Air Cargo and the Opening of China Joseph P. Schwieterman,1993

History of Air Cargo and Airmail from the 18th Century Camille Allaz,2005-03 It was first published in French by the Institut du Transport Aerien in 1998 and received very favourable reviews. Through the publication of the English language edition, this remarkable work is now accessible to many more readers around the world. In addition, the author has expanded the book with new sections and he has extensively updated it to bring the story of air cargo into the twenty first century, concluding with a look into the future. The author, Camille Allaz, served as Senior Vice President Cargo at Air France for 10 years which gave him an insider's close-up view of his subject, a privilege not enjoyed by many historians. There is no aspect of mail or cargo transport by air that has not been thoroughly researched and documented by Allaz, from the first brief transport of animals by balloon in France in 1783 to the vast global networks of the integrated express carriers in the 21st century. As a true scholar, he fits his narrative into the larger framework of political, military, economic and aviation history. This book should stand for years as the definitive work on the history of air cargo and airmail, and will be of immense value to the academic community, to the air cargo industry, the postal services, and to the general public.

Abstract: Abstract of dissertation entitled Express Air Cargo Development in the Pearl River Delta Region - Present and Future Submitted by Winnie, Tang Yee-Man for the degree of Master of Arts in Transport Policy and Planning at the University of Hong Kong in June 2007

Express Air Cargo industry or more commonly called Express Delivery Services (EDS) was originated in the United States during the late 1960s in response to the increasing demand for fast and reliable document delivery services. The industry grew rapidly after the deregulation of the U.S. air cargo industry in the late 1970s. The advent of the internet in the 1990s and the increasing demand from manufacturers and retailers for just-in-time (JIT) delivery caused the EDS companies' business expansion to include small parcels and freight services. As a result, the service network of the global players keep on expanding within US domestic and ultimately extending to the international markets. EDS companies, in particular the global players, set their foot on China soil during 1980s when China adopted economic reform and open door policy to the world markets. However, foreign companies desire to setup their China business establishment were required to signed Joint Venture agency agreements with a Chinese investor. Most often the partner investor was either a state-owned enterprise (eg. Sinotrans is the joint venture partner of DHL) or a private-owned enterprise (eg. Tianjin Datian W. Group

Co., Ltd - Federal Express JV partner). In December 2006, China marks the fifth anniversary of its accession to the World Trade Organization WTO, it is now possible for logistic, freight forwarding and EDS companies to set up their wholly foreign-owned enterprise independently in China. As China is gradually opening the logistic market to the world, this paper aims to provide an in-depth knowledge of Express Delivery Services industry and how the companies operate in the Pearl River Delta region under the current China Postal regulatory framework. The recent proposed postal reform has ignited a lot of debates and issues among the industry players and various government bodies. We will review in this dissertation its impact to the present and future development of this fastest growing industry in the new-age China. DOI: 10.5353/th_b3834977

Aviation Logistics Michael Sales, 2016-02-03 Aviation Logistics looks at the function of the air cargo business and its role in global supply chains and logistics. As global economies are constantly evolving, the supply chain business with its transport partners must be proactive for the future. Technology and its resulting efficiency and transparency are therefore a central part of this book. Aviation Logistics examines how carriers are coming up with new methods and technologies to improve ground handling and road transport, traceability systems and barcoding, security and screening, and safe delivery of perishable items (such as in the pharmaceutical and medical sectors). Endorsed by The International Air Cargo Association (TIACA), Aviation Logistics is supplemented with case studies and contributions from a team of experts including Oliver Evans and Stan Wraight, both industry experts. Unveiling the Power of Verbal Art: An Mental Sojourn through **Cargo Express**

In some sort of inundated with monitors and the cacophony of quick connection, the profound energy and emotional resonance of verbal art usually disappear into obscurity, eclipsed by the continuous onslaught of noise and distractions. However, nestled within the lyrical pages of **Cargo Express**, a interesting work of fictional brilliance that impulses with raw feelings, lies an unique journey waiting to be embarked upon. Published with a virtuoso wordsmith, this interesting opus manuals viewers on an emotional odyssey, lightly exposing the latent potential and profound affect embedded within the elaborate internet of language. Within the heart-wrenching expanse of this

evocative analysis, we will embark upon an introspective exploration of the book's main styles, dissect their fascinating writing type, and immerse ourselves in the indelible impact it leaves upon the depths of readers' souls.
