The Joy of SET Liz McMahon, Gary Gordon, Hannah Gordon, Rebecca Gordon, 2019-07-09 Have you ever played the addictive card game SET? Have you ever wondered about the connections between games and mathematics? . . . The Joy of SET takes readers on a fascinating journey into this seemingly simple card game and reveals its surprisingly deep and diverse mathematical dimensions. Absolutely no mathematical background is necessary to enjoy this book - all you need is a sense of curiosity and adventure. Originally invented in 1974 by Marsha Falco and officially released in 1991, SET has gained a widespread, loyal following. SET's eighty-one cards consist of one, two, or three symbols of different shapes (diamond, oval, squiggle), shadings (solid, striped, open), and colors (green, purple, red). In order to win, players must identify 'sets' of three cards for which each characteristic is

the same - or different - on all the cards. SET's strategic and unique design opens connections to a plethora of mathematical disciplines, including geometry, modular arithmetic, combinatorics, probability, linear algebra, and computer simulations. The Joy of SET looks at these areas as well as avenues for further mathematical exploration. As the authors show, the relationship between SET and mathematics runs in both directions - playing this game has generated new mathematics, and the math has led to new questions about the game itself.--Provided by publisher.

Younger children will encounter number recognition, sorting problems, fine motor skills, taking turns, practicing patience. So get the cards out and have a go! There are easy instructions for 36 of the best card games for children and families in this book to choose from,

and I know you'll find something fun - whether you are looking for a quiet game for 2 kids, a rowdy game for a family gathering, or a game which will keep a group of teenagers and younger children entertained.
