*The Routledge Companion to Radio and Podcast Studies* Mia Lindgren,Jason Loviglio,2022-06-15 This comprehensive companion is a much-needed reference source for the expanding field of radio, audio, and podcast study, taking readers through a diverse range of essays examining the core questions and key debates surrounding radio practices, technologies, industries, policies, resources, histories, and relationships with audiences. Drawing together original essays from well-established and emerging scholars to conceptualize this multidisciplinary field, this book's global perspective acknowledges radio's enduring affinity with the local, historical relationship to the national, and its unpredictably transnational reach. In its capacious understanding of what constitutes radio, this collection also recognizes the latent time-and-space shifting possibilities of radio broadcasting, and of the myriad ways for audio to come to us 'live.' Chapters on terrestrial radio mingle with studies of podcasts and streaming audio, emphasizing continuities and innovations in form and content, delivery and reception, production cultures and aesthetics, reminding us that neither 'radio' nor 'podcasting' should be approached as static objects of analysis but rather as mutually constituting cultural forms. This cutting-edge and vibrant companion provides a rich resource for scholars and students of history, art theory, industry studies, journalism, media and communication, cultural studies, feminist analysis, and postcolonial studies. **The Web and Parents** Judy Hauser,2009-09-23 This introduction of Web 2.0 tools is written for parents who want to understand how their children are using today's Internet, both in school and in their social lives. For parents who want to raise their comfort level with today's Web capabilities, for those who want to enhance their children's Internet usage in and out of school, and for those who want to be prepared for potential dark alleys in the online world, The Web and Parents: Are You Tech Savvy? is a welcome new resource. Don't know a blog from a Wiki? MySpace from Facebook? An RSS feed from an instant message? The Web and Parents provides a brief introduction to these and other aspects of Web 2.0, including podcasts, forums, graphic generators, photo storage and file-sharing sites, and more. Parents will get a sense of what each tool or resource does, how they themselves might use them—lots of grownups do, really—and the role each plays in current K-12 education and in the lives of school-age children. With this crash course on today's Internet, the Web becomes a place where families come together, not drift apart.

**Take Control of macOS Media Apps** Kirk McElhearn,2024-04-12 Discover Apple's Music, TV, Podcasts, and Books apps Version 1.9, updated April 12, 2024 Are you bewildered with the apps that replaced iTunes in macOS? Befuddled by Apple Music? Do you want to customize the Music app sidebar? Wish you could organize your podcasts? Wondering what the difference is between loves and stars? In this book, Kirk McElhearn (author of three previous Take Control titles on iTunes, going back to 2010) explains not only how Apple's media apps work, but also how normal people can make the Music, TV, Podcasts, and Books apps do what they want. Starting in macOS 10.15 Catalina, Apple finally did away with iTunes. In its place are three new apps—Music, TV, and Podcasts—with audiobooks now handled by the Books app and syncing of mobile devices handled by the Finder. Where once iTunes was an all-purpose media hub, now you may use up to five apps to accomplish the same things. The new apps also add more features (while, sadly, removing a few things too). Take Control of macOS Media Apps is your guide to the post-iTunes world. Kirk McElhearn, whose earlier books on iTunes 10, 11, and 12 collectively sold nearly 14,000 copies, is back with a new book that shows you how to manage your music, videos, podcasts, and audiobooks in Catalina and later. Whether you just want to play your media, or you want to go deeper with special features like Genius, Shuffle, Playing Next, Apple Music, and iTunes Match, this comprehensive guide has the answers you need. Kirk also looks at various ways of bringing audio and video into Apple's media apps, tagging songs and videos so you can find them more easily later, creating playlists, sharing your library over a home network, and syncing media with your iPhone, iPad, or iPod. The book covers how to: • Play Music: Learn the basics of playing audio (and even music videos) in the Music app. You'll also find tips on making quick playlists with Genius and Playing Next, learn the best ways to search for the music you want to hear, stream music to other devices in your home, and view lyrics while tunes play. • Stream Music: Use Apple Music, a paid service, to listen to any of 100 million tracks. Or listen to live broadcasts from Apple Music Radio (including Apple Music 1). • View Your Music and Other Content: Learn how to use the sidebar, view your music library, and work with contextual menus in the Music app. • Store Your Music Library in the Cloud: What are the pros and cons of using the Sync Library setting to store your music in the cloud? How do Music and iTunes Match figure out whether to upload

your music when that setting is enabled? You'll get answers to these questions and more.

- **Use the iTunes Store:** iTunes may be gone, but the iTunes Store is still open for business! Find tips on shopping in the iTunes Store, and get advice on sharing your purchases with family members and among your various Apple devices.
- **Tag Your Music:** Tags are bits of information (also known as "metadata") that can describe your media. Learn which tags to bother changing, the best ways to add lyrics and album art, how to rate songs with stars, loves, or both, and more.
- **Organize Your Music:** Make a simple playlist of romantic songs, workout songs, or whatever theme you like. You'll learn how to create smart playlists that, for example, comprise only your 5-star faves or only tunes you haven't heard recently, and how to transfer playlists to the Apple Watch. You'll also find help with operational issues like eliminating duplicates from your music library.
- **Manage and Share Media Files:** Whether you want to casually share a playlist from your laptop when visiting a friend or you want to make all your media available on all your home's computers, you'll find out how Media Sharing and Home Sharing make sharing possible. You'll also learn how to manage massive media libraries and store media files on external drives.
- **Listen to Audiobooks:** Discover how to download and play audiobooks in the Books app, and how to manage your audiobook library.
- **View Movies and TV Shows:** Use the TV app (with or without the forthcoming Apple TV+ service) to watch videos, including those purchased or rented from the iTunes Store and those you add yourself.
- **Listen to and Watch Podcasts:** You'll be sampling and subscribing to podcasts in no time with Kirk's advice, plus you'll pick a method of syncing podcast episodes to your iPhone or iPad and even learn about creating your own podcast station.
- **Sync Media:** You've put all your media on your Mac...now, how do you transfer it to a mobile Apple device such as an iPhone, an iPad, an old-school iPod, or an Apple Watch? And how do you use an Apple TV to enjoy the media on your Mac? Learn the best approach for your situation.
- **Rip, Burn, and Print:** Add content to your media apps with Kirk's detailed steps for "ripping" music CDs and audiobooks. Also learn how to burn music from Music onto a CD, and get directions for printing a song list—for example, to include in the jewel case of said CD.
- **Extend with AppleScript:** Mac users can make the Music and TV apps do more with AppleScript. Learn about key AppleScripts that you can download to make your media apps jump through even more hoops.

**Goal-Setting and Problem-Solving in the Tech-Enhanced Classroom** Pete Atherton, 2023-02-28 Goal-Setting and Problem-Solving in the Tech-Enhanced Classroom explores how educators can use technology to create opportunities for more immersive and rewarding learning. As child-age students demonstrate increasing competence with digital tools, and investment in learning technologies continues to climb, teachers need grounded, pedagogically attentive insights to help them leverage these devices and platforms in their profession. This book offers a variety of ideas for how pre- and in-service teachers can successfully deploy today's educational technology platforms to serve confident, meaningful teaching and learning. Each chapter includes a concrete learning goal or problem, a narrative of an instructional experience with a specific technology, relevant theoretical and empirical underpinnings, and practical recommendations.

**Tricks of the Podcasting Masters** Rob Walch, Mur Lafferty, 2006-05-22 Have you figured out the basics of making a podcast, but now want to make a great podcast, and possibly make some money? Tricks of the Podcasting Masters holds the answers to questions such as: How do I interact with listeners and get them to come back next week? How do I conduct a great interview over the phone? How do I attract sponsors? How do I stay motivated? The authors share their experiences with the 'casts they've produced regularly since podcasting began, including podCast411 and Geek Fu Action Grip, and draw from more than 100 interviews with podcasting's stars. With this book, you will be able to take your craft to the next level and create a business around your podcasts.

*Virtual Learning Environments: Concepts, Methodologies, Tools and Applications* Management Association, Information Resources, 2012-01-31 As the world rapidly moves online, sectors from management, industry, government, and education have broadly begun to virtualize the way people interact and learn. Virtual Learning Environments: Concepts, Methodologies, Tools and Applications is a three-volume compendium of the latest research, case studies, theories, and methodologies within the field of virtual learning environments. As networks get faster, cheaper, safer, and more reliable, their applications grow at a rate that makes it difficult for the typical practitioner to keep abreast. With a wide range of subjects, spanning from authors across the globe and with applications at different levels of education and higher learning, this reference guide serves academics and practitioners alike, indexed and categorized easily for study and application.

**Podcasting** Martin Spinelli, Lance Dann, 2019-01-10 Born out of interviews with the producers of some of the most popular and culturally significant podcasts to date (Welcome to Night Vale, Radiolab, Serial, The Black Tapes, We're Alive, The Heart, The Truth, Lore, Love + Radio, My Dad Wrote a Porno, and others) as well as interviews with executives at some of the most important podcasting institutions and entities (the BBC, Radiotopia, Gimlet Media, Audible.com, Edison Research, Libsyn and others), Podcasting documents a moment of revolutionary change in audio media. The fall of 2014 saw a new iOS from Apple with the first built-in Podcasts app, the runaway success of Serial, and podcasting moving out of its geeky ghetto into the cultural mainstream. The creative and cultural dynamism of this moment, which reverberates to this day, is the focus of Podcasting. Using case studies, close analytical listening, quantitative and qualitative analysis, production analysis, as well as audience research, it suggests what podcasting has to contribute to a host of larger media-and-society debates in such fields as: fandom, social media and audience construction; new media and journalistic ethics; intimacy, empathy and media relationships; cultural commitments to narrative and storytelling; the future of new media drama; youth media and the charge of narcissism; and more. Beyond describing what is unique about podcasting among other audio media, this book offers an entry into the new and evolving field of podcasting studies.
