Stalin's Wine Cellar John Baker, Nick Place, 2021-07-20 The adventure of a lifetime to buy Stalin's secret multimillion dollar wine cellar located in Georgia; it is the Raiders of the Lost Ark of wine. In the late 1990s, John Baker was known as a purveyor of quality rare and old wines. He was the perfect person for an occasional business partner to approach with a mysterious wine list that was different to anything John, or his second-in-command, Kevin Hopko, had ever come across. The list was discovered to be a comprehensive catalogue of the wine collection of Nicholas II, the last Tsar of Russia. The wine had become the property of the state after the Russian Revolution of 1918, during which Nicholas and his entire family were executed. Now owned by Stalin, the wine was discreetly removed to a remote Georgian winery when Stalin was concerned the advancing Nazi army might

overrun Russia. Half a century later, the wine was rumoured to be hidden underground and off any known map. John and Kevin embarked on an audacious, colourful and potentially dangerous journey to Georgia to discover if the wines actually existed; if the bottles were authentic and whether the entire collection could be bought and transported to a major London auction house for sale. Stalin's Wine Cellar is a wild, sometimes rough ride through the glamorous world of high-end wine.

Failing Gloriously and Other Essays Shawn Graham, 2019-11-20 *Failing Gloriously and Other Essays* documents Shawn Graham's odyssey through the digital humanities and digital archaeology against the backdrop of the 21st-century university. At turns hilarious, depressing, and inspiring, Graham's book presents a contemporary take on the academic memoir, but rather than celebrating the victories, he reflects on the failures and considers their impact on his intellectual and professional development. These aren't heroic tales of overcoming odds or paeans to failure as evidence for a macho willingness to take risks. They're honest lessons laced with a genuine humility that encourages us to think about making it safer for ourselves and others to fail. A foreword from Eric Kansa and an afterword by Neha Gupta engage the lessons of *Failing Gloriously* and consider the role of failure in digital archaeology, the humanities, and social sciences.

**George Daniels** Michael Clerizo, 2013-04-30 “The watch must be original in design and conception and, when completed, beautiful in appearance.” —George Daniels, Watchmaking Master watchmaker

and inventor George Daniels (1926–2011) was regarded as the finest exponent of his craft in the world. Over the course of his career he laboriously constructed twenty-five mechanical watches using antiquated tools and creating almost every component by hand. Each is a work of great originality and exceptional beauty, and his creations are appreciated as milestones in the art of watchmaking. While admired for their lucidity of appearance and unadorned dials, Daniels's watches feature a raft of exquisite complications, such as chronographs, thermometers and power reserve indicators. His more intricate designs also incorporate perpetual calendars and minute repeaters, as well as indicators displaying mean solar and sidereal time, the age and phases of the moon, and the equation of time. Most significant of all Daniels's contributions to the field of mechanical horology is his revolutionary invention: the co-axial escapement. This, the first noteworthy advance in practical watch design since Thomas Mudge's lever escapement of 1754, helped to save a mechanical watch industry in danger of being overwhelmed by mass-produced quartz wristwatches. Detailed photographs of all of Daniels's unique watches (both dial and movement) can be seen [here](#), along with rare and previously

unpublished images from Daniels's own archive of photographs and working drawings. Michael Clerizo worked closely with George Daniels in the preparation of this book, the artist recounting episodes from his life and career over their innumerable conversations at his home on the Isle of Man. That biography helps ensure the book is a fitting and authentic tribute to the greatest watchmaker of the modern era.

**Mobilizing the Past for a Digital Future** Erin Walcek Averett, Jody Michael Gordon, Derek B Counts, 2016-10-19 Mobilizing the Past is a collection of 20 articles that explore the use and impact of mobile digital technology in archaeological field practice. The detailed case studies present in this volume range from drones in the Andes to iPads at Pompeii, digital workflows in the American Southwest, and examples of how bespoke, DIY, and commercial software provide solutions and craft novel challenges for field archaeologists. The range of projects and contexts ensures that Mobilizing the Past for a Digital Future is far more than a state-of-the-field manual or technical handbook. Instead, the contributors embrace the growing spirit of critique present in digital archaeology. This

critical edge, backed by real projects, systems, and experiences, gives the book lasting value as both a glimpse into present practices as well as the anxieties and enthusiasm associated with the most recent generation of mobile digital tools. This book emerged from a workshop funded by the National Endowment for the Humanities held in 2015 at Wentworth Institute of Technology in Boston. The workshop brought together over 20 leading practitioners of digital archaeology in the U.S. for a weekend of conversation. The papers in this volume reflect the discussions at this workshop with significant additional content. Starting with an expansive introduction and concluding with a series of reflective papers, this volume illustrates how tablets, connectivity, sophisticated software, and powerful computers have transformed field practices and offer potential for a radically transformed discipline.
