.

Poems for the Millennium, Volume Four Pierre Joris,Habib Tengour,2013-01-31 In this fourth volume of the landmark Poems for the Millennium series, Pierre Joris and Habib Tengour present a comprehensive anthology of the written and oral literatures of the Maghreb, the region of North Africa that spans the modern nation states of Libya, Tunisia, Algeria, Morocco, and Mauritania, and including a section on the influential Arabo-Berber and Jewish literary culture of Al-Andalus, which flourished in Spain between the ninth and fifteenth centuries. Beginning with the earliest pictograms and rock drawings and ending with the work of the current generation of post-independence and diasporic writers, this volume takes in a range of cultures and voices, including Berber, Phoenician, Jewish, Roman, Vandal, Arab, Ottoman, and French. Though concentrating on oral and written poetry and narratives, the book also draws on historical and geographical treatises, philosophical and esoteric traditions, song lyrics, and current prose experiments. These selections are arranged in five chronological diwans or chapters, which are interrupted by a series of books that supply extra detail, giving context or covering specific cultural areas in concentrated fashion. The selections are contextualized by a general introduction that situates the importance of this little-known culture area and individual commentaries for nearly each author.

Reliability-Based Analysis and Design of Structures and Infrastructure Ehsan Noroozinejad Farsangi,Mohammad Noori,Paolo Gardoni,Izuru Takewaki,Humberto Varum,Aleksandra Bogdanovic,2021-09-27 Increasing demand on improving the resiliency of modern structures and infrastructure requires ever more critical and complex designs. Therefore, the need for accurate and efficient approaches to assess uncertainties in loads, geometry, material properties, manufacturing processes, and operational environments has increased significantly. Reliability-based techniques help develop more accurate initial guidance for robust design and help to identify the sources of significant uncertainty in structural systems. Reliability-Based Analysis and Design of Structures and Infrastructure presents an overview of the methods of classical reliability analysis and design most associated with structural reliability. It also introduces more modern methods and advancements, and emphasizes the most useful methods and techniques used in reliability and risk studies, while elaborating their practical applications and limitations rather than detailed derivations. Features: Provides a practical and comprehensive overview of reliability and risk analysis and design techniques. Introduces resilient and smart structures/infrastructure

that will lead to more reliable and sustainable societies. Considers loss elimination, risk management and life-cycle asset management as related to infrastructure projects. Introduces probability theory, statistical methods, and reliability analysis methods. Reliability-Based Analysis and Design of Structures and Infrastructure is suitable for researchers and practicing engineers, as well as upper-level students taking related courses in structural reliability analysis and design.
