Particle emissions in Belarus and in the Nordic countries: Emission inventories and integrated assessment modelling of black carbon and PM2.5

Kakareka, Sergey, Malchykhina, Hanna, Krukowskaya, Olga, Yaramenka, Katarina, Kindbom, Karin, Mawdsley, Ingrid, Åström, Stefan, Nielsen, Ole-Kenneth, Plejdrup, Marlene, Bak, Jesper, Saarinen, Kristina, Savolahti, Mikko, 2018-10-01 The overall goal of the project is to stimulate decision-makers in Belarus to prioritize abatement measures aimed at black carbon in their efforts to reduce emissions of PM2.5, as encouraged in the Gothenburg protocol under the UNECE CLRTAP. To reach this purpose and in order to build up scientific basis necessary for further policy development, a comprehensive analysis of PM2.5 and BC emissions, emission reduction potentials and cost-effective abatement measures in Belarus has been conducted. The report presents two main parts of the conducted analysis: a part focused on the emission inventories, and a part summarizing the results of the integrated assessment modelling. The main focus is on analysis for Belarus; however, a range of modelling results have been obtained for the three participating Nordic countries -- Denmark, Finland and Sweden.

**Belarus** Nigel Roberts, 2018-10-05 This new, thoroughly updated edition of Bradt's Belarus remains the only full-blown standalone guide to the most westerly of the constituent republics that formed the Soviet Union prior to the break-up in 1991. Written and updated by expert author and Russian speaker Nigel Roberts, who has been travelling throughout the country for over 17 years, it is the definitive guide to understanding, and making the most of a visit to this much-misunderstood nation. Included in this new edition is a detailed focus on the capital city Minsk, the most likely destination for first-time travellers and now becoming a major European capital city thanks to an easing of visa regulations, as well as coverage of each of the other five cities and all six regions. Roberts draws on his years of experience and shares many stories and vignettes of his own adventures and experiences of everyday life, all of which help to bring the destination to life. In addition, there are recommendations and tips from his wide circle of contacts, including people at all levels of the tourism industry, charities working on the ground, local people and travellers from abroad, who regularly share details of up-to-the-minute information, changes and developments. With Bradt's Belarus enjoy the opportunity to put the cliché to the test; only ever described by Western media as 'the last dictatorship in Europe', travellers certainly do have the opportunity to experience elements of life as it was lived in the days of the Soviet Union but can also see beyond the cliché as Belarus seeks to free itself from the Soviet past and establish its own heritage and place in the modern world. Discover beautifully preserved and restored museum towns such as Mir, Njasvizh, Novogrudok, Pinsk and Polotsk; see Soviet-style brutalist and modernist architecture; explore accessible national parks and vast areas of unspoilt wilderness, with ample opportunity to study flora and fauna; visit historic palaces and castles stunningly restored; and enjoy the unconditional hospitality of a people who are anxious to interact with visitors from the English-speaking world.

**A Look at China and Sino-Belarus Cooperation** Kiryl Rudy, 2021-01-08 This book is simultaneously a scientific study, a practical guide and diplomatic memoir about the new era in China's development, which began in 2013 with Xi Jinping coming to power. It explores the modern Chinese experience of the political centralization of power, the fight against corruption, strengthening the country's defense system, reinforcing the country's diplomacy, the political rapprochement between China and Russia, and exacerbation of relations with the United States. It also considers issues of China's adjusting its policy of reforms and its openness to a new era, transforming inefficient state-owned enterprises, building an IT-focused country, and overcoming phobias in the construction of the "Belt and Road" initiative related to the "debt trap" and the "trade deficit", as well as the role of the Huawei Corporation. A separate section of the book is devoted to Belarus-China relations, exploring the reasons for the political rapprochement between these two very different countries.

*The International Politics of Russia and the Successor States* Mark Webber, 1996 This textbook examines the external relations of the fifteen new states which emerged from the ashes of the Soviet Union in 1991. Mark Webber examines the consequences of the Soviet collapse and the emergence

of a new system of international relations embracing Russia and the other former Soviet republics. The author explores both relations between the new states themselves and between these states and the wider world. He pinpoints the daunting challenges facing the new states: the invention of foreign policy orientations; the management of the Red Army's material legacy, including nuclear weapons; the resolution of regional conflicts; and the need for economic revival. Two key themes emerge: the reassertion of national identities, and the special position of Russia, which has assumed to some extent the rights and the obligations of the Soviet Union on the world stage whilst having to tackle the chaos of local wars and internal economic collapse.

The Day That Changed the World Jay Chauhan, 2024-02-02 The Day That Changed the World by Jay Chauhan talks about the gripping journey through the life of Raj, a man whose destiny is profoundly altered by a tragic event during his childhood. The massacre of his family by Mau Mau fighters sets him on an unexpected path, transforming him from a cheerful boy into a resilient, identity-struggling man navigating the challenges of life in England. Raj's remarkable ability to understand people and his intelligence led him to a career in the Royal Air Force, eventually propelling him into the covert world of MI6 as an international spy. Here, he encounters Lydia, the love of his life, who is also an MI6 agent. Haunted by the horrors he witnessed in his youth and the loss of a dear friend at the hands of the KGB, Raj embarks on a quest for vengeance. His opportunity arises when Russia launches an attack on Ukraine, prompting Raj to join forces with CIA agent Maxwell. Together, they embark on a high-stakes mission to thwart the Russian operation, dismantle the oppressive Russian regime, and save a world teetering on the brink of collapse. The Day That Changed the World is a thrilling tale of political espionage, war, sacrifice, and the relentless fight to prevent global catastrophe. Jay Chauhan's narrative is rife with suspense, intrigue, and unexpected twists, making it a must-read for those seeking a gripping espionage thriller with the fate of the world hanging in the balance.

Marine Navigation and Safety of Sea Transportation Adam Weintrit, Tomasz Neumann, 2013-06-04 The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many aspects of the navigational safety from various different points of view. Topics presented and discussed at the Symposium were: navigation, safety at sea, sea transportation, education of navigators and simulator-based training, sea traffic engineering, ship's manoeuvrability, integrated systems, electronic charts systems, satellite, radio-navigation and anti-collision systems and many others. This book is part of a series of four volumes and provides an overview of Education and Training, Human Resources and Crew Resource Management, Policy and Economics and is addressed to scientists and professionals involved in research and development of navigation, safety of navigation and sea transportation.

Investment Guide for Belarus Centre for Co-operation with Economies in Transition, 1994 Guide to assist those interested in doing business in Belarus. In addition to providing background information about the country, including a chapter assessing the science and technology sectors, this guide also outlines the legal and regulatory framework for foreign investments and provides a list of investment opportunities.

China's Military Faces the Future James Lilley, David L. Shambaugh, 2016-07-01 This is the most up-to-date assessment of all aspects of the People's Liberation Army. Leading specialists on the Chinese military cover military leadership, defense doctrine and military readiness, preparations for high-tech warfare, military expenditure, military logistics, the scientific and technological base for defense procurement, and China's security concerns in Northeast Asia.

The Black Sea from Paleogeography to Modern Navigation Romeo Bosneagu, 2022-02-22 This book provides an analysis of the evolution of navigation and seaborne trade in the Black Sea, considering the geographic, geological, and hydro-meteorological data, including information from the historical, geopolitical, economic, social, and military frames. In ancient times the Black Sea was at the edge of the known world, and together with its coasts it preserves traces of the Greek, Roman, and Byzantine civilizations. Many of the ancient ports were important and essential towns, which remains the case in modern times. The complex geographical conditions that have historically influenced, and continue to influence the development of maritime trade and transport in the Black Sea, have not been thoroughly researched or optimized for these activities. The book is divided into ten chapters. Chapter 1 describes the physical – geographical conditions of the Black Sea's basin, and the geological evolution of its recent history, with application to the hypothesis of Noah's flood. Chapter 2 presents a short history of the research conducted on the Black Sea up to present day. Chapter 3 summarizes the specific characteristics of the Black Sea's morphohydrography and morphodynamics. Chapter 4 contains the conclusions regarding the influence of coastal relief on the navigation and seaborne trade on the Black Sea. Chapter 5 analyzes the Black Sea basin's meteo-climatic regime. Chapter 6 contains the conclusions of the influence of weather and climate factors on the navigation and seaborne trade on the Black Sea. Chapter 7 describes the specific hydrological factors of the Black Sea. Chapter 8 contains the conclusions regarding the influence of the hydrological factors for the navigation and seaborne trade on the Black Sea. Chapter 9 presents the Black Sea's specific hydrobiological elements specific, as a „unicum hydrobiologicum”, and the main features of the Black Sea's ecology. Chapter 10 is concentrated on the historical, social, political, economic, and geopolitical framework of the Black Sea basin influencing navigation and maritime transportation, from ancient times to the present. The book is written

from the perspective of a Romanian Navy officer, with more than 40 years’ experience in the Romanian Navy

**The Ticket Collector from Belarus** Mike Anderson,Neil Hanson,2023-01-19 'Brilliantly gripping' Sunday Times; 'Compelling' Daily Mail; 'Heart-rending' Sunday Telegraph; 'Excellent' The Times; 'Engrossing' Independent The UK's only war crimes trial took place in 1999 and had its origins in the horrors of the Holocaust, but only now in The Ticket Collector from Belarus can the full story be told. The Ticket Collector from Belarus tells the remarkable story of two interwoven journeys. Ben-Zion Blustein and Andrei Sawoniuk were childhood friends in 1930s Domachevo, a holiday and health resort in what is now Belarus. During the events that followed the Nazi invasion in 1941, they became the bitterest of enemies. After the war, Ben-Zion made his way to Israel, and 'Andrusha the bastard' to England, where he found work as a British Rail ticket collector in London. They next confronted each other in the Old Bailey, over half a century later, where one was the principal prosecution witness, and the other charged with a fraction of the number of murders he was alleged to have committed. There was no physical evidence, just one man's word against another, leaving the jury with a series of agonising dilemmas: Could any witness statement be trusted so long after the event? Was Andrusha a brutal killer, a hapless pawn or a scapegoat? And were his furious protests a sign of guilt or the justified anger of an innocent old man? Mike Anderson was gripped by the story, and so began his quest to find the truth about this astonishing case and the people at its heart. As he discovered, it was even more remarkable than he could ever have imagined.

*European Geographic Information Infrastructures* Peter A. Burrough,I. Masser,2003-05-20 Although it is generally accepted that there is a growing demand for multinational and pan European databases, there is little available on the problems encountered in different types of multinational geographic information applications, nor has there been much discussion of the broader legal and constitutional issues involved at the supranational
