Database of Auto Parts Warehouse Design Jiyi Tian, 2012-02-04 Project Report from the year 2011 in the subject Computer Science - Applied, grade: A, University of Florida, language: English, abstract: The database designed for AutoParts Warehouse is to mainly serve as an ecommerce website. Customer can register online with their shipping address and transaction information. Customer can search the parts they need from company website and place order. According to the order come from customer, company can ship the parts to correspondent customers. In order to make economy efficient, company won't save too many parts in stock. Oppositely, Company will keep only minimum number of each part. If one of parts runs out of stock, a staff will order the part from vendor and then send it to customer. Our scope will mainly cover the function of customer order, price query, parts summary and company stock. Online transaction with bank and shipment with shipping company are

out of our scope. [...]

Automotive Parts Sales 101 Tim Northburg,2014-09-29 In dealerships today, we tend to focus primarily on the sales and service departments. What about the parts department? They are just as important to the well being of the dealership as the sales and service departments. Having properly trained and effective parts personnel is the first key to selling more parts and accessories. The second key is having process in place within the dealership that helps spread awareness that you sell additional parts and accessories. This book will distill some basic principles that will help you and your parts personnel thrive and sell more parts and accessories, both to internal and external customers.
