The Book of Why Judea Pearl, Dana Mackenzie, 2018-05-15 A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence. Correlation is not causation. This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs *The Book of Why*.

Cause Effect Pairs in Machine Learning Isabelle Guyon, Alexander Statnikov, Berna Bakir Batu, 2019-10-22 This book presents ground-breaking advances in the domain of causal structure learning. The problem of distinguishing cause from effect ("Does altitude cause a change in atmospheric pressure, or vice versa?") is here cast as a binary classification problem, to be tackled by machine learning algorithms. Based on the results of the ChLearn Cause-Effect Pairs Challenge, this book reveals that the joint distribution of two variables can be scrutinized by machine learning algorithms to reveal the possible existence of a "causal mechanism", in the sense that the values of one variable may have been generated from the values of the other. This book provides both tutorial material on the state-of-the-art on cause-effect pairs and exposes the reader to more advanced material, with a collection of selected papers. Supplemental material includes videos, slides, and code which can be found on the workshop website. Discovering causal relationships from observational data will become increasingly important in data science with the increasing amount of available data, as a means of detecting potential triggers in epidemiology, social sciences, economy, biology, medicine, and other sciences.

Why Mosquitoes Buzz in People's Ears Verna Aardema, 1992-08-15 In this Caldecott Medal winner, Mosquito tells a story that causes a jungle disaster. Elegance has become the Dillons' hallmark. . . . Matching the art is Aardema's uniquely onomatopoeic text . . . An impressive showpiece. -Booklist, starred review. Winner of Caldecott Medal in 1976 and the Brooklyn Art Books for Children Award in 1977.

Six Dots: A Story of Young Louis Braille Jen Bryant, 2016-09-06 An inspiring picture-book biography of Louis Braille—a blind boy so determined to read that he invented his own alphabet. **Winner of a Schneider Family Book Award!** Louis Braille was just five years old when he lost his sight. He was a clever boy, determined to live like everyone else, and what he wanted more than anything was to be able to read. Even at the school for the blind in Paris, there were no books for him. And so he invented his own alphabet—a whole new system for writing that could be read by touch. A system so ingenious that it is still used by the blind community today. Award-winning writer Jen Bryant tells Braille's inspiring story with a lively and accessible text, filled with the sounds, the smells, and the touch of Louis's world. Boris Kulikov's inspired paintings help readers to understand what Louis lost, and what he was determined to gain back through books. An author's note and additional resources at the end of the book complement the simple story and offer more information for parents and teachers. Praise for *Six Dots*: An inspiring look at a child inventor whose drive and intelligence changed the world—for the blind and sighted alike.—Kirkus Reviews Even in a crowded field, Bryant's tightly focused work, cast in the fictionalized voice of Braille himself, is particularly distinguished.—Bulletin, starred review This picture book biography strikes a perfect balance between the seriousness of Braille's life and the exuberance he projected out into the world. — School Library Journal, starred review

Rube Goldberg's Simple Normal Humdrum School Day Jennifer George, 2017-08-29 If Rube's inventions are any indication, "normal" means something very different in the Goldberg household. For Rube, up is down, in is out, and the simplest path to accomplishing an everyday task—like brushing his teeth or getting dressed—is a humorously complicated one. Follow Rube as he sets out on a typical school day, overcomplicating each and every step from the time he wakes up in the morning until the time he goes to bed at night. This book features fourteen inventions, each depicting an interactive sequence whose purpose is to help Rube accomplish mundane daily tasks: a simple way to get ready for school, to make breakfast, to do his homework, and so much more.

A Course of Love Mari Perron, 2011-03-01 No matter how much is learned, if that learning remains in our heads, it is not enough. Unless learning touches our hearts, it's never going to bring us the wisdom we seek, the peace we desire, or the intimacy and connection for which we yearn. A new and more receptive way of knowing is needed, and

is found in this course for the heart. A Course of Love was received by Mari Perron and given to be a new course in miracles. It is for the heart what A Course in Miracles is for the mind. For many, it is the next step in a journey already begun.

If You Give a Moose a Muffin Laura Numeroff,2022-06-14 If a big hungry moose comes to visit, you might give him a muffin to make him feel at home. If you give him a muffin, he'll want some jam to go with it. When he's eaten all your muffins, he'll want to go to the store to get some more muffin mix... In this hilarious sequel to the beloved If You Give a Mouse a Cookie, the young host is again run ragged by a surprise guest. Young readers will delight in the comic complications that follow when a little boy entertains a gregarious moose. The If You Give... series is a perennial favorite among children. With its spare, rhythmic text and circular tale, these books are perfect for beginning readers and story time. Sure to inspire giggles and requests to read it again! Other favorites in Laura Numeroff and Felicia Bond's bestselling series include: If You Give a Cat a Cupcake If You Give a Dog a Donut If You Give a Mouse a Cookie If You Give a Pig a Pancake If You Give a Pig a Party
