The New Cloud Absorption Radiometer (CAR) Software: One Model for NASA Remote Sensing Virtual Instruments , 2001

The New Cloud Absorption Radiometer (Car) Software National Aeronautics and Space Administration (NASA), 2018-06-11 The Cloud Absorption Radiometer (CAR) instrument has been the most frequently used airborne instrument built in-house at NASA Goddard Space Flight Center, having flown scientific research missions on-board various aircraft to many locations in the United States, Azores, Brazil, and Kuwait since 1983. The CAR instrument is capable of measuring scattered light by clouds in fourteen spectral bands in UV, visible and near-infrared region. This document describes the control, data acquisition, display, and file storage software for the new version of CAR. This software completely replaces the prior CAR Data System and Control Panel with a compact and robust virtual instrument computer interface. Additionally, the instrument is now usable for the first time for taking data in an off-aircraft mode. The new instrument is controlled via a LabVIEW v5.1.1-developed software interface that utilizes, (1) serial port writes to write commands to the controller module of the instrument, and (2) serial port reads to acquire data from the controller module of the instrument. Step-by-step operational procedures are provided in this document. A suite of other software programs has been developed to complement the actual CAR virtual instrument. These programs include: (1) a simulator mode that allows pretesting of new features that might be added in the future, as well as demonstrations to CAR customers, and development at times when the instrument/hardware is off-location, and (2) a post-experiment data viewer that can be used to view all segments of individual data cycles and to locate positions where 'start' and 'stop' byte sequences were incorrectly formulated by the instrument controller. The CAR software described here is expected to be the basis for CAR operation for many missions and many years to come. Roth, Don J. and Rapchun, David A. and Jones, Hollis H. Fun And Excitement With RC Cars Matt Daniels, 2021 Knowing about RC cars is very essential before stepping into the racing world. If you are still an amateur, you might crib on the fact that you aren't able to choose the best

electric powered RC car. You need an assistance to choose the best suitable car to pose against your rivals and this isn't easy as it might sound. Electric RC cars are the ones which run on batteries. The electric batteries are in the form of battery packs. You have a choice while choosing the battery. The 'ready to run' or the batteries which you need to build it yourself are available. The 'ready to run' batteries are preferred as the work load becomes very minimal. Nitro RC cars are the ones which are tougher to maintain and they are quite expensive. RC cars that run on battery packs are easier to purchase. It is specifically designed for amateurs or beginners. However, RC car fanatics who are quite experienced use these cars for variety and comparison purposes. RC electric cars are user-friendly and they are available cheap in the market. This is their main advantage. The difference between the prices of a gasoline powered RC car and an electric RC car goes up to a hundred dollars.
