Visual Methods in the Field Terence Heng,2016-11-10 The use of images, particularly photography, has been steadily gaining popularity in academia, but there has not yet been a book that deals with the act and process of photo-taking in the field. Drawing upon 21 years of photographic experience and sociological research, Terence Heng's immersive and narrative style will: introduce photography as a qualitative method; discuss the intricacies of, challenges in and opportunities for using a camera in the field; explore common themes and topics in social science research, including photographing rituals, space, people and objects; advise on navigating the always evolving technological landscapes of traditional, digital and mobile photography. **Visual Methods in the Field: Photography for the Social Sciences** is a photography guide written for researchers by a researcher. Using in-depth ethnographic case studies from research done in various urban environments, this book will act as a crucial bridge for students in geography, sociology, education, media studies and other social sciences to incorporate photography into their research repertoire.

Biologically Motivated Computer Vision Seong-Whang Lee, Heinrich H. Bülthoff, Tomaso Poggio, 2003-07-31 It is our great pleasure and honor to organize the First IEEE Computer Society International Workshop on Biologically Motivated Computer Vision (BMCV 2000). The workshop BMCV 2000 aims to facilitate debates on biologically motivated vision systems and to provide an opportunity for researchers in the area of vision to see and share the latest developments in state-of-the-art technology. The rapid progress being made in the field of computer vision has had a tremendous impact on the modeling and implementation of biologically motivated computer vision. A multitude of new advances and findings in the domain of computer vision will be presented at this workshop. By December 1999 a total of 90 full papers had been submitted from 28 countries. To ensure the high quality of workshop and proceedings, the program committee selected and accepted 56 of them after a thorough review process. Of these papers 25 will be presented in 5 oral sessions and 31 in a poster session. The papers span a variety of topics in computer vision from computational theories to their implementation. In addition to these excellent presentations, there will be eight invited lectures by distinguished scientists on "hot" topics. We must add that the program committee and the reviewers did an excellent job within a tight schedule.

Double Dirty Mountain Men Parker Grey, 2022-10-03 Rose is a sweet, innocent little flower... and we're about to claim her. Together. We're rough, rugged, and rock-hard. Living alone on this mountain means fending for yourself, facing the elements, and handling whatever nature can throw at you. Like a girl, in the middle of nowhere, half-frozen to death. But Rose isn't just any girl. She's gorgeous, sweet as can be, and totally inexperienced. From the second we find her, we both want her - we want to take her, own her, possess her in every way we can and then some. And we don't mind sharing... Her first time shouldn't be with two hard, rough mountain men at once. But men like us can only hold back for so long. This sweet, untouched girl is gonna be ours. *Double Dirty Mountain Men* is a very dirty novella about two hard, rugged, rough mountain men who find themselves totally obsessed with the same girl!

And don't worry - as an MFM menage, all the attention is on HER. If you're looking for a cheesy, steamy, over-the-top dirty-but-sweet book, you're in the right place!
