Climate Change and Legumes Mohammad Zabed Hossain, Hossain Md Anawar, Doongar R. Chaudhary, 2023-05-23 Global climate change has created unprecedented challenges for human civilization due to its widespread adverse consequences, including a reduction in crop yield and threatening food security across the globe. Among the crop plants, legumes have great potential for ameliorating global warming since they can reduce carbon emissions by lowering reliance on the application of chemical fertilizers, by increasing nitrification and carbon sequestration in soil, and by providing protein-rich diets to both humans and livestock. This book identifies the extent of climate-induced stresses on legume plants and focuses on achieving food security through sustainable agricultural practices. This book compiles recent research findings and reviews on climate-related problems, the potential of legumes in ameliorating the impacts of climate change, as well as better management of agricultural land and practices for achieving environmental sustainability and food security. This book will serve as guidelines for scientists, agricultural practitioners, and policymakers working to achieve food security and better management of climate-induced stresses in agricultural interventions. It will also be useful as a reference book for researchers and students of both graduate and postgraduate levels. Furthermore, this book will provide enhanced knowledge about the mechanisms of yield and stress tolerance of legumes as well as developing climate-smart crops and improving

cropping systems for a sustainable environment and food security. Features of the book Reviews trends of global climate change and its consequences for food security across the continents Identifies the challenges and scopes of cultivating legumes in achieving food security in the context of global climate change Focuses on the improvements of legume production through conservation approaches in agricultural practices and modern techniques, including omics-based breeding, biotechnology, genetic engineering, and rhizobium technology Discusses the sustainable amelioration options for soils affected by climate-induced stresses Cites examples of applications of rhizobium technologies in reducing greenhouse gas emission Describes pathways associated with yield, resistance, and tolerance of legumes to climate-induced stresses

The Black Leopard Will Burrard-Lucas, 2021-04-20 This inspiring book tells the story of a photographer's journey to find the mysterious black leopard. There are few creatures as gorgeous and elusive as the black leopard. In Africa, these magnificent cats are so rare as to be the stuff of legend. Will Burrard-Lucas's love for leopards began during his childhood in Tanzania and propelled him into a career as a wildlife photographer. In his quest to create intimate portraits of animals, he developed innovative technology, including a remotely controlled camera buggy and a high quality camera trap system for photographing nocturnal creatures. Then, one day in 2018, he heard about sightings of a young African black leopard in Kenya and with the help

of people from the local community, he succeeded in capturing a series of high-quality photographs of the elusive cat. In this compelling and visually stunning book, Burrard-Lucas tells his story of creativity, entrepreneurship, and passion for wild animals, alongside awe-inspiring images of lions, elephants, and the black leopard itself. • STAR WILDLIFE PHOTOGRAPHER: Will Burrard-Lucas's passion for nature and expertise in camera technology have earned him coverage from National Geographic, The New York Times, and the BBC—and over 1 million fans enjoy his breathtaking work online. • NATURE'S HIDDEN WONDERS: Black leopards are individual animals in whom a gene mutation results in excess melanin and an elegant black coat. Most are found in Southeast Asia, where lush vegetation offers them camouflage. In the semiarid shrub lands of Africa, black leopards are extraordinarily rare. Burrard-Lucas's images—showing these beautiful creatures prowling their territory under cover of night—are vivid reminders of nature's hidden wonders. • INCREDIBLE STORY: This is an adventure story that takes place in remote and wild corners of Africa. It reveals Burrard-Lucas's devotion, vision, and innovation that led to him capturing photos that are not only incredibly rare, but also breathtakingly beautiful. Perfect for: • Aspiring and professional photographers • Photography buffs • Nature and animal lovers • Big cat enthusiasts • Conservationists • National Geographic readers • Fans of memoir and adventure stories • Travelers to Eastern and Southern Africa

The Watsons Laura Wade, 2018-11-03 What happens when the writer loses the plot? Emma Watson is nineteen and new in town. She's been cut off by her rich aunt and dumped back in the family home. Emma and her sisters must marry, fast. If not, they face poverty, spinsterhood, or worse: an eternity with their boorish brother and his awful wife. Luckily there are plenty of potential suitors to dance with, from flirtatious Tom Musgrave to castle-owning Lord Osborne, who's as awkward as he is rich. So far so familiar. But there's a problem: Jane Austen didn't finish the story. Who will write Emma's happy ending now? Based on her incomplete novel, this sparkingly witty play looks under the bonnet of Jane Austen and asks: what can characters do when their author abandons them?

True Story Michael Finkel, 2015-06-09 The improbable but true story of a man accused of murdering his entire family and the journalist he impersonated while on the run In 2001, Mike Finkel was on top of the world: young, talented, and recently promoted to a plum job at the New York Times Magazine. Then he made an irremediable slip: Under extraordinary pressure to keep producing blockbuster stories, he fabricated parts of an article. Caught and excommunicated from the Times, he retreated to his home in Montana, swearing off any contact with the media. When the phone rang, though, he couldn't resist. At the other end was a reporter from the San Francisco Chronicle, whom Finkel congratulated on being the first in what was sure to be a long and bloodthirsty line of media watchdogs. The reporter was puzzled. In

Waldport, Oregon, Christian Longo had killed his young wife and three children and dumped their bodies into the bay. With a stolen credit card, he fled south, making his way to Cancun, where he lived for several weeks under an assumed identity: Michael Finkel, journalist for the New York Times. True Story is the tale of a bizarre and convoluted collision between fact and fiction, and a meditation on the slippery nature of truth. When Finkel contacts Longo in jail, the two men begin a close and complex relationship. Over the course of a year, they exchange long letters and weekly phone calls, playing out a cat-and-mouse game in which it's never quite clear if the pursuer is Finkel or Longo—or both. Finkel's dogged pursuit of the true story pays off only at the end, in the gripping trial scenes in which Longo, after a lifetime of deception, finally tells the whole truth. Or so he says.
