Switzerland without a Car Anthony Lambert, 2017-10-05 This thoroughly updated edition of Bradt's guide to Switzerland offers a unique perspective on getting the most from this mountainous country travelling only by public transport - a timely release with the Gotthard Base Tunnel transforming north-south train services. Switzerland boasts the world's finest public transport network, and the Swiss Travel System is a revelation. The comfort, efficiency and frequency of train, bus, boat and cable car services explain why so many Swiss don't own cars. Visitors cannot reach many of the finest Swiss sights by road, and there are over a dozen car-free resorts for experiencing the peace and clean air of the mountains. For walkers and cyclists, there are superbly managed networks of paths - almost 64,000 kilometres of footpaths and many surprisingly unhilly cycle paths beside lakes and rivers. Bradt's Switzerland is unique. No other guide book is devoted to Swiss public transport, which is the easiest, most enjoyable and responsible way to travel. The guide offers depth and breadth of coverage, encompassing culture, architecture, landscapes, walking and cycling, and fascinating facts for railway enthusiasts! There's a host of tips for reducing costs in a country known for being expensive, while a new section on food and wine includes a list of top restaurants. Switzerland has some of the world's most beautiful landscapes; though mountains and lakes cover most of the country's regions, each offers something quite different - and the four official languages add colour and variety. Switzerland's cities are among the world's most beautiful - and safest. Its capital, Bern, is a World Heritage Site with 6 kilometres of covered arcades, where even jaded shoppers will be enthralled by hundreds of independent shops. Luzern's lakeside setting is unrivalled, with mountains in every direction and the floodlit city walls providing a breath-taking backdrop to the historic centre. Lausanne and Geneva overlook Lac Léman, and Basel is enhanced by a broad sweep of the Rhine. With Bradt's Switzerland: a guide to exploring the country by public transport, you can enjoy all the qualities that help ensure Switzerland and its cities are consistently ranked as the most liveable in the world.

Sustainable Transportation in Natural and Protected Areas Francesco Orsi,2015-07-16 Protected areas are at the centre of nature-based tourism, which is increasingly popular across the world. As visitor numbers increase, so does awareness of the harmful effects that large crowds may have on both natural resources and individuals' recreational experience. This volume considers the challenge of transportation to and within natural and protected areas, the improvement of which has already been recognised as having great potential for mitigating the environmental impacts of ecotourism. While several books have focused considerable attention to the management of protected areas in general, little has been said about the specific issue of sustainable transport, an emerging trend that is already reshaping visitation patterns in natural settings. This book provides current knowledge on issues associated with the transportation of visitors in natural and protected areas, and a

comprehensive overview of the technical and strategic options available to tackle these issues. It approaches the subject via three main topics: preferences, or the visitors' attitudes towards transportation; practices, where current approaches are assessed through examples and case-studies of successful experiences and methodologies from around the world; and policies, where suggestions and recommendations are put forward for both local scale strategies and broad-scale regulatory action with global relevance. Contributors include academics in the field of natural resource management and tourism, with extensive experience in protected area management and active partnerships with natural park administrations.

A Stargazing Program for Beginners Jamie Carter, 2015-11-20 Sets out a simple month-by-month program to reveal all of the night sky's biggest and most beautiful secrets in just one year – and with only a few hours of stargazing each month By investing just an hour a week and \$50 in binoculars, it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns – and what they tell us about Earth, the seasons and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are – to the beginner – almost beyond belief. As well as the vital constellations and clusters, and the weird and wonderful nebulas, he searches out “dark sky destinations” across the globe that help increase knowledge and give a new perspective on

familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star-charts, binoculars, smartphone apps, telescopes, spots satellites and attempts basic astro-photography. By year's end, the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are and even where the Galactic Center Point is.
