Carom Billiards Allan P Sand,2016-12-10 This is one of a series of Carom Billiards books that show how professional players select shots, based on the table layout. All of these shots have been mapped out based on shots played at international competitions.This book contains a wide variety of examples where the player shot the Cue Ball (CB) into the cushion(s) before the CB hit the first Object Ball (OB).These shots put you inside the head of the player beginning with the ball positions (shown in the first table layout). The second table layout shows the shooting decision and the results of the player's choice. The sections are based on the number of rails the CB goes before connecting with the first OB.

Carom Billiards: Cross-Corner Diagonal Patterns: 3-Cushion Billiards Championship Shots Allan P. Sand,2016-12-08 This is one of a series of Carom Billiards books that show how professional players select shots, based on the table layout. All of these shots have been mapped out based on shots played at international competitions.This book contains a wide variety of examples of the CB patterns travels cross corner.These shots put you inside the head of the player beginning with the ball positions (shown in the first table layout). The second table layout shows the shooting decision and the results of the player's choice

Carom Billiards: MORE Riddles & Puzzles Allan P. Sand,2019-10-01 These Full-Table Carom Billiards layouts offer an excellent variety of table setups that show up in game after game. For Half-Table layouts, see the book “Carom Billiards: Some Riddles & Puzzles”. The layouts are designed to allow experimentation to try various cue ball speeds, spins, and angles. This provides significant personal competitive benefits: • Intellectual training – Evaluate the layouts and consider how many pathway options are available. Make sketches of paths and cue ball speeds & spins for the practice table. This increases your analytic and tactical skills. • Skills confirmation – As you attempt each path, your experimentation helps to determine whether it is viable (within your skills) or useless (too difficult or fantastic). This comparison between mental imagery and physical attempts helps determine the width and breadth of your abilities. • Skills advancement – If a path looks promising, but execution fails, work with various speeds/spins to discover what works. Several consecutive successes will add this to your personal library of competencies. ++++++ HOW TO STUDY Start with armchair analysis. Look at each table layout and consider possible playing options. Imagine shooting your ideas, concentrating on the appropriate speed and spin. Make sketches and notes, as needed. Alternately, take this book to your practice table, put the donuts down, and (without shooting anything), mentally figure out how many different ways you can play the shot. Make notes of your ideas. If this is a printed book, use a pencil and sketch out pathways. Make sketches, and when you get to the practice table, give them a shot. At the practice table, apply the paper reinforcement rings for the three ball positions. Think through the shot before you get down and stroke the cue ball. When shots get close, experiment with different speeds/spins and angles until you can consistently score (3 of 4 attempts). This is how you become a tougher and more dangerous player.

Carom Billiards Allan P. Sand,2016-12-10 One of the interesting shot patterns is known as full table circle. These shots follow a clockwise or counter-clockwise path around the table rails. This book contains a large assortment of these types of shots. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!

Carom Billiards Allan P. Sand,2016-12-10 There are a lot of times when the two object balls are located in a half-table area. One of the more common shots is to play the cue ball in a half table circle. It comes off the first object ball, into the long rail, short rail, and opposite long rail and then connect with the second object ball. This is a large selection of these types of shots. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!
