The Art and Science of Running a Car Dealership Max Zanan,2019-10-09 This book is the pocket guide I wish I had when I first became a general manager of a Mitsubishi dealership in New York. Honestly, I am not the brightest star in the sky and made every mistake anyone could've possibly made. Unfortunately, I see dealer principals/general managers/general sales managers making the same mistakes today. The only difference is the time and consequences of these mistakes. I got my first GM gig in 2004. That was in the beginning days of the Internet, before millennials joined the workforce, and way before any viable disrupters entered the market space. It was a lot easier to get away with mistakes then. I don't think you could get away with making the same mistakes now. The stakes are too high. Automotive retail profit margins are tiny. According to the National Automobile Dealers Association (NADA), automotive net profit margin as of March 31, 2019 was merely 1.38 percent. As a result, every misstep makes it harder to stay in business.The car business desperately needs better leadership skills, understanding of social media, inventory management, fixed operations, and so much more. There is no educational barrier to the entry into car business, and there are only a handful of universities offering a major in car dealership general management, such as Liberty and Keiser. On top of that, only a tiny percentage of dealer principals and general managers attend the National Automobile Dealer Association University. That means that a vast majority of general managers receive training on the job, even if we took business-related classes in college. The auto business is a different animal. General information will only carry you so far. That is exactly why general managers make the same mistakes year after year. My goal is to break this vicious cycle and provide as much information as possible to ensure that automotive retail survives the disruptions we are witnessing today. We need to be ready for the next generation of car buyers, people who are more computer savvy and not afraid to search for better deals. According to surveys, 80 percent of millennials plan to buy a vehicle in the next five years. In fact, millennials worldwide will buy about 40 percent of all vehicles in the next decade. At the same time, they spend an average of 17 hours on line before going to a dealership.Are you ready for them?

Clueless about Cars Lisa Christensen,Laxer, Dan,2004-01 “The worst thing a customer can do is put the keys on the table and tell the mechanic, “Fix it.” It’s like giving him a blank cheque.” Lisa Christensen The latest book in The Clueless Series “, Clueless About Cars, focuses on something near and dear and unnerving for many of us: car repair and maintenance. For most of us, cars rank second only to houses in terms of major life expenses. A car is a statement of independence, a symbol of social status or financial success, a way to get from point A to B. First and foremost though, a car is a significant investment. So it only makes sense that car owners should want to protect their investments and make sure that they get the most mileage “ figuratively and literally” out of their cars. In Clueless About Cars Lisa Christensen, licensed mechanic and diagnostic specialist, helps those new to the car game and seasoned pros alike become familiar with their vehicles and learn how to care for them. In simple, informative and often hilarious language, Christensen acquaints readers with the fundamental systems of the car. She covers the basics of preventative maintenance and offers advice on how to make a preliminary diagnosis when something goes wrong (and it always does!). She also provides tips to help car owners talk to their mechanic, how to diagnose a car’s tics, tocs, and knocks and how to perform basic do-it-yourself repairs. For the novice driver who doesn’t know a hubcap from a gas cup, to the seasoned driver looking for a better sense of control, Clueless About Cars is a glove-box must!
