BUY ME A MERCEDES BENZ UN Studio,2006-05-01 More than the document of a remarkable project: Buy Me A Mercedes-Benz shows how various forms of expert knowledge have been combined and interwoven to finally generate an unconventional, breakthrough museum design. Providing insight into the various ideas, experiences and ambitions behind the project, this book allows visitors to take the museum home. Through photographs, diagrams, text, and drawings, this book explains the unique Mercedes museum design model, developed by UN Studio: the digitally programmed, three-dimensional, cross-connected trefoil. Implementing this model has resulted in a building that radically breaks with many of today's architectural conventions, a building that is highly complex, but still maintains a strongly directional structure, which provides many surprising perceptual experiences.

Preston Tucker and His Battle to Build the Car of Tomorrow Steve Lehto,Jay Leno,2016-07-01 In the wake of World War II, the U.S. automobile industry was fully unprepared to meet the growing demands of the public, for whom they had not made any cars for years. In stepped Preston Tucker, a salesman extraordinaire who announced the building of a revolutionary new car: the Tucker '48, the first car in almost a decade to be built fresh from the ground up. Tucker's car, which would include ingenious advances in design and engineering that other car companies could not match, captured the interest of the public, and automakers in Detroit took notice. Here, author Steve Lehto tackles Tucker's amazing story, relying on a huge trove of documents that has been

used by no other writer to date. It is the first comprehensive, authoritative account of Tucker's magnificent car and his battles with the government. And in this book, Lehto finally answers the question automobile aficionados have wondered about for decades: exactly how and why the production of such an innovative car was killed.

The Cars That Henry Ford Built Beverly Rae Kimes, 2005-08-21 At the time, in 1978, when *The Cars That Henry Ford Built* was first published, sending a copy for Henry Ford II to review seemed a vain request. Automobile Quarterly founding editor and publisher L. Scott Bailey was told that Mr. Ford (never comments on a book written about Ford.÷ Two weeks later came an unexpected exhortation from Henry Ford II: (My grandfather would have loved this book.÷ Ford then specially ordered 20 copies bound in white leather·needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose *The Cars That Henry Ford Built* to give to his Japanese hosts. Such high-level praise is derived from the book's fresh approach to the subject of Henry Ford, both in its study of the man and his cars, as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he saw it. Join award-winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry

growing and aging as his cars grew and aged, each lock-stepped together through history. Over 100 full-color photographs further bring the man and his creations to life.

The Book of Sports Cars - (United States and Italy) Charles Lam Markmann, Mark Sherwin, 2014-02-19 "... This is a book for which lovers of the automobile have waited a long time: the most comprehensive text-and-picture history of the dual-purpose car since it came to life more than sixty years ago. As the authors of *The Book of Sports Cars* point out, "in the beginning they were all sports cars." The automobile began its active life, whatever the intentions of its creators, as a new instrument of sport. Because the increasing demands of this sport imposed an ever-growing burden of technical development, the sports car and its achievements have never stopped forwarding the improvement of the everyday automobile. Here at last, evolved from years of painstaking research, is a record of what the world's motorists owe to the dreams and the daring of the men and women of motor sport. In arranging the history of the outstanding marques by countries of origin, the authors have made it plain how first one nation, then another took the lead in developing the automobile as a sporting instrument and hence inevitably as a thing of greater common use and benefit. First Germany led the world, then France, then Great Britain and Italy and the United States. *The Book of Sports Cars* is a magnificent tribute to the glorious past and the exciting present, a fascinating record of the history that points to the challenging future. A book to be read for pleasure and profit, it will be an invaluable addition to the library of every enthusiast of motoring history..." (1959) - BRIGGS CUNNINGHAM

Errett Lobban Griffith Borgeson, 2005-08-21 E.L. Cord was first and foremost a salesman, both of products and of himself. In 1924, after achieving great success as an automobile distributor, Cord

became the man with enough talent and panache to lead the Auburn Automobile Company out of its slumber. By 1929, Auburn sales had increased 15-fold and Cord was the head of an empire. His Cord Corporation owned Lycoming Mfg. Co. (engines), Limousine Body Co. and Central Mfg. Co. (auto bodies), Century Airlines, and Duesenberg, among others. Cord's philosophy of automobile design (and salesmanship) might be summed up in two words: Novelty Sells. Though mechanically ordinary, his Auburn models, with outstanding styling and clever paint combinations, were hot sellers. Cord oversaw the introduction of the fabulous Model J Duesenberg, a car whose combination of size, cost, performance, and style was and is unmatched in American automotive history. His most novel car was the rakish Cord L-29, the first American production car to feature front-wheel drive. All this and more is told of America's true renaissance man, E.L. Cord, in the original and complete biography of the man behind the Auburn, Cord and Duesenberg lines. The luxurious presentation includes 280 over-sized pages containing more than 500 rare illustrations, photographs and documents.

GM's Motorama David W. Temple, 2006 The story of the eight GM Motoramas staged between 1949 and 1961, featuring the cars introduced at these extravaganzas--including the Corvette prototype.

Why We Drive Andy Singer, 2014-11-28 Today, we're married to our cars. But life behind the wheel of an automobile didn't come naturally to Americans. Crooked politicians, unscrupulous businessmen, burning streetcars, and convoluted tax shenanigans are a few of the players in this gripping tale of corruption, greed, and endless miles of asphalt. In Andy Singer's accessible, scandalous tale of motordom, comics, text, and historic photographs tell the story of the rise of the U.S. highway system and the corresponding demise of rail and public transportation. He also explores how we can ditch the car and rebuild a functional transportation system that can bring

wealth, happiness, and freedom.

Women at the Wheel Katherine J. Parkin, 2017-09-05 Ever since the Ford Model T became a vehicle for the masses, the automobile has served as a symbol of masculinity. The freedom of the open road, the muscle car's horsepower, the technical know-how for tinkering: all of these experiences have largely been understood from the perspective of the male driver. Women, in contrast, were relegated to the passenger seat and have been the target of stereotypes that portray them as uninterested in automobiles and, more perniciously, as poor drivers. In *Women at the Wheel*, Katherine J. Parkin illuminates the social implications of these stereotypes and shows how they have little basis in historical reality. With chapters on early driver's education and licensing programs, and on buying, driving, and caring for cars, she describes a rich cast of characters, from Mary Landon, the first woman ever to drive in 1899, to Dorothy Levitt, author of the first automotive handbook for women in 1909, to Margie Seals, who opened her garage, *My Favorite Mechanic . . . Is a Woman*, in 1992. Although women drove and had responsibility for their family's car maintenance, twentieth-century popular culture was replete with humorous comments and judgmental critiques that effectively denied women pride in their driving abilities and car-related expertise. Parkin contends that, despite women's long history with cars, these stereotypes persist.
