**Canadian Climate of Mind** Timothy B. Leduc,2016-05-01 The twenty-first century is a period of great environmental and social transformation as climate change increasingly marks lives at levels that are personal, familial, communal, national, and global. A Canadian Climate of Mind presents stories that emerge from the waters, lands, and climate of Canada, and which have the potential to renew a compassionate energy for changing human relations with each other and with our world. The turbulent effects of climate change are popularly discussed in the modern language of scientific knowledge, political policies, economic mechanisms, and technological innovation. While there is much to be learned from these views, Timothy Leduc suggests a more profound call for change by returning to past understandings of the land and climate. He argues that the world is initiating us into a broader and humbler sense of what it is to be human in an interconnected reality. The world is doing this by responding to unsustainable practices such as our devastating reliance on fossil fuels. Weaving together voices from numerous backgrounds and time periods with Indigenous views on present and past environmental challenges, A Canadian Climate of Mind illuminates a world that is being shaken to its core while we hesitate to act.

**Canada's Weather** Chris St. Clair,2012-10-02 A comprehensive guide to weather phenomena in Canada.

Extreme Canadian Weather Joan Dixon,2009-05-12 Weather is the quintessential Canadian story. Despite it's characterization in the rest of the world as a land of bush and blizzards, Canada is a country of geographical and climatic variations. It experiences just about every type of extreme weather possible - tornadoes, droughts, dust storms, ice storms, hail storms, hurricanes, floods - in addition to lots of snowstorms. The weather is rarely boring and there are times when it has been so extreme, it has surprised everyone.

*Climate in the Age of Empire* Victoria C. Slonosky,American Meteorological Society,2018 Investigates the work of early Canadian weather observers who were schooled and working in the scientific tradition inherited from Europe, the scientific community they built, and their attitudes toward climate change.--

The Canadian Climate Mary Alice Downie, Barbara Robertson, Elizabeth Jane Errington, Mary Ann Shadd, 2015-10-18 This selection of writings by twenty-nine women, known and unknown, professional and amateur, presents a unique portrait of Canada through time and space, from the seventeenth to the early twentieth centuries, from the Maritimes to British Columbia and the Far North. There is a range of voices from high-born wives of governors general, to an Icelandic immigrant and a fisherman's wife in Labrador. A Loyalist wife and mother describes the first hard weather in New Brunswick, a seasick nun tells of a dangerous voyage out from France, a famous children's writer writes home about the fun of canoeing, and a German general's wife describes habitant customs. All demonstrate how women's experiences not only shared, but helped shape this new country.

*Surface Climates of Canada* Timothy R. Oke, W.G. Bailey, Wayne Rouse, 1998-01-15 In the opening chapters contributors lay out the large-scale context of the physical climate of Canada, introducing the processes, balances, and dynamic linkages between the surface and atmosphere that create and maintain the diversity of surface climates found in Canada as well as outlining the nature of the physical processes that operate near the ground's surface. Individual chapters are dedicated to snow and ice - the almost universal surface cover in Canada - and the other major natural surface environments of Canada: ocean and coastal zones, fresh water lakes, wetlands, arctic islands, low arctic and subarctic lands, forests, and alpine environments. The final part of the book considers those surface environments that have been strongly influenced by human activity, such as agricultural lands and urban environments, and examines the prospects for future climate change. Bringing together for the first time a wide range of scholarship by leading climatologists, *The Surface Climates of Canada* will be an indispensable tool for understanding Canada's surface climates and the processes responsible for their creation and control. Contributors include Brian D. Amiro (AECL), W.G. Bailey (Simon Fraser), Richard Bello (York), Terry J. Gillespie (Guelph), Barry E. Goodison (Atmospheric Environment Service), F. Kenneth Hare (emeritus professor, Toronto), L.D. Danny Harvey (Toronto), Owen Hertzman (Dalhousie), Peter M. Lafleur (Trent), J. Harry McCaughey (Queen's), Linda Mortsch (Environment Canada), R. Ted Munn (Toronto), D. Scott Munro (Toronto), Atsumu Ohmura (Swiss Federal Institute of Technology), Timothy R. Oke (UBC), John W. Pomeroy (Environment

Canada), Alexander W. Robertson (Canadian Forest Service), Nigel T. Roulet (McGill), Wayne R. Rouse (McMaster), Ian R. Saunders (Simon Fraser), William M. Schertzer (Environment Canada), Hans-Peter Schmid (Indiana), David L. Spittlehouse (BC Ministry of Forests), Douw G. Steyn (UBC), John L. Walmsley (Atmospheric Environment Service), John D. Wilson (Alberta), Ming-Ko Woo (McMaster).

**Metmen in Wartime** Morley K. Thomas, 2001 Everybody's talking about the weather... *Metmen in Wartime* is a detailed account of the meteorological services in practice in Canada during World War II. Why were forecasts so crucial during the war? For anti-submarine warfare and convoy protection operations from bases along the Atlantic and Pacific coasts. But *Metmen* is also a thorough examination of the men behind the forecasts: the nearly 400 science graduates who became metmen and were stationed at flying training schools. This book explains the importance of aviation weather forecasts and instruction in meteorology for student pilots at the Royal Canadian Air Force stations established under the British Commonwealth Air Training Plan. Cooperation with the United States military weather services is also examined.

*Meteorology Today: An Introduction to Weather, Climate, and the Environment* C. Donald Ahrens, 2015-05-11 *Meteorology Today*, Second Canadian Edition, combines the latest in Canadian weather, climate, and Earth science research to introduce students to the atmosphere. This engaging and highly visual text shows students how to observe, calculate, and synthesize information as budding scientists, systematically analyzing meteorological concepts and issues. Specific discussions centre on severe weather systems such as tornadoes, thunderstorms, and hurricanes as well as on everyday elements such as wind, precipitation, condensation, air masses and fronts, and energy and its role in the atmosphere. Events and issues dominating today's news cycles also receive thorough attention and include analysis of drought on the Canadian prairies, flooding in southern Alberta, changing sea ice in the Arctic, recent findings from the Intergovernmental Panel on Climate Change, and more. *Meteorology Today* is a dynamic learning resource packed with self-testing features such as end-of-chapter summaries, key terms, review questions, exercises and problems that take student learning to atmospheric heights.
